FRANCHE COMTÉ, in upper Burgundy, E. France, was conquered by Julius Caesar, about 45 B.C.; by the Burgundians, early in the fifth century, A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48), and restored to him. By marriage with this count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; restored by the treaty of Aix la Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

**FRANCONIA, or FRANKENLAND** on the Maine, formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 8 Nov. 911; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

**FRANCO-PRUSSIAN WAR** originated in the emperor of the French's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfurt, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1.

The emperor recognizes the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxembourg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty count Bismarck asserted emanated entirely from the French emperor. The scheme had never been seriously entertained by himself.]

In March, 1867, a dispute arose through the French emperor's proposal for purchasing Luxembourg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; and the affair was only settled by a conference of the representatives of the great powers at London, at which the perfect neutrality of Luxembourg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications. 7-11 May, 1867.

Prince Leopold of Hohenzollern-Sigmaringen, connected with the Prussian dynasty, and brother of Charles, prince of Roumania, consented to become a candidate for the throne of Spain, 4 July, 1870.

This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, prince Leopold, with the consent of his sovereign, declined the proffered crown. 12 July,

The submission did not satisfy the French government and action, and the demand for a guarantee against the repetition of such an acceptance irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister. 13 July, 1870.

Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister. about 15 July, ..

War was announced by the French emperor, with the hearty consent of the great majority of the chambers. The left republican party opposed the war; M. Thiers and a few others only protested against it as premature. 15 July, ..

[After his surrender on 2 Sept., the emperor told count Bismarck that he did not desire war, but was driven into it by public opinion. He appears to have been greatly deceived as to the numerical strength of his army, and its state of preparation.]

"The greatest national crime that we have had the pain of recording since the days of the first French revolution has been consummated. War is declared—an unjust but premeditated war."—Times 16 July, 1870.

(For details of the battles see separate articles.)

- 2nd corps, under general Frossard.
- 3rd corps, under marshal Bazaine.
- 4th corps, under general Ladmirault.
- 5th corps, under general de Failly.
- 6th corps, under marshal Canrobert.

Commander-in-chief, the emperor; general Le Bœuf, second; succeeded by marshal Bazaine.

**PRUSSIAN ARMY**, about 600,000:—

- 1. Northern, under general Vogel von Faldenstein, about 200,000, defending the Elbe, Havel, &c.
- 2. Right, under prince Frederick Charles, about 180,000.
- 3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.
- 4. The left, under the crown prince of Prussia, about 166,000.

Commander-in-chief, king William; second, general Helmuth Karl Bernhard von Moltke (born 26 Oct., 1800; died 24 April, 1891).

The North German army, at the beginning of August, consisted, firstly, of 550,000 line, with 1,000 guns and 53,000 cavalry; secondly, of 187,000 reserve, with 234 guns and 18,000 cavalry; and, thirdly, of 205,000 landwehr or militia, with 10,000 cavalry, making a grand total of 942,000 men, with 1,680 mobilised guns and 103,000 horses.

To these must be added, firstly, the Bavarians, 69,000 line, with 102 guns and 14,800 horses—25,000 reserve with 2,400 horses, and 22,000 landwehr; secondly, the Württembergers, 100,000 line, with 54 guns and 6,000 horses, 6,500 reserve, and 6,000 landwehr; and, thirdly, the Badenese—16,000 line with 54 guns, 4,000 reserve, and 6,000 landwehr.

All the German troops taken together as under arms in Aug. 1870, 1,124,000 men.

Four weeks previously, on the peace footing, they numbered only 360,000.

The French generals appear to have acted greatly upon impulse. The Germans seem to have been invariably guided by a well-matured plan, their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Saarbrück to Sedan, Moltke appears to have left nothing to chance; and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: "1, the enormous superiority of the Germans in regard to numbers; 2, the absolute unity of their command and concert of operation; 3, their superior mechanism in equipment and supplies; 4, the superior intelligence, steadiness and discipline of the soldiers; 5, superior education of the officers, and the dash and intelligence of the cavalry."—*Quarterly Review*.

**FRANKFORT-ON-THE-ODER** (N. Germany); a member of the Hanseatic league; suffered much from marauders in the middle ages, and in the thirty years' war. The university was founded in 1506, and incorporated with that of Breslau in 1811. Near Frankfort, 12 Aug. 1759, Frederick of Prussia was defeated by the Russians and Austrians, see *Cunnersdorf*. Population, 1900, 61,835; 1910, 72,140.

**FRANKING LETTERS**, passing letters free of postage, was claimed by parliament about 1600. The privilege was restricted in 1839, and abolished after the introduction of the uniform penny postage, 1 Jan. 1849. Queen Victoria was amongst the first to relinquish her privilege.

**FRANKLIN**, the English freeholder in the middle ages; see "the Franklin's Tale," in Chaucer's *Canterbury Tales* (written about 1364).

**FRANKLIN, SEARCH FOR.** Sir John Franklin, with captains Crozier and Fitzjames, in H. M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenwich, on 19 May, 1845; see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from

England and elsewhere in search of them, and coals, provisions, clothing, and other necessities, were deposited in various places in the Arctic seas by our own and by the American government, by lady Franklin, and numerous private persons. The *True Love*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen Sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. The English government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

1. H.M.S. *Plover*, capt. Moore (afterwards under capt. Maguire), sailed from Sheerness to Behring's Straits, in search 1 Jan. 1848
2. Land expedition under Sir John Richardson and Dr. John Rae, of the Hudson's Bay Company, left England 25 March, 1849  
[Sir John Richardson returned to England in 1849, and Dr. Rae continued his search till 1851.]
3. Sir James Ross, with the *Enterprise* and *Investigator* (12 June, 1848), having also sailed in search to Barrow's Straits, returned to England (Sunderland) 3 Nov. 1849
4. The *Enterprise*, capt. Collinson, and *Investigator*, commander M'Clure, sailed from Plymouth for Behring's Straits 20 Jan. 1850  
[Both ships proceeded through to the eastward.]
5. Capt. Austin's expedition, viz.: *Resolute*, capt. Austin, C.B.; *Assistance*, capt. Ommanney; *Intrepid*, lieutenant Bertie Cator; and *Pioneer*, lieutenant Sherard Osborn, sailed from England for Barrow's Straits 25 April, 1851  
[Returned Sept. 1851.]
6. The *Lady Franklin*, capt. Penny; and *Sophia*, capt. Stewart, sailed from Aberdeen for Barrow's Straits 13 April, 1851  
[Returned home Sept. 1851.]
7. The AMERICAN expedition in the *Albatross* and *Besant*, under Bent De Haven and Dr. Kane (son of the judge), towards which Mr. Grinnell subscribed 30,000 dollars, sailed for Lancaster Sound and Barrow Straits; after drifting in the pack down Baffin's Bay, the ships were released in 1851 uninjured 25 May, 1851
8. The *Felix*, Sir John Ross, fitted out chiefly by the Hudson Bay Company, sailed to the same locality, 22 May, 1851  
[Returned in 1851.]
9. H.M.S. *North Star*, commander Saunders, which had sailed from England in 1849, wintered in Wolstenholme Sound, and returned to Spithead 28 Sept. 1851
10. H.M.S. *Herald*, captain Kellett, C.B., which had sailed in 1848, made three voyages to Behring's Straits, and returned in 1851  
Lieut. Pin went to St. Petersburg with the intention of travelling through Siberia to the mouth of the river Kolyma; but was dissuaded from proceeding by the Russian government 18 Nov. 1851  
[The *Enterprise* and *Investigator* (see No. 4 above) not having been heard of for two years.]
11. Sir Edward Belcher's expedition, consisting of *Assistance*, Sir Edward Belcher, C.B.; *Resolute*, captain Kellett, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. M'Clintock; and *Pioneer*, capt. Sherard Osborn, sailed from Woolwich 15 April, 1852  
[This expedition arrived at Beechy Island 14 Aug. 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; and the *North Star* remaining at Beechy Island.]

#### LADY FRANKLIN'S EQUIPMENTS.

Lady Franklin, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four expeditions (Nos. 12, 13, 14, 16).

12. *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow Straits 5 June, 1850  
[Returned 1 Oct. 1850.]

13. The *Prince Albert*, Mr. Kennedy, accompanied by lieutenant Bellot, of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet . . . 4 June, 1851  
(Returned Oct. 1852.)

14. The *Isabel*, commander Inglefield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, 6 July; and returned Nov. 1852

15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits . . . 1853

16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it . . . Aug. "

17. The second AMERICAN expedition, the *Advance*, under Dr. Kane . . . early in June, "

18. The *Phoenix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieutenant Bellot, sailed in May; he returned, bringing despatches from Sir E. Belcher, &c. . . Oct. "

The *Investigator* and Sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieutenant Bellot was unfortunately drowned in August while voluntarily conveying despatches for Sir E. Belcher. Capt. McClure had left the *Herald* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. passage. In Sept. 1851, the ship was again fixed in ice, and so remained till June. Pim and a party from capt. Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.

- A monument to Bellot's memory was erected at Greenwich. His "Journal" was published in . . . 1854

Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to Sir J. Franklin and his party—namely, Sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on 22 Oct. 1854, with the relics, which were deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery. Dr. Rae, aged 30, died . . . 22 July, 1893

19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in . . . Oct. 1854

Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. McClure, of the *Investigator*. The vessels had been abandoned 15 May\* when the crews of the *Phoenix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England all the captains were tried by court martial and honourably acquitted . . . 17-19 Oct. "

\* Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton, 12 Dec. 1856; was visited by her majesty on the 16th; and formally surrendered on the 30th. When the ship was broken up a desk was made of the wood, and presented by queen Victoria to the president of the United States, 29 Nov. 1880.

Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence on 21 Aug. 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. McClure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in . . . May, 1855

20. The third AMERICAN expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Erango*, and another vessel under the command of lieutenant H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon . . . 31 May, "  
[On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieutenant Hartstene, 11 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]

The Hudson's Bay Company, under advice of Dr. Rae and Sir G. Back, sent out an overland expedition, June 1855, which returned Sept. following. Some more remains of Franklin's party were discovered, "

21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since Sir) F. L. McClintock, R.N. (see No. 11)—sailed from Aberdeen 1 July, 1857; returned . . . 22 Sept. 1859

On 6 May, 1859, lieutenant Hobson found at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erebus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 50' N., and long. 98° 23' W.; that Sir John Franklin died 11 June, 1847; and that the ships were deserted 22 April, 1848. Captain McClintock continued the search, and discovered skeletons and other relics. His Journal was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.

Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.

A national monument by Noble, set up in Waterloo-place, was inaugurated, 15 Nov. 1866. It is inscribed to "FRANKLIN the great navigator and his brave companions who sacrificed their lives in completing the discovery of the north-west passage, A.D. 1847-8."

Sir John Franklin discovered the north-west passage by sailing down Peel and Victoria Straits, now named Franklin Straits.

"Franklin search expedition," under lieutenant Schwatka, of U.S. navy, in an overland expedition in summer and autumn of 1879, discovers some human remains of the crews of the ships and other things; he set up memorials, and brought away the remains of lieutenant John Irving, of the *Terror*; and returned to Massachusetts about 23 Sept. 1880

**FRAUDULENT TRUSTEES ACT,** 20 & 21 Vict. c. 54, passed Aug. 1857, in consequence of the delinquencies of sir John D. Paul, the British Bank frauds, &c. It was brought in by sir R. Bethell, then attorney-general (afterwards lord Westbury), and is very stringent.

**FREDERICKSBURG** (Virginia, N. America). On 10 Dec. 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of desperate unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

**FREDERICKSHALD** (Norway). Charles XII. of Sweden was killed by a cannon-shot before its walls, while examining the works. His hand was on his sword, and a prayer-book in his pocket, 11 Dec. 1718.

**FREE CHURCH OF ENGLAND** (Evangelical). An Episcopal Church founded in 1844, and enrolled in her majesty's High Court of Chancery in 1863. See *Catechism*, 1891.

This church grew out of the Oxford tractarian movement of 1840. The first church was planted at Bridgetown, Bolton, by the Rev. A. James Shaw, M.A., curate of the parish; it was built by the duke of Somerset, and opened in 1844. Two other churches were established in the same year, one at Exeter and the other at Hinton. But it was not till 1847 that much progress was made. When an impetus was given to the movement by the late bishop of Exeter's (Philpott) prosecution of Mr. Shaw for preaching in his diocese without his licence. The work spread, and the organization was carried under a dual plan as an "Episcopal Church." But as "this nation" could not be obtained a bishop in 1848 it was decided till 1857, when the secession of 700 eight new bishop converts from the "Protestant Episcopal Church of America" (the first bishops of which church were consecrated by the archbishop of Canterbury at Lambeth Palace chapel, in 1787), afforded an opportunity, which was embraced, of obtaining episcopal consecration for the bishops of the Free Church of England in the Canterbury line of episcopal succession.

The secessions of the F. C. E. are conducted on similar lines to those of the evangelical section of the national church, excepting the omission of some words in the offices, which the F. C. E. consider express doctrines opposed to the Protestant Reformation.

**FREE CHURCH OF SCOTLAND** was formed by an act of secession of nearly half the body

from the national church of Scotland, headed by Dr. Thos. Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings; see *Patronage*. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 300,719l. 14s. 3d. had been subscribed. In 1853 there were 850 congregations; in 1873, 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638l. from which was paid the sum of 138l. each to 700 ministers.

**FREEMASONRY**. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 9th century. A modern speculative cosmopolitan freemasonry with some analogies has essential differences from some early secret societies, and is not earlier than the seventeenth century. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1728; again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen-street, London, built 1775-6. Partly burnt, 3 May, 1883. The duke of Sussex and the earl of Zetland were for 30 and 25 years respectively grand-masters of England. Earl de Grey, afterwards marquis of Ripon, was installed grand-master of the English freemasons in room of the earl of Zetland, 14 May, 1870. The marquis (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales, afterwards Edward VII.; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. The prince of Wales was installed at Edinburgh as patron of the freemasons of Scotland, 12 Oct. 1870. As grand-master past and present of the mark masons, London, 8 Dec. 1883. **FREE TRADE** principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who

was very instrumental in passing these measures, and termed "Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled. See *French Treaty*. An agitation for free trade existed in the United States. A reform league was formed at Boston, 20 April, 1869; and the movement became active in New York in Nov., and has since continued. A free-trade budget was brought in by the ministry in Sydney in 1873. A new free-trade league was inaugurated in London in Dec. 1873; and one at Melbourne, Australia, Sept. 1876; free trade union inaugurated, July, 1903; women's free trade union, 17 May, 1904; free food league formed, 13 July, 1904. Free trade warmly advocated in New South Wales, supported in New Zealand; opposed in Canada and in Victoria, Australia, 1877-80 (see *infra*). **FRENCH CONGO**, see *French West Africa*.

**FRENCH GUINEA** constituted a colony, March, 1893.

**FRENCH LANGUAGE** is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The dialect of the Isle of France became predominant in the 12th century. The French language as

written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362. *Stow.* See *Drama.*

It was annexed to Holland by Bonaparte, in 1806, to the French empire, 1810; and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—**FRIESLAND, WEST**, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (or *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

He was mortally wounded at Brest, Nov. 1594.

**FROHSDORF**, a village 30 miles south of Vienna on the river Leitha, with a magnificent castle, which from 1844 to 1883 was the head-

**FROISSART'S CHRONICLE**, a history of the period between 1326 and 1400, treating chiefly of contemporary events in France, England, Scotland and Flanders, which are described in a vivid and interesting manner, with valuable information also on Spain, Italy and Germany. The first part of the Chronicle, the period 1326-56, is based on the writings of Jean le Bel, canon of Liège. Froissart (1327-1410), whose life was one of travel and adventure, was educated for and took orders in the church, but his inclination for poetry and gallantry led him to a roving life. He visited England in 1360, where his reputation of being a gay poet and narrator of chivalric deeds had preceded him, and became secretary to queen Philippa of Hainault, wife of Edward III., a post he held for some years; he revisited England in 1395, and spent some time at the court of Richard II. Among his various patrons was Wenceslaus duke of Brabant, whose poems, with certain pieces of his own, Froissart collected under the title of "Méliador, or the Knight of the Golden Sun;" this work was discovered in 1894. On the death of his patron, he entered the service of Guy, count of Blois, who presented him with the canonry of Chimay. About 1388 Froissart visited the comte de Foix, of whose court he gives a delightful description. He died at Chimay 1410. The earliest translation of the Chronicle is that of sir John Bourchier, lord Berners, 1525; Buchon edited the Chronicle, 1824-26; Johnes, 1803-5; and Luce 1869-88.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Agueda with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessièra with a body of the Imperial guard; and on 5 May, made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until

evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

Furs of various kinds are now extensively worn. The chief supplies come from Siberia and N. America, chinchillas (the finest and most delicate of all furs) from S. America, opossum and kangaroo from Australia, and leopard skins from Africa. Europe produces large quantities of common furs, as those of the fox, hare, and rabbit. The principal fur companies are the Hudson Bay co., founded 1670, and the N. America Fur-sealing co., established 1890. Formerly the Skippers' company, one of the city guilds, possessed many privileges and rights connected with the trade in fur. These ancient rights are now in abeyance. **GABELLE** (from *Gabe*, a gift), a term applied to various taxes, but afterwards restricted to the duty upon salt, first imposed by Philip the Fair on the French in 1286. *Duray*. Our Edward III. termed Philip of Valois, who exacted the tax rigorously, the author of the *Salic* law (from *sal*, salt), 1340. The assessments were unequal, being very heavy in some provinces and light in others; owing to exemptions purchased from the sovereigns. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the revolution, during which it was abolished (1790).

Here pope Pius IX. took refuge, 24 Nov. 1848, and resided more than a year. Here also Francis II. of Naples, with his queen and court, fled when Garibaldi entered Naples, 7 Sept. 1860; and here he remained till the city was taken by the Sardinian general Cialdini, 13 Feb. 1861, after a severe siege, uselessly prolonged by a French fleet remaining in the harbour. Cialdini was created duke of Gaeta.

**GAGGING ACT**, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted 8 Dec. 1795, when the popular mind was much excited. In Dec. 1819, soon after the Manchester affray, an act was passed for restraining public meetings and cheap periodical publications; it was popularly called "gagging bill." See *Six Acts*. Statutes coercing popular assemblies, particularly in Ireland, have been also so designated. See *Germany*, 1879. The terms "gagging" and "guillotining" were applied to Mr. Gladstone's resolutions for restricting (by the closure) the discussion on the Irish Home Rule bill, 30 June, 21 Aug. 1893. Mr. W. H. The country was ravaged by Cneius Manlius, 189 B.C., and was finally annexed to the Roman empire, 25 B.C., on the death of the king Amyntas. Ruling tyrannically, he was expelled by his brother Sancho; returned at his death in 1072; was again expelled by his brother Alfonso, 1073; and died in prison in 1091. Alfonso, son of Urraca, queen of Castile, was made king of Galicia by her in 1109. In 1858 the sailing of mail steam packets from Galway to America began; but the subsidy ceased in May, 1861, through the company's breach of contract, which occasioned much discussion in parliament. In July, 1863, the contract for the conveyance of mails from Galway to America was renewed, and 75,000*l.* voted for the purpose. The scheme was not successful. **GAME LAWS** are a remnant of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast, and loss of eyes for a stag, buck, or boar. The clergy protested against ameliorations of these laws, under Henry III. The first game act passed in 1496. Game certificates were first granted with a duty in 1784. The Game act (1 & 2 Will. IV. c. 32), greatly modifying all previous laws, was passed in 1831. By it the sale of game is legalised at certain seasons. By the Game Poaching Preventive act, passed in 1862, greatly increased powers were given to the county

police. **GANESA**, the special deity of Prudence, in the worship of the Hindus, whose favour is invoked at the beginning of any enterprise; every book is inscribed with the name *Ganecāya*, "honour to Ganesa." The god is represented with the head of an elephant, and riding upon a rat.

**GANGES**, the great sacred river of N. India, which rises in the S. Himalayas, receives several great rivers, divides into several branches, ending in the Bay of Bengal. The Ganges Canal, for irrigating the country between the Ganges and the Jumna. The main line (525 miles long) was opened 8 April, 1854. The immense difficulties in its execution were overcome by the skill and perseverance of its engineer, sir Proby Cautley. The lower Ganges canal, an extension of the above, commenced 1873.

**GARDEN CITIES** are designed to provide settlements for workpeople and others in healthy and open neighbourhoods where every hygienic safeguard is applied to the aggregation of an industrial population, so controlled that rural conditions may be associated with many of the conveniences of urban life. The earliest attempt to give practical effect to the idea was the foundation, in 1889, of the model village of Port Sunlight, on the Mersey. In 1891 Mr. Cadbury placed in trust an estate at Bourville, near Birmingham, for the benefit of future residents, and his own employés, for the erection of dwellings on the principle of building societies, a proviso being made that a certain area of land should be kept clear around each house in perpetuity. Mr. Ebenezer Howard first introduced the scheme for founding garden cities in 1898. In 1899 the Garden City Association was formed, followed by the Garden City Pioneer Company, Ltd., in 1902, with a nominal capital of 20,000*l.*, Mr. Cadbury, Mr. Alfred Harmsworth (now baron Northcliffe), and Mr. H. W. Lever being among the first subscribers. This company was the pioneer of a larger undertaking, the Garden City Company, formed September, 1903, with a capital of 30,000*l.* An estate at Letchworth, of 3,818 acres, was secured at the cost of about 40*l.* per acre, and named Letchworth Garden City. There are two villages on the estate, and roads, water, and drainage works, gas works, and a railway station have been constructed; postal, banking, and other facilities have also been secured, and in November 1908, 1,122 houses were, or were being, erected. Population, January 1909, estimated 6,000. Several large manufacturers have selected sites for the erection of workmen's cottages on the removal of

their works to the Garden City. *L'Association des Cités-Jardins de France*, on similar lines, was founded in France in 1904. Hampstead Garden Suburb Trust, Ltd., to purchase about 240 acres adjoining Hampstead Heath for residential purposes; registered 6 March, 1906.

**GARDENERS' CHRONICLE**, a weekly paper, first appeared, 2 Jan. 1841.

**GARDENING.** The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans introduced gardening into Britain, the religious orders maintained it, and its cultivation increased in the 16th century, when many Flemings came here to escape the persecutions of Philip II. Miller's dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829; an act for the protection of gardens and ornamental grounds in cities was passed in 1863. See *Botany, Flowers, Fruits*. Gardeners' Royal Benevolent Institution, founded 1838. Schools of practical gardening for women are in successful operation at Swanley, Kent, and elsewhere. School of practical gardening for boys established by the Technical Education board at the Royal Botanic Society, Regent's Park, early 1901.

**GARIGLIANO**, a river (S. W. Italy). After long waiting and refusing to recede a step, the great captain Gonsalvo de Cordova made a bridge over this river, 27 Dec. 1503, and surprised and totally defeated the French army. Gaëta surrendered a few days after.

**GAROTTE**, a machine for strangling criminals, used in Spain. After five years' interval, a young woman, her lover, and an accomplice thus executed in Madrid for murder, 11 April, 1888. Many attempts to strangle made by thieves (termed "garotters") in the winter of 1862-3, led to the passing of an act in July, 1863, termed the "Garrotting Act," to punish these acts by flogging. The machine is now abolished.

**GARTER, ORDER OF THE.** Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round table, and proclaimed a solemn tilting. On New Year's day 1343-4, he published letters of protection for the safe coming and returning of such foreign knights as would venture their reputation at the jousts and tournaments about to be held. These took place 23rd April, 1344. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1349. *See below.*

Edward III. gave the garter pre-eminence among the ensigns of the order; it is of blue velvet

bordered with gold, with the inscription in old French - "*Honi soit qui mal y pense*" (Evil be to him who evil thinks). The knights are installed at Windsor, and styled *Equites aurei Periscelidis*, knights of the golden garter. *Beaton.*

The order until king Edward VI.'s time was called the order of St. George, the patron saint of England. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder.

**GATLING GUN OR BATTERY**. Invented by Mr. R. J. Gatling, an American, in 1862 (he died 26 Feb. 1903). It was intended to discharge at once a number of projectiles smaller than the shells of field guns, and it had as many locks as barrels. Tried at Shoeburyness and rejected as inferior to a field gun firing shrapnel. A powder to be used in the Gatling, invented by M. Pertuiset, was tried in London, Aug. 1870. The Gatling which was employed in Egypt in 1881 is no longer used in the army or navy, the maxim gun having entirely superseded it.

**GAUGES** (in railways). Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad gauge, adopted on the Great Western Railway; and Mr. R. Stephenson, Joseph Locke, and others, chose the narrow. A 2 foot gauge was recommended in Feb. 1870, having been successful on the Festiniog railway, Wales; with Robt. Fairlie's "bogies" engine was much

adopted at home and abroad. About 200 miles of the S.W. lines of the Great Western were altered from the broad to the narrow gauge in a few days, June, 1874, and on 20-23 May, 1892, the broad gauge was totally superseded on the Great Western.

**GAUGING**, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law, 27 Edw. III. 1352.

**GAUL AND GAULS**. Gallia, the ancient name of France and Belgium. The Gauls, termed by the Greeks Galatæ, by the Romans, Galli or Celtae, came originally from Asia, and invading Eastern Europe, were driven westward, and settled in Spain (in Galicia), North Italy (Gallia Cisalpina), France and Belgium (Gallia Transalpina), and the British isles (the lands of the Cymry or Gaels).

**GAUNTLET**, an iron glove, first introduced in the 13th century, perhaps about 1225. It was commonly thrown down as a challenge to an adversary.

**GAUZE**, a fabric much prized among the Roman people. The manufacture of gauze and articles of a light fabric at Paisley, in Scotland, began about 1759.

**GAVEL-KIND** (derived from the Saxon *gif eal cyn*, "give all suitably;" or from *gafoleymd*, and yielding rent), the custom in Kent of dividing paternal estates in land, the wives to have half, the

rest equally among male children, without any distinction, 550. By the Irish law of gavel-kind, even bastards inherited. *Davis*. Not only the lands of the father were equally divided among all his sons, but the lands of the brother also among all his brethren, if he had no issue of his own. *Law Dict.*

**GAZA**, a city of the Philistines, of which Samson carried off the gates about 1120 B.C. (*Judges* xvi.) It was taken by Alexander after a long siege, 332; and near to it Ptolemy defeated Demetrius Poliorcetes, 312 B.C. It was taken by Saladin A.D. 1170; by Bonaparte, March, 1799; and by the Egyptians under Ibrahim Pacha in 1831.

In Feb. 1860, Herz's collection of gems was sold for 10,000*l*. Rev. C. King's "Antique Gems" appeared in 1860, and his "Natural History of Precious Stones and Gems" in 1865. Dr. A. **GENEALOGY**, from the Greek *genea*, birth, descent. The earliest pedigrees are contained in the 5th, 10th, and 11th chapters of Genesis. The first book of Chronicles contains many genealogies. The pedigree of Christ is given in *Matt.* i. and *Luke* iii. Many books on the subject have been published in all European countries; one at Magdeburg, *Theatrum Genealogicum*, by Henningsen, in 1598. Anderson, *Royal Genealogies*, London, 1732. Sims' *Manual for the Genealogist*, &c., 1888, will be found a useful guide. The works of Collins (1736*et seq.*), Edmonstone (1744-84), Nodding (1825 and 1857), Deburke, and Burke, on the British peerage, are highly esteemed. The Genealogical society, London, established in 1853. "The Genealogist," published quarterly, began 1875.

**GENERALS**. Matthew de Montmorency was the first general of the French armies, 1203. *Henault*. Balzac states that cardinal Richelieu coined the word *Generalissimo*, upon his taking the supreme command of the French armies in Italy, in 1629. Ulysses Grant was the first general of the army of the United States of America, so styled in 1866; see *Commanders-in-Chief*.

**GENERATION** (in Chronology), the interval of time between the birth of a father and the birth of his child: 33 years are allowed for the average length of a generation. See *Spontaneous*.

**GENEVA CONVENTION**, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Gènevoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilised powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference.

The International Society (termed "the Red Cross Society"), established in consequence of these proceedings, was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. See *Aid to Sick and Wounded*. Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.—Dec., 1870. Additional articles applying to naval warfare adopted during the Spanish-American war, 1898. International conference for the revision of the Geneva convention with a view to improving the condition of soldiers wounded in war, appointed to be held 16 May, 1904, postponed *sine die* on account of the Russo-Japanese war, Feb. 1904.

**GENS-D'ARMES** were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441; the younger sons of Scottish nobles being usually the captains. The name gens-d'armes was afterwards given to the police; but becoming obnoxious, was changed to "municipal guard" in 1830.

**GENTLEMAN** (from *gentilis*, of a gens, a race or clan). The Gauls observing that during the

empire of the Romans, the *scutarii* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *cingers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well-descended about 1430. *Sidney*. Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

**GENTLEMEN-AT-ARMS** (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and is composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his majesty's honourable corps of gentlemen-at-arms, 7 March, 1834. The corps is now formed of 1 captain (1,200*l.* a year), 1 lieutenant (500*l.*), 1 standard bearer (310*l.*), 1 clerk of the cheque (120*l.*), and 40 gentlemen (each 70*l.*) Their attendance is only required at drawing rooms, levees, and other state functions.

**GENTLEWOMEN'S SELF-HELP INSTITUTION**, London, established by the earl of Shaftesbury, duchess of Sutherland, and others, May, 1870.

**GEODESY** (from *daïō*, I divide), the art of measuring the surface and determining the figure of the earth, &c. Col. A. Clarke's "Geodesy," published 1880. See *Latitude*.

The 7th international Geodetic congress met at Rome 15-24 Oct. 1883. It recommended the international unification of the hour, and longitude with Greenwich. An international conference of 40 delegates met at Washington, 1 Oct., president Adm. Rogers, agree to recommend Greenwich as prime meridian; France and Brazil abstain, 13 Oct. 1884; the terms of a universal day also agreed to, 1 Nov. 1884; at Berlin, 27 Oct. 1886; at Salzburg, 17 Sept. 1888; at Paris, 3 Oct. 1889; at Berlin, 28 Sept. 1890; Stuttgart, 3 Oct. 1898; Copenhagen, 4 Aug. 1903.

The international geographical congress at London declare for Greenwich as prime meridian . . . July, 1895

**GEOGRAPHY**. The first geographical records are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Iliad*. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 B.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240. *Lenglet*. Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society* of London was established in 1830; that of Paris in 1821. The Geographical Society's exhibition opened by the marquis of Lorne, 9 Dec. 1885. The society issued a circular for promoting a more uniform spelling of geographical names, Dec. 1891.

The society instituted courses of lectures, Nov. 1862. Proposal that ladies be admitted as fellows; approved by letter-votes, 30 June; rejected by special meeting (172-158), 3 July, 1893. International Congresses are held. See *Africa, North-East and West Passage*, &c.

GEOLOGY, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Aristotle, Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino Majoli, and others (1597), Steno (1669), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals, and though difficult, it would not be impossible to raise a chronology out of them."

Burnet's "Theory of the Earth" appeared 1690, Whiston's 1696; Hutton's "Theory of the Earth" 1795.

Buffon's geological views (1749) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Gesner (1758), Michell (1760), Raspe (1762-73), Pallas and Homber B. de Saussure (1793-1804).

Werner (1775) ascribed all rocks to an aqueous origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Luc, &c.—James Hutton (1788), supported by Playfair, (1801) warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of fire. The rival parties were hence termed Neptunists and Vulcanists.

Mr. (aft. sir) A. Geikie and other eminent modern geologists, ascribed the origin of the landscape features of the earth chiefly to denudation by the action of water, 1865; *et seq.* Sir A. Geikie's "Founders of Geology" (Jean Etienne Guettard, Desmarest, and others in the 18th century), published 1897.

William Smith, the father of British geology (who had walked over a large part of England), drew up a Tabular View of British Strata, in 1799, and published it and his Geological Map of England and Wales, 1812-15; died 28 Aug. 1839. The Rev. Adam Sedgwick, another father, died 27 Jan. 1873, aged 87. Sir Charles Lyell, died 24 Feb. 1875.

The rev. Wm. Buckland, D.D., born 1784; Reader in geology, Oxford, 1818; published "Reliquiæ Diluvianæ," the results of his examination of the fossil bones of large mammals, elephants, tigers, hyenas, &c., discovered in the Kirkdale cave, Pickering, Yorkshire, in 1821. "Geology and Mineralogy," in relation to natural Theology (Bridgewater Treatise), 1836. Dean of Westminster, 1846; died Aug. 1856.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville, to aid the government in establishing a school of mines there in 1804-7, was declined, 13 Nov. 1807.

In 1807 the Geological Society of London was established. By collecting a great mass of new facts, it greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton.

The Geological Society of Dublin, 1832; of Edinburgh, 1834; of France, 1830; of Germany, 1848.

In 1835 Mr. (afterwards sir Henry) De la Beche suggested the establishment of the present *Museum of Geology*, which began at Craig's-court, and which was removed to its present position in Jernyn-street. To him are also due the valuable geological maps formed on the Ordnance survey. The building was erected by Mr. Pennethorne, and formally opened by the prince consort, 14 May, 1851. Attached to the Museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died 13 April, 1855; succeeded by sir Roderick Murchison, who died 22 Oct. 1871; succeeded by professor (afterwards sir) A. C. Ramsay, March, 1872, died 9 Dec. 1891; by Archibald Geikie, 1881, knt., 1897. A similar institution founded at Calcutta in 1840.

A great many maps have been published, with memoirs. The survey of England, on the scale of an inch to a mile, was completed in Jan. 1884. Some maps have been made on a scale of six inches to a mile. The surveys of Scotland and Ireland are in progress.

New geological map of England and Wales, 4 miles to the inch, published by government, 1898.

International geological congress originated at the Buffalo meeting of the American association for the advancement of science in 1876.

The strata composing the earth's crust may be divided into two great classes:

- I. Those generally attributed to the agency of water;
- II. To the action of fire: which may be subdivided as follows:—

Aqueous formations, stratified, rarely crystalline:—  
Sedimentary or fossiliferous rocks.  
Metamorphic or unfossiliferous.

Igneous formations, unstratified, crystalline:—  
Volcanic, as basalt, &c.  
Plutonic, as granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series:—

- The Palæozoic (most ancient forms of life) or Primary.
- The Mesozoic (middle life period), or Secondary.
- The Neozoic or Cainozoic (more recent forms of life), or Tertiary.

St. George was a tribune in the reign of Diocletian, and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, 23 April, 290.—On that day, in 1192, Richard I. defeated Saladin.

The *Order of the Sons of St. George*, established at Philadelphia as a society to succour emigrants (see under *Emigration*). It gradually acquired political influence, and many branches were formed in order to counteract the dominant aggressive policy of the Irish party. **GEORGES' CONSPIRACY.** in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*which see*).

**GEORGIA**, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander about 331 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—**GEORGIA, IN NORTH AMERICA**, was settled by gen. Oglethorpe, in 1732. Separating

from the congress of America, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state Jan. 1868. A ridiculous negro insurrection suppressed Aug. 1875. Fatal fight with negroes at Pittsburg, 7 deaths and a block of buildings burnt, 17 May, 1902. Population in 1900, 2,437,904; Atlanta, 72,689; Savannah, 44,507. *See* *United States*.

**GERM THEORY OF DISEASE** supposes "that many diseases are due to the presence and propagation in the animal system of minute organisms [termed *microbes*] having no part or share in its normal economy." *See* *Maclean*, 1876. *See* *Animalcules* and *Bacteria*. Dr. Cohn, of Breslau, whose work was published in 1872, classifies bacteria as—I. Sphero or micrococci; II. Micro-bacteria, or bacteria proper (rod-shaped); III. Desmo-bacteria, the same but longer; IV. Spiro-bacteria, spiral-shaped or curly. Translation of his work, 1881. *See* *Chabrea*.

The doctrine of *contagium animatum* was held in the middle ages and put forth in the 16th century, but contagious organisms were not discovered till the 19th by professors Pasteur, Tyndall, Dr. Wm. Budd, and others, 1875 *et seq.* At the British Association, 14 Sept. 1870, professor Huxley expressed his concurrence with the "germ theory." *See* under *Dust* and *Variolation*, 1882.

Dr. Robert Koch is said to have identified the microscopical germs of cattle disease, of consumption, of cholera, and other diseases, 1879 *et seq.*, discredited in England, May, June, 1885. *See* *Tuberculosis*.

Dr. E. Klein, Feb. 1885, reported his investigations on the relation of bacteria to cholera. At the Royal Institution, May 27, 1887, he demonstrated the propagation of scarlet fever by microbes in cow's milk.

Numerous specimens of these germs were exhibited at the Royal Institution in illustration of professor Tyndall's discourse on "Living contagia," 16 Jan. 1885.

By taking means to exclude these germs from wounds, &c., sir Joseph Lister (baron 1897) introduced antiseptic surgery with great success, in which carbolic acid is largely used, 1864 *et seq.*; the protection of wounds from air is not now considered necessary.

"Louis Pasteur," by M. Radot, his son-in-law, gives an account of Pasteur's success in mitigating the virulence of some diseases by inoculation. Maj. R. Ross's paper at the Royal Colonial Institute on "Malaria and its treatment," he shows that three great laws had been established by science regarding malaria — (1) that it was caused by numbers of microscopical parasites, which live and propagate themselves in the blood; (2) that these parasites are carried from sick persons to healthy ones by the agency of a genus of mosquitoes called *Anopheles*; (3) that these kinds of mosquitoes breed principally in shallow and terrestrial waters, 10 Nov. 1903.

Bacillus of dysentery reported from Colombo to have been discovered by M. Costellani, 24 May, 1904.

Physiological action of the emanations of radium (*which see*) on various species of micro-organisms subjected to its influence, investigated by Dr. A. B. Green, shows a marked germicidal effect on the specific and extraneous micro-organisms of vaccine, 1904.

Dr. Ford Robertson, at the Royal college of surgeons, Edinburgh, describes his experiments in investigating paralysis, and summarized the evidence in support of the conclusion that general paralysis was dependent upon the invasion of the tissues by the paralysis bacillus, 30 Jan. 1906.

German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the satirical epic in low German, "*Reineke Fuchs*," appeared in 1498; *see Reynard*, and *Drama*.

**GERMANY** (*Germania, Alemania*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them; and although that people conquered some parts of the country, they were expelled before the close of the 3rd century. In the 5th century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the 8th century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec. 800. A list of his successors is given in another page. At the extinction of his family, the empire became elective, 911, and was subsequently obtained by members of the house of Hapsburg (from 1437 till 1804). Germany was divided into circles, 1501-12. The confederation of the Rhine was formed 12 July, 1806; the Germanic confederation, 8 June, 1815; and the North German confederation, 18 Aug. 1866; the treaty ratified, 8 Sept. 1866. **GLASGOW, BISHOPRIC OF.** Kennet, in his *Antiquities*, says it was founded by St. Kentigern, *alias* Mungo, in 560; Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow, in 583. This prelate became archbishop in 1491, ceased at the Revolution, and is now a post-revolution bishopric. The cathedral, commenced in 1121, has a noble crypt; see *Bishops*.

**GLASITES** (in Scotland) and **SANDEMANIANS** (in England). In 1727, John Glas, a minister of the church of Scotland, published "The Testimony of the King of Martyrs, concerning his Kingdom (*John xviii. 36*)," in which he opposed national churches, and described the original constitution of the Christian church, its doctrines, ordinances, officers, and discipline, as given in the New Testament. Having been deposed in 1728, he and others established several churches formed upon the primitive models. The publication of a series of letters on Hervey's "Theron and Aspasio," by Robert Sandeman, in 1757, led to the establishment of churches in London and other places in England, and also in North America.

**GLASS.** The Egyptians are said to have known the art of making glass 1150 B.C. The discovery of glass took place in Syria. *Pliny*. Glass-houses were erected in Tyre. It was in use in the time of Tiberius; glass windows were used in Pompeii, Gregory of Tours speaks of church windows of coloured glass.

Glass is said to have been brought to England by Benedict Biscop, abbot of Wearmouth, in 674  
 The glass manufacture established in England at Crutched-friars, and in the Savoy (*Stow*) 1557

Great improvements have been made in the manufacture, through the immense increase of chemical knowledge in the present century. Professor Faraday published his researches on the manufacture of glass for optical purposes in 1830  
 The duties on glass, first imposed 1675; repealed, 1702; re-enacted, 1745, finally remitted, 23 April, 1845  
 GLASS-PAINTING was known to the ancient Egyptians. It was revived about the 10th century, and is described in the treatise by the monk Theophilus; was practised at Marseilles in a beautiful style, about 1500, and attained great perfection about 1530. Specimens of the 13th century exist in England; C. Winston's work is the best on the subject, 1846, new edition 1868

 The manufacture of Venetian glass probably introduced from Constantinople and perfected in the 15th and following centuries. Venetian glass is now manufactured at Venice and in England (1892) by Dr. Salvati; he presented a splendid glass vase to the queen on the anniversary of her coronation day, 28 June, 1892, see *Mosates*.

**GLASTONBURY** (Somerset), traditionally said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Ina about 708. The town and abbey were burnt, 1184, and an earthquake did great damage in 1274. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals for refusing to take the oath of supremacy to Henry VIII., 14 Nov. 1539. The monastery was suppressed 1540. Visit of pan-anglican bishops, 3 Aug. 1897. See *Lake Doolittle's*, 1892.

**GLENALMOND**, Perthshire. Trinity College here, projected in 1841, was opened in 1847. It was founded principally by the exertions of Mr. W. E. Gladstone and Mr. Hope Scott, aided by dean Ramsay, the duke of Buccleuch, the marquis of Lothian, and other gentlemen, to support the Scottish episcopal church. The site was given by Mr. George Patton, afterwards lord Glenalmond, 1846. The foundation-stone of a new wing was laid by Mr. W. E. Gladstone, 1 Oct. 1891.

**GLENCÖE MASSACRE** of the Macdonalds, a Jacobite clan, for not surrendering before 1 Jan. 1692, the state in king William's proclamation. Sir John Dalrymple, master (afterwards earl) of Stair, their enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was treacherously executed by 120 soldiers of a Campbell regiment, hospitably received by the Highlanders, 13 Feb. 1692. About 60 men were slain; and many women and children, turned out naked in a freezing night, perished. This excited great indignation; and an inquiry was set on foot, May, 1695, but no capital punishment followed.

The warrant for the massacre of Glencoe sold. See *Books*, 29 May, 1907.

**GLENDALOUGH**, or "Seven Churches," an ancient Irish bishopric, said to have been founded by St. Kevin before 612; united with Dublin, 1214.

**GLOBE**. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars; about 506 B.C.—Aristarchus of Samos maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd that the philosopher nearly lost his life, 280 B.C.; see *Circumnavigators*.

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world; by Bouguer and La Condamine in Peru, and by Maupertuis and others in Lapland, 1735.

Estimated density  $\frac{5}{6}$  that of water; weight—6,000,000,000,000,000,000,000 tons.—*Proctor*, 1875.

Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851; and to determine its density by Maskelyne, Baillif, and others; and in 1826, 1828, and 1854, by Mr. (aft. sir) G. B. Airy, the astronomer-royal.

**ARTIFICIAL GLOBES**. It is said that a celestial globe was brought to Greece from Egypt, 368 B.C., and that Archimedes constructed a planetarium about 212 B.C. The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown. The outside is a terrestrial globe. The machine, called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757; but it was afterwards reconstructed. *Coze*.

The globe at Pembroke-hall, Cambridge, erected by Dr. Long (master, 1733), eighteen feet in diameter.

In 1851 Mr. Abrahams erected in Leicester-square, Mr. Wyld, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July, 1861; the models were sold, and the building eventually taken down.

Mr. James Wyld, geographer to the queen, died 17 April, 1887.

**GLOBE THEATRE, BANKSIDE** (London), was built by agreement dated 22nd Nov. 1593, and licensed to Shakespeare and others; see *Theatres*, and *Shakespeare's Theatre*.—The Globe "Theatre," erected on the site of Lyon's-inn, Strand, was opened 28 Nov. 1868, Mr. Sefton Parry, manager; closed 1903. Hicks theatre, Shaftesbury-avenue, re-named the Globe and opened with *His Borrowed Plumes*, 6 July, 1909.

**GLOIRE**, French steam frigate, see *Navy*, *French*.

**GLORY**, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Cæsars and their flatterers, were used in the 1st century. The doxology, "*Gloria Patri*," is very ancient, and originally without the clause "as it was in the beginning," &c. In the Greek it began with "*doxa*," *glory*.

**GLOUCESTER** (Roman *Glevum*), submitted to the Romans about 45, and to the Saxons 577. The statutes of Gloucester, passed at a parliament held by Edward I. 1278, relate to actions at law. This city was incorporated by Henry III.; and was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the successful resistance of the city to Charles I., under col. Massey, Aug., Sept. 1643. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1859.—The **BISHOPRIC** was one of the six erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to Bristol in 1836, but in 1884 an act was passed to provide for their again becoming separate bishoprics. The bishopric of Bristol reconstituted 7 July, 1897. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books, this bishopric is valued at 315*l.* 17*s.* 2*d.* per annum. Present income, 5000*l.* Restoration of the cathedral, 1893-7; the lady chapel reopened 29 Sept. 1897. **GLOVES.** Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II., the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves are presented to judges at maiden assizes. The importation of foreign gloves was not permitted till 1825.

**GLUCINUM** (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Bussy obtained the rare metal glucinum in 1828. *Gmelin*.

**GLUCOSE**, see *Sugar*.

**GLUTEN**, an ingredient of grain, particularly wheat, termed the vegeto-animal principle (containing nitrogen). Its discovery is attributed to Beccaria in the 18th century.

**GLYCERINE**, discovered by Scheele, about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the "father of the fatty acids." It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is much employed in medicine and the arts, and in the manufacture of nitro-glycerine (*which see*), and other explosives.

**GLYOXYLINE** (invented by Mr. (aft. sir) F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp and saltpetre saturated with nitro-glycerine. It was abandoned for compressed gun-cotton.

**GOBELIN-TAPESTRY**, so called from a house at Paris, formerly possessed by wool-dyers, whereof the chief (Jehan Gobelin), in the reign of Francis I., is said to have found the secret of dyeing scarlet. This house was purchased by Louis XIV. about 1662, for a manufactory of works for adorning palaces (under the direction of Colbert), especially tapestry, designs for which were drawn by Le Brun, about 1666. Establishment (1878) cost about 8000*l.* a year.

**"GOD SAVE THE KING."** This melody is said to have been composed by John Bull, Mus.D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe it to Henry Carey, author of "Sally in our alley," who died, 4 Oct. 1743. It was much sung 1745-6. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "Popular Music of the Olden Times" (1859). The melody has been adopted for the German national anthem ("Heil dir im Siegerkranz!") and, also for the Danish. "God save the king," revised version, 1902.

**GOLDEN FLEECE** (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, at his marriage, instituted the military order of "*Toison d'or*" or "golden fleece;" it was said on account of the profit he made by wool. The number of knights was thirty-one. The king of Spain, as duke of Burgundy, afterwards became grand master of the order. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with dints striking fire, with the motto "*Ante ferit, quam flamma micat*." At the end of the collar hung a golden fleece, with this device, "*Proterius non vult laborum*." The order afterwards became common to all the princes of the house of Austria, as descendants of Mary, daughter of Charles the Bold, last duke of Burgundy, who married Maximilian of Austria in 1477, and now belongs to both Austria and Spain, in conformity with a treaty made 30 April, 1725. See *Easter*.

**GORDON'S "NO POPERY" RIOTS**, occasioned by the zeal of Lord George Gordon, June 2-9, 1780.

On 4 Jan. 1780, he tendered the petition of the Protestant Association to Lord North.

On Friday, 2 June, he headed the mob of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob proceeded to pillage, burn, and pull down the chapels and houses of the Roman Catholics first, but afterwards of other persons, for nearly six days. The Bank was attempted, the gaols opened (the King's Bench, Newgate, Fleet, and Bridewell prisons). On the 7th, thirty-six fires were seen blazing at one time. At length, by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled on the 8th.

210 rioters were killed and 248 wounded, of whom 75 died afterwards in the hospitals, and many were tried, convicted and executed.

The loss of property was estimated at 180,000*l*.

It is considered to be identical with the hairy people called *Gorillai* by the navigator Hanno, in his *Periplus*, about 400 B.C. In 1847 a sketch of a gorilla's cranium was sent to professor Owen by Dr. Savage, then at the Gaboon river, and preserved specimens have been brought to Europe, and a living one died on its voyage to France. In 1851 professor Owen described specimens to the Zoological Society; in 1859 he gave a summary of our knowledge of this creature at the Royal Institution, London; and in 1861 several skins and skulls were

there exhibited by M. Du Chaillu (died 29 April, 1903), who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

A young gorilla landed at Liverpool, 21 June, 1876; went to Berlin; was exhibited at Westminster aquarium, 23 July; died at Berlin, 13 Nov. 1877; another brought to the Crystal Palace, England, soon died, Aug. 1879.

**GOSPELS** (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's 55 or 65; John's, about 97. Irenæus in the 2nd century refers to each of the gospels by name. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates," still exists; its object being to assist in forming and supporting clerical parochial libraries.

**GOTHENBURG SYSTEM** (in Sweden and Norway, about 1871). By this alcoholic drinks are dispensed by persons deriving no profit from the sale. It was advocated in England by Mr. Chamberlain, M.P., and much discussed, 1876-7. The bishop of Chester introduced a bill for establishing the system, read first time, 2 March, 1893; rejected by the lords, 6 June, 1893. The system advocated at a meeting at the Duke of Westminster's, 6 July, 1894. Much controversy ensued, 1894-95.

**GOTHIC ARCHITECTURE** began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:—

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.

ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church, St. Peter's, Lincolnshire.

**GOTHLAND**, an isle in the Baltic sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679. Mariestad almost entirely destroyed by fire, 5 Dec. 1895.

**GOTHS**, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Moesia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated at Naissus by Claudius, hence surnamed Gothicus, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman western empire by the Herali, the *Ostrogoths*, under Theoderic, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

**GOTTHARD, ST.**, near the river Raab, Hungary. Here the Turks, under the grand vizier Kupruli, were totally defeated by the Imperialists and their allies, commanded by Montecuculi, 1 Aug. 1664. Peace followed this great victory. St. Gotthard tunnel, opened 1882. See *Alps*.

**GÖTTINGEN** (Hanover), a member of the Hanseatic league about 1360. The university "Georgia Augusta," founded by George II. of England in 1734, was opened 1737. It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions. Pop. 1900, 30,234; 1910 (est.), 35,125.

**GOWRIE CONSPIRACY.** John Ruthven, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James

VI. of Scotland, and seize the government. For this purpose the king was decoyed into Gowrie's house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, Alexander, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio, 9 March, 1566.

**GRAAL, HOLY** (Sangreal). The publication of Tennyson's poem "Holy Grail," Dec. 1869, led to much discussion. Tennyson treats it as the cup in which Christ drank at the Last Supper. The mediæval romances treat it as the dish which held the paschal-lamb. The word is probably old French, *gréal*, from the old Latin *gradalis*, a dish.

**GRACE**, a title assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, 431 (probably from 1 Cor. xv. 10), by the Carolingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. "*Dei gratia*" was put on his great seal by William II. of England, and on his gold coin by Edward III. The king of Prussia's saying, that he would reign "by the grace of God," gave much offence, 18 Oct. 1861.

**GRACE AT MEAT.** The ancient Greeks would not partake of any meat until they had first offered part of it, as the firstfruits, to their gods. The short prayer said before, and by some persons after, meat in Christian countries is in conformity with Christ's example, *John vi. 11*, &c.

**GRÆCIA MAGNA**, colonies planted by the Greeks, 974-748 B.C.; see *Italy*.

**GRAHAM'S DIKE** (Scotland), a wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Firth of Forth to the Clyde. Buchanan relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

**GRAIN.** Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight: 12 grains to be a pennyweight; 12 pennyweights one ounce, and 12 ounces a pound Troy. *Lawson.*

An act for the safe carriage of grain (43 & 44 Vict. c. 43) passed 7 Sept. 1880.

**GRAMMARIANS.** A society of grammarians was formed at Rome so early as 276 B.C. *Blair.* Apollodorus of Athens, Varro, Cicero Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar (*Brevis Institutio*), 1513; Lindley Murray's English Grammar, 1795; Cobbett's English Grammar, 1818.—Harris's *Hermes* was published in 1750, Horne Tooke's "Epea Pteroenta," or the "Divisions of Purley," in 1786, treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error."

In 1609 and 1610 the industrious Moors were expelled from Spain by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada.* Granada is the seat of an archbishopric. The cathedral, begun in 1529, contains the tombs of Ferdinand and Isabella, and of Philip I. and his consort Juana. The university was founded 1531. Population, 1897, province, 477,768; city, 75,054. In the province of Granada, five towns were destroyed, 690 persons killed, with an immense loss of property, through the earthquakes of 25 Dec. *cf. seq.* 1884.

**GRANARIES** were formed by Joseph in Egypt, 1715 B.C. (*Genesis* xli. 48.) There were three hundred and twenty-seven granaries in Rome. *Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two store houses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearthness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow.*

Now superseded by the zincotype and other processes.

It came to an end by the passing of the Act of Union, 2 July, 1800. In 1806, Grattan said of his parliament "I have a parental recollection. I sat by her cradle; I followed her hearse." **GRAVITATION**, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive powers." On 15 July, 1867, M. Chasles had before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the academy 13 Sept. 1869.

**GREAT SEAL OF ENGLAND**. The first seal used by Edward the Confessor was called the broad seal, and affixed to the grants of the crown, 1048. *Baker's Chron.* The most ancient seal with arms on it is that of Richard I. James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street, and carried away, with other property, 24 March, 1784, a day before the dissolution of parliament; it was never recovered, and was replaced the next day. A new seal was brought into use on the union with Ireland, 1 Jan. 1801. A new seal for Ireland was brought into use and the old one defaced, 21 Jan. 1832. **GREECE**, anciently termed *Hellas*. The name of *Græcia* first occurs in the writings of Aristotle (B.C. 384-322). Greece was so called from an ancient king, *Grævus*, and *Hellas* from another king, *Hellen*, the son of *Deucalion*. From *Hellen's* sons, *Dorus* and *Æolus*, came the *Dorians* and *Æolians*; another son *Xuthus* was father of *Achæus* and *Ion*, the progenitors of the *Achæans* and *Ionians*. Homer calls the inhabitants indifferently *Myrmidons*, *Hellenes*, and *Achaïans*. They were also termed *Danai*, from *Danaus*, king of *Argos*, 1474 B.C. Greece anciently consisted of the peninsula of the *Peloponnesus*, Greece outside of the *Peloponnesus*, *Thessaly*, and the islands. The principal states of Greece were *Athens*, *Sparta*, *Corinth*, *Thebes*, *Acadia*, and afterwards *Macedon* (*all which see*). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810; in 1861, 1,096,810, with the *Ionian isles* (added in 1864), about 1,348,522; in 1870, 1,457,894; in 1896, 2,433,806; 1910 (est.), 3,000,000. The early history is mythic, and the dates purely conjectural.

He left a portion of his property in trust to the city and the Mercers' company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures commenced in Gresham's house, near Broad-street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Excise office erected on its site, the property having been acquired by the crown for an annuity of 500*l.* The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, 2 Nov. 1843. His first residence was at Megg's hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was afterwards the principal officiating person. The general assembly, in 1826, in vain attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

**GUELPHS AND Ghibelines**, names given to the papal and imperial factions who destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry, nephew of Welf, or Guelph, duke of Bavaria, in 1138. The former was successful; but the popes and several Italian cities took the side of his rival. *Hie Guelph* and *Hie Ghibelin* are said to have been used as war-cries in 1140, at a battle before Weinsberg, in Würtemberg, when Guelph of Bavaria was defeated by the emperor Conrad IV., who came to help the rival duke Leopold.\* The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. **GUILLotine**, an instrument for causing immediate and painless death, named after its supposed inventor, a physician named Joseph Ignatius Guillotin. In 1806 M. Dubois, of Amiens, stated that the idea only was due to Guillotin, who at a meeting of the legislative assembly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M. Louis, secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792, a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pelletier, on 25 April; and Dangremont was its first political victim, 21 Aug. following. Guillotin died in 1814. The guillotine at Paris was burnt by the communist insurgents, 7 April, 1871. **GUN**, see *Artillery*, *Canon*, *Fire-arms*.—**GUN-CLUB**, for pigeon-shooting, founded by sir Gilbert East in 1862.

**GUN-COTTON**, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. See *Celluloid*. Its nature was known to Braconnot and Pelouze.

The diet of Frankfurt voted, 3 Oct. 1846, a recompense of 10,000 thalers to professor Schönbein and Dr. Richter, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive.

Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favour.

In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. (late sir Frederick) Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British Association also appointed a committee to consider its merits. A complete decision was not arrived at.

The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.

There was manufactured, by a company, the "patent safety gun-cotton," according to Mr. Abel's patent (including the pulping, compressing, and wet processes), based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition. A great explosion took place at Stowmarket; 24 persons were killed (including A. E. H. and W. R. Prentice, managers); about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment. 11 Aug. 1871.

The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept. 1871.

A government commission, appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favour of both, with special regard to compressed gun-cotton, 13 Dec. 1871.

Another report recommended this gun-cotton to be stored wet, with drying apparatus near; and to be kept in slighter boxes, 25 July, 1872.

Mr. E. O. Brown, of the war department, Woolwich, discovers that wet gun-cotton can be exploded by concussion by a detonating fuse, about Nov. 1872.

It is used as an explosive agent in mining, &c.

**GUN-CLOTH**, made on a similar principle, was patented by Mr. W. A. Dixon, about 1866.

**COTTON-GUNPOWDER**, patented by Mr. R. Punshon, 1871. A modified form was tried and reported successful, near Faversham, 3 Feb. 1875. See *Ivory*.

Fire at the Cotton powder works near Faversham; estimated damage, £6000. 1 March, 1896.

**GUN LICENCE ACT**, passed 9 Aug. 1870; annual licence, 10s. Licences issued: year 1870-7, 77,608; 1880-1, 72,834; 1901-2, 70,807; 1904-5, 238,026; 1908-9, 221,128 (113,564). See under *Game Laws*, 1883.

**GUNPOWDER**. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindoos possessed it centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magie*. He died in 1292 or 1294. Various substitutes for gunpowder have been invented, such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun-paper by Mr. Hochstötten. A new gunpowder by M. Newmayer, of Toya, near Leipzig, was discussed in Nov. 1866. "Pellet gunpowder" was ordered to be used in gun-charges in

the army, March, 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c. was passed 28 Aug. 1860, and other acts since. See *Birmingham*, 1870. In May, 1872, a company was formed to manufacture Mr. R. Punshon's patent cotton-gunpowder, assented to be very safe and controllable. The manufacture of the German "brown" or "cocoa" powder was set up at Chilworth in Surrey, 1886. See *Chronoscope*.

The use of gunpowder was denounced by Ariosto, 1526; by Jean Marot, 1532; by Cervantes, 1604; termed "villanous salt-petre" by Shakespeare, about 1598.

**ENGLISH WAR GUNPOWDER**. 75 parts nitrate of potash (salt-petre); 10 sulphur; 15 carbon. These proportions may be slightly varied.

W. Hunter, after a careful examination of the question, in 1847, thus states the result: "July and August, 1346, may be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

Above 11 tons of gunpowder on board the Lottie Sleigh, in the Mersey, exploded; much damage done in Liverpool and Birkenhead, but no lives lost, 16 Jan. 1864.

About 104,000 lbs. of gunpowder exploded at the Belvedere powder magazines of Messrs. Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance, 1 Oct. 1864. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in November; see *Dartford*.

Mr. Gale, a blind gentleman of Plymouth, on 22 June, 1865, patented his method of rendering gunpowder *uninflamable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before Queen Victoria at Windsor, 10 Nov. 1865, and it was severely tested at a martello tower, near Hastings, 20 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder company was formed, Oct. 1865, and wound up, March, 1867.

Great explosion at Messrs. Hall's powder-mills, near Faversham; 11 men killed, much damage done; shock felt at Canterbury, 10 miles off, 28 Dec. 1867. Another explosion about 21 Dec. 1868.

Dixon & Beck's works blown up; 9 lives lost, 25 July, 1868.

Explosion at Hounslow mills, 3 lives lost, 6 Sept. 1872; again one life lost and great destruction of property, 3 May, 1887.

Milner's powder-magazines placed in fire at Woolwich arsenal and found secure, 8, 9 Oct. 1872.

About 5 tons of gunpowder in barrels exploded in the barge *Tilbury*, on the Regent's canal, near the North Bridge-gate, Regent's-park, nearly 5 A.M. 2 Oct. 1874. Three men on the barge killed; shock felt about 35 miles off; destruction extended over about a square mile; some houses thrown down; very many windows blown in; the house of Mr. Alma-Tadema, the artist, much injured.

The powder was sent by Pigou and Wilks to Derbyshire for blasting purposes.

6333l. had been subscribed for the sufferers up to 1 May, 1875.

**Verdict of Inquest**—Explosion caused by ignition of vapour from benzoline by a fire or light in the cabin of the barge *Tilbury*. The Junction Canal company guilty of gross negligence, and the present laws inadequate for public safety, 19 Oct. 1874.

Sir F. A. Abel, in a discourse at the Royal Institution, 31 Jan., 1890 (*Proceedings*, vol. XIII.), explained and illustrated the merits and demerits of "smokeless explosives." Smokeless gunpowder much used in the autumn manoeuvres, 1890.

**GUNPOWDER PLOT**, for springing a mine under the houses of parliament, and destroying the king, lords, and commons there assembled, was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords, hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whither they had fled, 8 Nov.; and Guy Faux, sir Everard Digby, Rookwood, Winter, and others, were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to lord Montague led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices. The vaults are searched with much ceremony at the opening of each session of Parliament.

De Almeida and Montgomery, at the Society of Arts, in 1843. As a non-conductor of electricity it is invaluable in constructing submarine telegraphs, an application suggested by Faraday and Werner Siemens independently, 1847. 70,176 cwt. were imported into the United Kingdom in 1890; in 1900, 126,059 cwt.; 1908, 31,928 cwt.

At the age of seventy-six, in 1721, he commenced the present building, and lived to see it nearly completed. It cost him 18,793*l.*, and, in addition, he endowed it with 219,499*l.* In 1820, 196,115*l.* were bequeathed to this hospital by Mr. Hunt, to provide accommodation for 100 additional patients.

**GUZERAT**, a state in India, founded by Mahmud the Gaznevide, about 1020, conquered by Akbar in 1572; became subject to the Mahrattas 1732 or 1752. At the battle of Guzerat, near the Chenab, in the Punjab, 21 Feb. 1849, lord Gough totally defeated the Sikhs and captured the town of Guzerat.

**GYMNASIUM**, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on 29 Jan. 1865, and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, 6 Nov. 1865. A London athletic club existed in Nov. 1866. Since then gymnastics have been much cultivated. An international athletic congress opened in Paris, 16 June, 1894.

**GYMNOSOPHISTÆ**, a set of naked philosophers in India. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and endured tortures without a groan. *Pliny*.

**GYPSIES, GIPSIES, or EGYPTIANS** (French, *Bohémiens*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*); vagrants, supposed to be descendants of low-caste Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century, and at Paris in 1427. In England an act was made against their itinerancy, in 1530; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month.

The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held. George Smith, king of the gypsies, Falcoln hall, Edinburgh, protested against the Movable Dwellings bill, 10 Jan. 1891. The Gypsy Lore society, founded in 1888, had 70 members in 1891, and published a journal.

GEORGE BORROW fraternised with the gypsies, and wrote several works describing his adventures, especially "The Zincali" (1841); "The Bible in Spain" (1842); "Lavengro" (1850); and a "Dictionary of the Gypsy

Language" (1874). He was born in 1803, and died in Aug. 1881.

**GYROSCOPE** (from *gyrere*, to revolve), the name of a rotatory apparatus invented by Fessel of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope, by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

Tested when fitted to submarines and ships during . . .

The gyroscope applied to a car designed to run on a single track, by Mr. Louis Brennan. A successful demonstration was carried out at the Brennan factory (New Brompton) with a car 40 ft. in length, 22 tons in weight, and a capacity of 10-15 tons. The 2 gyroscopes weighed 1½ tons each; diameter, 3 ft. 6 in., and made 3,000 revolutions per minute . . . 10 Nov. 1909

**HAARLEM**, an ancient town in Holland, once the residence of the counts, was taken by the duke of Alva, in July, 1573, after a siege of seven months. He violated the capitulation by butchering half the inhabitants. The lake was drained, 1839-51. Population, 1900, 65,189; 1910 (est.), 72,125.

**HABEAS CORPUS.** The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, 27 May, 1679. If any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. This act (founded on the old common law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone*.

The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861  
In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

**HABITUAL CRIMINALS ACT**, for the more effectual prevention of crime, giving powers for the apprehension of habitual criminals on suspicion, passed 11 Aug. 1869.

**HAILEYBURY COLLEGE** (Herts), where students were prepared for service in India; it was founded by the East India company in 1806 in Hertford castle; the new building opened in 1809; was closed in 1858. The present college founded 1862; royal charter, 1864.

In the case of "Hutt and another v. the Governors of the college and others," Mr. Robertson, the headmaster, and Mr. Fenning, assistant, were exonerated from the charges of unlawfully expelling Henry Hutt, aged 15, on suspicion of stealing money; and the boy was declared innocent by the Queen's Bench division, 17 June; 100*l.* awarded to the plaintiffs, 27 June, 1888. "Memorials of Old Haileybury College," published 1894.

**HAINAULT FOREST** (Essex), disafforested in 1851. Here stood the Fairlop oak (*which see*).

Formally dedicated to public use; ceremony by Lord Carrington 21 July, 1905

**HAIR**. In Gaul, hair was much esteemed, hence the appellation *Gallia comata*; cutting off the hair was a punishment. The royal family of France held it as a privilege to wear long hair artfully dressed and curled. "The clerical tonsure is of apostolic institution!" *Isidorus Hispalensis*. Pope Anicetus forbade the clergy to wear long hair, 155. Long hair was out of fashion during the protectorate of Cromwell, and hence the term *Round-heads*; in 1795; and also 1801.—*Hair-powder* came into use in 1590; and in 1795 a tax of a guinea was laid upon persons using it, which yielded at one time 20,000*l.* per annum. The tax was repealed 24 June, 1809, when it yielded about 1000*l.* a year. See *Beard*.

Some members of a Burmese family totally covered with hair were exhibited in London in July, 1886.

**HAKLUYT SOCIETY**, established for the publication of rare voyages and travels, 15 Dec. 1846, was named after Richard Hakluyt, who published his "Divers Voyages touching the Discovery of America," in 1572, and "Principal Navigations, Voyages, and Discoveries made by the English Nation," in 1589 (new reprints, 1903-5); and died 23 Nov. 1616. Both armies suffered severely, but the allies most, and were compelled to retire. The county of Hanau was made a principality in 1803; seized by the French in 1806; incorporated with the duchy of Frankfurt in 1809; restored to Hesse in 1813; which was annexed to Prussia in 1866.

IV. 1447. *Stow.* The Cato-street conspirators (*which see*) were beheaded after death by hanging, 1 May, 1820. Hanging in chains (pirates, murderers, and others), an old custom, was abolished in 1834; *see Death*.

HANSE TOWNS. The Hanseatic league  
 (from *hansa*, a-sociation), formed by port towns in  
 Germany against the piracies of the Swedes and  
 Danes: began about 1140; the league signed 1241.  
 At first it consisted only of towns situate on the  
 coasts of the Baltic sea, but in 1370 it was composed  
 of sixty-six cities and forty-four confederates. The  
 league proclaimed war against Waldemar, king of  
 Denmark, about the year 1348, and against Eric in  
 1428, with forty ships and 12,000 regular troops,  
 besides seamen. On this several princes ordered  
 the merchants of their respective kingdoms to with-  
 draw their effects. The Thirty Years' War in Ger-  
 many (1618-48) broke up the strength of the asso-  
 ciation, and in 1630 the only towns retaining the  
 name were Lübeck, Hamburg, and Bremen. The  
 league suffered also by the rise of the commerce of  
 the Low Countries in the 15th century. Their  
 privileges by treaty in England were abolished by  
 Elizabeth in 1578.

HARLEY STREET, London, W. At No.  
 139, the house inhabited by Mr. Henriques, the de-

composed body of a woman, stabbed in the breast and covered with chloride of lime, was found 3 June; verdict of coroner's inquest, wilful murder by person unknown, 14 June, 1880.

**HARMONICA**, or musical glasses (tuned by regulating the amount of water, and played by a moistened finger on the rim), were played on by Gluck in London, 23 April, 1746; "arranged" by Puckeridge and Delaval, and improved by Dr. Franklin in 1760; Mozart, Beethoven, and others composed for this instrument; see *Copophone*. "**HARMONICON**," an excellent musical periodical, edited by W. Ayrton, Jan. 1823—Sept. 1833.

**HARMONICHORD**, a keyed instrument, in which sounds are produced by friction, invented by Th. Kauffmann in 1810.

**HARMONISTS**, a sect, founded in Würtemberg by George and Frederick Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823; but failed in his scheme at establishing a "social" community and returned to England; see *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

**HARMONIUM**, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The best known harmoniums in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonica, and by successive improvements he produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power. Dawes' melody attachment patented 1864.

**HARMONY**, the combination of musical notes of different pitch, appears not to have been practised by the Greeks.

Hucbald, a Flemish monk, published combinations in his "*Enchiridion Musicae*," 9th century. Harmony greatly promoted by Palestrina, and especially by Monteverde.

Jean de Muris wrote "*Artis Contrapuncti*" in 14th century.

Francis of Cologne described "*dissonant*," 16th. Beethoven greatly enlarged the range of harmonic bases.

**HARNESS**, chariots and the leathern dressings used for horses to draw them, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Bootes* (Greek for ploughman), about 1487 B.C.

**HARO, CRY OF** (*Clameur de Haro*), traditionally derived from Raoul, or Rollo, of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well, that injured persons uttered the cry "*Ha Rou! Ha Rou! A mon aide, mon prince, on me fait tort.*" The cry was raised in a church in Jersey in 1859.

**HARP**. Invented by Jubal, 3875 B.C. (*Gen. iv. 21*). David played the harp before Saul, 1063 B.C. (*1 Sam. xvi. 23*.) The Cimbri, or English Saxons,

had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Boromhe, monarch of Ireland; it was given by his son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Tug. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde; it then came into possession of the family of De Burgh; next into that of Mac Mahon of Cloghagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

The *churcharp*, fitted like the pianoforte with a keyboard, and played like the pianoforte, was introduced into Brussels and Antwerp by Mlle. Dratz, and played on by her at Prince's Hall, London, 13 March, 1838.

**HARRISON'S TIME-PIECE**, made by John Harrison, of Foulby, near Pontefract. In 1714, the government offered rewards for methods of determining the longitude at sea; to obviate the irregularities in the rate of clocks by variations of temperature, Harrison invented the method of compensation, before 1720. He came to London, and produced his first time-piece in 1735; his second in 1739; his third in 1758; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of longitude, a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, more than 24,000*l.* in all, for further improvements in following years. He was born, May, 1693, and died in 1776.

In the patent museum at South Kensington is an eight-day clock made by Harrison in 1751. It strikes the hour, indicates the day of the month, and with one exception (the escapement) its wheels are entirely made of wood.

**HARROGATE** (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Slingsby in 1571: a dome was erected over the well by lord Rosslyn in 1786. Two other chalybeate springs are the Alum well and the Towit spa. Sulphureous well discovered 1783. Theatre was erected 1788. Bath hospital erected by subscription 1825. Kursaal (cost 40,000*l.*) opened 27 May, 1903. Pop., 1901, 28,423.

**HARROW-ON-THE-HILL SCHOOL** (Middlesex), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Lord Palmerston, sir R. Peel, the statesman, and lord Byron, the poet, were educated here. The school building suffered by fire, 22 Oct. 1838. The school arrangements were modified by the public schools act, 1868. Charles II. called Harrow church "the visible church." Fire, 8, 9 Feb. 1806.

**HARTLEPOOL**, E. Durham, an ancient seaport, said to have been burnt by the Danes, 800,

fortified by the Bruces and others, and chartered by John. The foundation of West Hartlepool, with its harbour, docks, churches, &c., is due to the sagacity, skill, and energy of Mr. Ralph Ward Jackson. The work began in 1844, and the harbour was opened 1 June, 1847. The population, about 400 in 1840, was 16,998 in 1881; and 22,723 in 1901. West Hartlepool, 1901, 62,614.

**HARTLEY COAL MINE** (Northumberland). On 16 Jan. 1862, one of the iron beams, about 20 tons weight, at the mouth of the ventilating shaft, broke and fell, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill five men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by Queen Victoria and the public, and about 70,000*l.* were collected for the bereaved families. The coroner's verdict asserted the necessity of two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast iron.

**HARTWELL** (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, 6 Oct. 1807, took up his residence at Gosfield-hall, in Essex, and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, 24 April, 1814. See *France*.

**HARUSPICES**, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

**HARVARD COLLEGE**, Cambridge (Massachusetts, North America), was founded by the general court at Boston, on 28 Oct. 1636. It derived its name from John Harvard, of Emmanuel College, Cambridge, who bequeathed to it his library and 779*l.* in 1638. Present annual income now (1905) over 81,000,000. Chiefly under the management of the state until 1865, when the government was vested in a board of 30 overseers. Among the university buildings are the Agassiz museum of comparative zoology, the Peabody museum of American archaeology, the memorial hall erected in honour of the alumni who fell in the Civil war, and the theatre. 250th anniversary of its foundation kept 6-8 Nov. 1886. \$50,000 given for the foundation of a museum of Semitic antiquities, 1900.

**HARWICH**, a sea-port, Essex, a Roman station, and the Saxon *Harwec*; chartered by Edw. 2nd; absorbed into Essex, 1885.

Near here Alfred defeated the Danish fleet. Parkston, the new port near Harwich, was constructed in 1882.

**HASTINGS**, a cinque-port, Sussex; said to owe its name to the Danish pirate Hastings, who built forts here, about 893; but Mr. Kemble thinks it was the seat of a Saxon tribe named Hastings. At Senlac, now Battle, near Hastings, more than 30,000 were slain in the conflict between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, 14 Oct. 1066, his birthday. He and his two brothers were interred at Waltham abbey, Essex. The new town, St. Leonard's-on-sea, was begun in 1828. Population, 1881, 42,258; 1891, 52,340; 1901, 65,528.

**HASTINGS' TRIAL**. Warren Hastings, governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanours. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude; see *Chunar, Treaty of*. The trial occupied 145 days, and lasted seven years and three months; commencing 13 Feb. 1788, terminating in his acquittal, 23 April, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

Hastings was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company; and a pension was granted to him. He died a privy-councillor in 1818.

**HATELEY FIELD**, see *Shrewsbury*.

**HATFIELD'S ATTEMPT**. On 15 May, 1800, during a review in Hyde-park, a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near king Geo. III. In the evening, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him. Hatfield was confined as a lunatic till his death, 23 Jan. 1841, aged 69 years.

**HATHERLEY'S ACT**, see *Bankrupt*.

**HATS**, first made by a Swiss at Paris, 1404. When Charles VII. made his triumphal entry into Rouen, in 1449, he wore a hat lined with red velvet, and surmounted with a rich plume of feathers. Henceforward, hats and caps, at least in France, began to take the place of chaperons and hoods. *Hennault*. Hats were first manufactured in England by Spaniards in 1510. *Stow*. Very high-crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty laid upon hats in 1784, and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

The islands are said to have been discovered in 1542 by Gaetano, and were rediscovered by capt. Cook in 1778, who named them the Sandwich islands, after lord Sandwich, then the first lord of the admiralty. Capt. Cook was killed at Owhyhee by the natives 1779. King Kamehameha I., who died 1810, united the 12 islands into one monarchy, and under his successor, Kamehameha II., idolatry was abolished, 1810-20; the king and his queen visited England, and died in London 1824. In 1840, Kamehameha III. established a constitution, which included an assembly of nobles, and a representative council. The independence of the kingdom was guaranteed by the English and French governments in 1843. A more popular constitution was granted in 1887, but in 1893 a revolution broke out, and the queen Liliuokalani was dethroned, and a republic was proclaimed in 1894. Hawaii was formally annexed to the United States 1898, and became one of its territories in 1900. Population, about 100,000, three-fourths of which are Japanese. ### HEAD ACT, see *Ireland*, 1465.

**HEALTH, GENERAL BOARD OF**, was appointed by the act for the promotion of the public health, passed in 1848. This board was reconstructed in Aug. 1854, and sir Benjamin Hall was placed at its head, with a salary of 2000*l.*; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as medical officer. See *Hygiene, Hygeiopolis, Sanitation, Exhibitions, Public Health, &c.*

**HEARTH, or CHIMNEY, TAX**, on every fire-place or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l.* a year. It was abolished by William and Mary at the Revolution in 1689; imposed again, and again abolished.

**HEAT** (called by French chemists *Caloric*). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heilbronn and of Mr. James P. Joule of Manchester, who assert that heat is the equivalent of work done. Mr. Joule, in his papers published 1841-2, laid the foundation of the science of thermo-dynamics, on which he worked till his death, 11 Oct. 1889. The Joule Memorial fund proposed, 30 Nov. 1889, was instituted by the Royal Society, Jan. 1890. In 1854, Sir William Thomson (aft. lord Kelvin), of Glasgow, published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna, in 1865. Professor Tyndall's "Heat, a Mode of Motion," first published Feb. 1863, third edition, 1868, sixth edition, 1880. The researches of philosophers are still devoted to this subject; see *Boiling and Calorescence*. Greatest heat in the hot summer of 1868: at Nottingham, in sun, 122.4; in shade, 92.2, 22 July, 1 p.m.: 14 Aug. 1876, 95.7 in the shade; 147 in sun; 26 June, 1878, 95 in the shade.

Sir George Cayley invented a heated-air engine in 1807, and Mr. Stirling applied it to raising water in Ayrshire in 1818. One invented by Mr. Wenham was described in 1873. Improvements have been made by C. Wm. Siemens. Coal gas is generally employed.—See *Gas Engines*.

Captain John Ericsson constructed a ship, in which caloric, or heat, was the motive power. On 4 Jan. 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, capt. Ericsson continued his experiments, and patented an improved engine in 1856. In 1868 he proposed condensation of the sun's rays, and their employment as

a motive power; in March, 1889, he exhibited his apparatus in New York shortly before his death, aged 86.

**HEBREWS**; see *Jews*. The Epistle to the Hebrews ascribed to St. Paul is dated 64; it was probably written by Barnabas or Apollos. The chief classic authors of all nations, except Greece, have been translated into Hebrew.

**HEBRIDES** (the *Ebude* of Ptolemy and the *Hebudes* of Pliny), western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and annexed to the Scottish crown in 1540 by James V. The heritable jurisdictions were abolished in 1747.

**HEBRON** (in Palestine). Here Abraham resided, 1860 B.C.; and here David was made king of Judah, 1048 B.C. On 7 April, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham and his descendants.

**HECATOMB**, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedæmonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

**HECLA, MOUNT** (Iceland). Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olafsson and Paulson. Great convulsions of this mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784-5, when rivers were dried up, and many villages overwhelmed or destroyed. The mount was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, with their pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoriae of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

**HEGIRA**, ERA OF THE, dates from the flight (Arabic *hejra*) of Mahomet, from Mecca to Medina, on the night of Thursday, 15 July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantemir proves that the 16th was the first day. 33 of its lunar years are equal to 32 of those of the vulgar era.

**HEIDELBERG** (Germany) was the capital of the Palatinate, 1362-1719. The protestant electoral house becoming extinct in 1693, a war ensued, in which the castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1343, when it contained twenty-one pipes of wine. Another was made in 1664, which held 600 hogsheads. It was destroyed by the French in 1688; but a larger one, fabricated in 1751, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine, is said to be mouldering in a damp vault, empty, since 1769. Population, 1900, 40,119; 1905, 49,550.

**HELENA, ST.**, an island in the South Atlantic Ocean, discovered by the Portuguese under Juan de Nova Castilla, on St. Helena's day, 21 May, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company once more. St. Helena was the place of Napoleon's captivity, 15 Oct. 1815; and here he died, 5 May, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides, Paris; see *France*, 1840. The house and tomb have been purchased by the French government. The bishopric was founded in 1859. Governor, adm. sir Chas. Elliot, 1863-9; adm. Charles George Edward Patey, 1869; Hudson Ralph

Janis, b. 1873, died April, 1881; col. Grant Blunt; hon. Wm. Gray Wilson, 1889; K. A. Stenudale, March 1897, died 3 Oct. 1902; col. H. L. Goddard, Nov. 1902. Population, 1901, 3,342; 1910 (est.), 3,508. Revenue, 1908, 7,432; expenditure, 8,104; imports, 36,216; exports, 6,685.

#### HELIOGRAPHY (from *helios*, the sun).

A system of telegraphing by means of reflecting the rays of the sun, said to have been employed by the ancients in the time of Alexander, about 333 B.C.

A portable heliography, invented by Mr. H. Mesure, of the French Telegraph department, was introduced in 1875. It was employed in India, 1877-78; in the Afghan and Zulu campaigns, 1879-80, and in Africa, 1899-1900. See also *Telegraphy*.

**HELIOMETER**, an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743; applied by M. Bouguer, in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Ranke life observatory, Oct. 1849.

**HELIOPOLIS**; see *Baalbec* (in Syria). The name was also given to a city in Lower Egypt (the biblical On or Bethshemesh) in the earliest known times, a chief seat of the worship of the sun. It suffered much by the Persian invasion, 525 B.C., and was in ruins in the time of Strabo, who died about A.D. 24.

**HELIOSCOPE** (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye), was invented by Christopher Scheiner in 1625.

**HELIOSTAT**, an instrument invented to make a sunbeam stationary, or apparently stationary, invented by Gravesande about 1719, and greatly improved by Mulus and others. One constructed by MM. Foucault and Duboseq was exhibited at Paris in Oct. 1862.

**HELIUM**, a gas discovered by prof. Ramsay with argon in the mineral cleveite, 1895. See *Hydrogen*, 1898.

**HELLAS**, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C., derived its name from Hellen, king of Phthiotis, about 1600 B.C. The Hellenes separated into the Dorians, Æolians, Ionians, and Achæians. The present king of Greece is called "king of the Hellenes;" see *Greece*.

**HELLENIC SOCIETY**, to promote Hellenic studies, formed at a meeting, 16 June, 1879, by Mr. C. T. Newton and others. Journal published 1881, *et seq.*

**HELLESPONT** (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. According to the legendary story of the loves of Hero of Sestos, and Leander of Abydos, Leander was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea, dated seventh century B.C. Lord Byron and lieut. Ekenhead also swam across, 3 May, 1810. See *Heroes*.

**HELL-FIRE CLUBS**. Three of these associations were suppressed, 1721. They met at Somerset-house, and at houses in Westminster and in Conduit-street.

**HELMETS**, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. The helmet is the general headdress of the British Army, the broad-brimmed Colonial patterns being found most serviceable. Helmets were adopted by the Spanish troops during the Melilla operations against the Moors, 1909. *Gwillim*.

**HELOTS**, *captives*, derived by some from the Greek *helein*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helots*, 700 B.C. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C.; and is considered to have formed four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedæmonian treachery. *Herodotus*. The connection between the Helots and Helos is now considered mythical.

**HELSINGFORS**, a strongly-fortified seaport, and after Cronstadt the most important naval station on the Baltic. It was founded by Gustavus I. of Sweden, in the 16th century. In 1639 the site of the town was moved nearer to the shore. Became in 1819 the capital of Finland. During the Crimean war Sveaborg, a series of formidable batteries, was bombarded by the allied fleet for two days and nights without inflicting material damage, Aug. 1855. Helsingfors has numerous handsome buildings, including the senate-house, the university, removed here from Abo in 1828, three handsome churches, a hospital, and an observatory. It carries on a considerable trade in Baltic produce. Population, 1904, 116,000, including Russian garrison troops; 1910 (est.), 122,120.

They joined the Cimbri, were with them when the Romans were defeated near Geneva, and the consul Longinus killed, 107 B.C., and when they themselves were defeated by Marius and Catulus, 101. Invading Gaul, 61 B.C., they were defeated and massacred by Julius Cæsar, 58 B.C., near Geneva.

**HEMEL HEMPSTEAD**, Hertfordshire. The office of high bailiff dates from Henry VIII. Charter of incorporation granted, Dec. 1897. Population, 1891, 9,064; 1901, 11,244.

**HEMP AND FLAX**. Flax was first planted in England, when it was directed to be sown for fishing-nets, 1532-3. "Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *Sir John Sinclair*. The importation of hemp and flax in 1870, was 3,510,178 cwt.; 1883, 3,082,109 cwt.; 1890, 3,777,364 cwt.; 1900, 3,302,280 cwt.; 1906, 4,093,400 cwt.; 1908, 4,283,240 cwt. **HERACLIDÆ**, descendants of Hercules, who were expelled from the Peloponnesus about 1200 B.C., but reconquered it in 1048, 1103-4 or 1109 B.C., a noted epoch in chronology, all the history preceding being accounted fabulous.

**HERALDRY**. Marks of honour were used in the first ages. *Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law. *MacKenzie*. The great English works on Heraldry are those of Barcham or Barkham, published by Gwillim (1610), Edmondson (1780), and Burke's "Armory" (1842; new ed. 1883, contains a history and the arms of above 66,000 British families, &c.). See *Blazonry*, *Crests* and *Armorial Bearings*.

HERALDS' COLLEGE. 1433-4  
Philip and Mary enlarged its privileges, and confirmed them by letters patent. 15 July, 1554

Formerly, in many ceremonies, the herald represented the king's person, and therefore wore a crown, and was always a knight.

The college has an earl marshal, 3 kings of arms (Garter, Clarenceux, and Norfolk), 6 heralds (Richmond, Lancaster, Chester, Windsor, Somerset, and York), 4 pursuivants, and 2 extra heralds; see *Earl Marshal*, and *Kings-of-Arms*.

The building in Doctors' Commons, London, was erected by sir Christopher Wren (after the great fire in 1666), 1683; buildings now in Queen Victoria Street, E.C.

HERALDS' VISITATIONS were occasionally held in former times, at which the landed gentry were required to attend to prove their pedigrees, which were then entered in a book. The last is said to have been held in 1687. Some of the records have been printed.

A heraldic exhibition was opened in Edinburgh, July-August, 1891. The Treatise by the Rev. J. Woodward and the late G. Burnett was completed in two vols. 1892

**HERAT**, on the confines of Khorasân, a strong city, called the key of Afghanistan. It was conquered by Persia, early in the 16th century; by the Afghans, in 1715; by Nadir Shah, 1731; recovered by the Afghans, 1749. The Persians, baffled in an attempt in 1838, took it 25 Oct. 1856, in violation of the treaty of 1853; and war ensued between Great Britain and Persia. Peace was made in April, 1857; and Herat was restored 27 July following. It was seized again by Dost Mahommed, 26 May, 1863; taken by Yakooob Khan, rebelling against his father, 6 May, 1871. Yakooob, reconciled to his father, was made governor, 16 Sept. 1871.

**HERBERT HOSPITAL** for Soldiers, Woolwich, erected 1866.

**HERCULANEUM**, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, on 24 Aug. 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MSS. papyri were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

Arrangements for carrying out further excavations in 1881, 1882, 1883.

**HEREDITY**. The transmission of qualities of like kind of those of the parents has been specially studied by Mr. Francis Galton, F.R.S., who published "Hereditary Genius," 1869, and "Records of Family Faculties," containing tabular forms to be filled up, in order to obtain authentic data for his new science of "Eugenics." Money prizes, 5*l.* and upwards, were offered for the best records.

Dr. August Weismann, in his "Studies in the Theory of Descent," English translation, 1882, and in his "Essays on Heredity," &c., 1889, set forth his reasons for opposing the theory, and referred to his researches on the lowest forms of animal life, *protozoa*, &c., and to Darwin's principle of natural selection, which he considers as the only possible theory for explaining the difficulties connected with metamorphoses of species. Much controversy ensued, in which the late prof. G. J. Romanes took a leading part.

**HEREFORD** was made the seat of a bishopric about 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was re-opened after very extensive repairs, on 30 June, 1863. The see is valued in the king's books at 768*l.* per annum. Present income, 4,200*l.* St. Nicholas's church, the cathedral, and other buildings damaged by earthquake, 5 a.m. 17 Dec. 1896. St. James's church, burnt about 1871, burnt 23 Dec. 1901. **HEREROS**, see *German S. W. Africa*, 1904-5.

**HERETICS** (from the Greek *hairesis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," 6o (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, &c.; see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220; and immediately adopted by pope Honorius III.

Epiphanius, chosen bishop of Constantius in Cyprus, 367, wrote "Panarium," a discourse against heresies, died 402.

Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where, none daring to relieve them, they died of hunger and cold (*Speed*), 1166.

Laws against heretics repealed, 25 Henry VIII. 1534-5.

**HERMANDAD, SANTA** (Spanish for holy brotherhood), associations of cities of Castile and Arragon to defend their liberties, began about the middle of the 13th century. The brotherhood was disorganised in 1498, order having been firmly established. It is said to have been continued as a species of voluntary police.

Buerens lost about 1000 in killed and wounded, 24 Aug. 1837.

**HERRING-FISHERY** was largely encouraged by the English and Scotch in very early times. The "statute of herrings," passed in 1357, placed the trade under government control. The mode of preserving herrings by pickling was discovered about 1397. *Anderson*. The British Herring-Fishery company was instituted 2 Sept. 1750. A scientific commission in relation to the fishery was appointed in 1862.

It was subdued; and on 23 Sept. 1862, Vucatovitch, chief of the insurgents, surrendered on behalf of his countrymen to Kurschid Pasha, and an amnesty was granted.

**HESSE** (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into **HESSE-CASSEL** and **HESSE-DARMSTADT**, under his sons William and George, and their descendants played an eminent part in the convulsions of Germany during the 17th and 18th centuries.\* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy; which titles were retained in 1814. In 1807 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1813 the electorate was re-established. Capital, Darmstadt. Population (1875), grand duchy, 884,218; 1900, 1,120,135; 1905, 1,203,175.

1821. William II.; born 28 July, 1777; died 20 Aug. 1847.  
1847. Frederic William; born 20 Aug. 1802.  
The elector, in 1850, remodelled the constitution given in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for 1851 was laid before it. The chamber called for a regular budget, that it might discuss its items. The elector dissolved the chamber, and declared his dominions in a state of siege, 7 Sept. 1850.  
He fled to Hanover, and subsequently to Frankfurt; and on 14 Oct. he formally applied to the Frankfurt diet for assistance to re-establish his authority in Hesse. On 6 Nov. an Austro-Bavarian force of 10,000 men entered Hesse-Cassel, under the command of Prince Thurn und Taxis, who fixed his head-quarters in Hanau; and on the next day a Prussian force entered Cassel. The elector returned to his capital, the taxes having been collected under threats of imprisonment, 27 Dec. 1850.  
The constitution of 1831 was abolished, and a new one established, 1852.  
The conflict was soon resumed, and continued till, by law of 20 Sept. 1866, Hesse-Cassel was annexed to Prussia, 8 Oct. 1866.  
The ex-elector's property sequestered for intriguing against Prussia, 2 Nov. 1868 and Feb. 1869. He died 6 Jan. 1875.

\* Six thousand Hessian troops arrived in England, in consequence of an invasion being expected in 1756. The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 3*o*l. per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the 18th century, and served in Ireland during the rebellion in 1798.

The Egyptians used about 1700 hieroglyphs, engraved on stone, painted on wood, and written on papyri. They were either phonetic or ideographic. Their invention is mythically ascribed to Athotes. See "Book of the Dead," in article *Death*. Young, Champollion, Rosellini, Lepsius, Brugsch, Mariette, Chabas, De Rougé, Bunsen, Birch, Budge, Hilmy, and others (in the 19th century) have much elucidated Egyptian hieroglyphics; see *Rosetta Stone*. **HIGH AND LOW CHURCH** sections in the Church of England became prominent in the reign of Elizabeth. High church principles were maintained by Abp. Whitgift, and set forth by Richard Hooker "the judicious" in his *Ecclesiastical Polity*, 1593-7. They were opposed by the Puritans. The contest, hot in the reign of Anne, has continued since. Dr. Sacheverell, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons preached (14 Aug. and 9 Nov. 1709) to create apprehension for the safety of the church, and to excite hostility against dissenters. His friends were called High Church and his opponents Low Church, or moderate men, 1720. The queen favoured Sacheverell, and presented him with the rectory of St. Andrew's, Holborn. He died in 1724.

**HIGHER CRITICISM.** The terms "higher" and "lower" criticism were adopted and are used with specific reference to the criticism of the Bible. *Higher* criticism is the criticism of the literary forms and contents of the Bible, *lower* criticism is the criticism of the text of the Bible—of the original languages in which it was written. The Bible was written by many men and in three languages, Hebrew, Chaldee, and Greek. These languages have become dead languages, but they survive in written documents, and in these languages the Bible in the original is preserved to us. Criticism of the literary forms and contents of the Bible is necessary in order to establish true principles of Biblical interpretation, and to get at the intended and true meaning of the Bible. The doctrine of the divine inspiration of the Bible does not reach to the letter of the Bible, for that would mean the creation of a special and holy language through which to give the Bible to man. The Bible comes to us through human language as it is, and not as we imagine it might be or ought to be. The language is the language of man, and therefore fallible. The text of the Bible therefore depends for its accuracy upon the attention and care of successive generations of copyists. Thus Bible criticism is necessary to ascertain the true text of the Bible, and what its contents really are. In the higher criticism of the Bible there are four questions to be determined:—(1) Its integrity: to decide whether the writing in question is the work of a single author or a combination of writings by more than one author; whether it has received additions by editing in later times, or is in its original condition. What the parts are—which original and which added, and how and when the additions were made. (2) Its authenticity: this asks the question, does the writing bear the author's name, or is it anonymous? If the name is given, is the title a true one or a forgery, or is it anonymous? and if anonymous, what is its use as a writing? (3) Its literary forms: to determine the style and literary method of the various writers. (4) Its credibility: the answer to the question, are the writings which compose the Bible true? The result of the investigations of the higher criticism, so far as it has gone, has been partly destructive, for there were undoubtedly errors both in the Bible itself and also, and to a much greater extent, in its traditional interpretation by orthodox Christians; but this work has also been constructive, by clearing away from the Bible what was untrue, and establishing what is true and divine. The Reformation in the 16th century released the critical mind of Europe, and gave it liberty to work, with the result that a new spirit and method of inquiry arose, and were made use of in the search for the true meaning and worth of the Bible. At this time, it is true, the main effort was put forth in the defence of the original text, and for the simple grammatical exegesis of the Bible as against that of the Vulgate and traditional authority; but both Luther and Calvin worked upon questions of the higher criticism. Calvin, for example, denied that St. Paul was the author of the Epistle to the Hebrews. He also claimed that the Book of Psalms was a collection of psalms, and that David was not the author or even editor of the entire book. Luther denied that the

Epistle of St. James was by an apostle, and was quite willing, apparently, to allow that the whole Pentateuch was not written by Moses. But questions of authorship were not the prominent questions at this time in Biblical inquiry and research. The father of the higher criticism is the German Eichhorn, in the last quarter of the 18th century. In the Book of Genesis Eichhorn traces the marks of two sets of documents—one Elohist, and the other Jehovist—and thus makes the book the work of two authors. The critical work begun by Eichhorn went on in Germany; but owing to the fact that English divines were at this time engaged in bitter conflict with deism, the higher criticism had very little effect in England. It was not till the 19th century that English scholars really awoke to questions of Biblical criticism. It began with bishop Colenso's attack upon the historical books of the Pentateuch and that of Joshua. Since Colenso's time we have had such scholars as bishop Lightfoot and Robertson Smith, and in the present day there are at work among us upon questions of the higher criticism such men as professors Driver and Kirkpatrick.

**HIGHGATE ARCHWAY**, over a road made to avoid the hill; first stone laid by Edward Smith, 31 Oct. 1812; toll through ceased, 1 May, 1876. Rebuilding proposed, 1893; completed, 1900. See *London*, Nov. 1889.

**HIGHGATE COLLEGE**, founded by sir Roger Cholmeley, 1565.

**HIGHLANDS** (of Scotland), long held by semi-barbarous clans, were greatly improved by the construction of military roads by general Wade, about 1725-6; by the abolition of heritable jurisdiction of feudal rights in 1747, and by the establishment of the Highland and Agricultural Society in 1784; centenary celebrated at Edinburgh, July, 1884. See *Regiments, Crofters*.

*Highland Society of London*, founded 28 May, 1778. *Highland Land League* held fifth annual conference at Oban, 15 Sept. 1887; Glasgow, Sept. 1893.

**HIGHNESS.** The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter, the titles of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange, in 1644; this prince had previously only the distinction of Excellency. Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644. *Hennault*.

**HIGH PRIEST**, see *Priest*.

**HIGH TREASON.** To regulate the trials for this crime the statute, so favourable to liberty, the 25th of Edward III., 1352, was enacted, by which two living witnesses are required. By an act passed 19 April, 1821, this provision was extended to Ireland, parliament having refused to sanction the sentence of death against the duke of Somerset. In 1800 it was enacted that when the overt act was a direct attempt on the life of the sovereign, the trial should be conducted in the same manner as in the case of an indictment for murder. The trial of John Horne Tooke and others for constructive high treason failed, see *Horne Tooke*, Nov., Dec. 1794. See *Treason*.

The last two cases of execution for high treason—

I. William Cundell *alias* Connell, and John Smith; tried on a special commission, 1 Feb. 1843, being two of fourteen British subjects taken in the enemy's service in

the isles of France and England. Mr. Abbott, afterwards Lord Tenterden and chief justice, and Sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, at Lord Brougham, defended the prisoners. The defence was, that they had assumed the French uniform to aid their escape to England. They were hanged and beheaded on the ledge of Horse-monger-lane gaol on 15 March, 1802.

All the other convicts were pardoned, upon condition of serving in colonies beyond the seas.

II. *The Cato-street Conspirators* (which see), executed 1 May, 1802.

Colonel Lynch, mercenary for Galway, who fought on the side of the Boers in the S. African war, prosecuted by the crown on the charge of high treason, and tried at the king's bench before the lord chief justice, Mr. Justice Wills, and Mr. Justice Channell, and sentenced to death 23 Jan. 1903. The lord chief justice laid down, "that if a subject, in time of war, joined the king's enemies, for whatever purpose, that was an act of treason. Sentence afterwards commuted to penal servitude for life. Released "on licence," 23 Jan. 1904. Received a free pardon, 9 July, 1907.

Mr. (aft. sir) Wm. Martin Conway's "Climbing in the Karakoram-Himalayas," published 1894; he ascended great glacier heights.

On 6 Sept. 1893, near Gohna, in the district of Garhwal, Bengal, nearly the whole of the hill Maithana fell into the river Birahi Ganga, a tributary of the Alaknanda, damming it up and forming a long deep lake, which gradually increased in size, and eventually overflowed and burst its banks, causing great destruction of buildings, bridges, &c., at Gohna and Haridwar, &c., 26-27 Aug. 1894. This event was anticipated by geologists, and through scientific precautions no loss of life ensued.

Whilst exploring the Nanga Parbat region. Mr. A. F. Mummery and 2 Gurkhas were killed by an avalanche, mid. Aug. 1895.

Dr. and Mrs. Bullock Workman explore five new peaks and four glaciers to the W. and S.W. of the Hunga Nagar valley; two snow-peaks were ascended from the head of the Chakra L. glacier; first peak was reached by Mrs. Bullock Workman and two guides, to a height of 23,304 ft., 12 Aug. 1903.

The first brought to England arrived 25 May, 1850, and was placed in the Zoological Gardens, Regent's-park, London; (died, 11 March, 1878;) another, a female, four months old, was placed there in 1854 (died, Dec. 1882). One born here, 21 Feb. 1871, and another born 1 Jan. 1872, lived a few days only; another born 5 Nov. 1872. Two young ones born at Paris in May, 1858, and June, 1859, were killed by their mother. **HISTORY**. The Bible, the histories of Herodotus, "the father of history," Thucydides, and the poems of Homer, are the foundations of early ancient history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, 476. Modern history dates from the age of Charlemagne, about 800. There was not a professorship of modern history in either of our universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II. At Oxford professor E. A. Freeman, appointed 1884, died 16 March, 1892, succeeded by Mr. J. A. Froude, April, 1892; died, 20 Oct. 1894; succeeded by Mr. F. York Powell, Dec. 1894; succeeded by Mr. C. The castle of Jerablus, a mound and ruins, 20 miles below Beredjik on the Euphrates, was visited by Henry Maundrell, 1699; by Dr. Pococke, 1745; and by J. H. Skene and Mr. Geo. Smith (died 1876), who agreed in considering the remains to be those of Carchemish, the ancient capital of the Hittites, captured and annexed by Sargon, king of Assyria (about 721 B.C.) when the nation was thoroughly subdued. The site had been held successively by Hittites, Assyrians, Babylonians, Greeks, Romans, and Arabs.

Captain C. R. Conder's discovery of a key to the language of Hittite inscriptions on bas-reliefs, gems, &c., some of which were discovered by Burckhardt, 1808, and re-discovered by Mr. Palmer in 1870, announced 26 Feb. 1887; they consist of invocations, hymns, &c. to the sun, &c. His "Altaic Hieroglyphs and Hittite Inscriptions" published 1887.

Prof. A. Sayce, in 1879, considered the Hittites to have been in very early times the predominant power in Asia Minor and N. Syria. The investigations of Messrs. Ramsay, Hogarth and Headlam, in 1890, supported by the English Asia Minor Exploration Fund, led to many discoveries which are described in the *Times* of 25 July, 1891. Investigations proceeding, 1905. New discoveries by the French expedition of 1893-94, and by M. E. Chantre, in Cappadocia, in 1898; see Capt. Conder's letter, *Times*, 10 Oct. 1899. 3rd and enlarged edition of "The Hittites," by Prof. Sayce, 1903, describes his partially successful efforts in interpreting the cuneiform Hittite inscriptions.

**HOCKEY**. A game played with a ball and a club curved at the lower end. The field on which it is played is marked off with two goals, in which the players, who are divided into two sides, endeavour to drive the ball. Known in Ireland as *hurling* and in Scotland as *shinty*, the game has become in recent years very popular in England, and at the present time (1910) is much in vogue. Many ladies play hockey, and there are over 1,000 ladies' hockey clubs in Great Britain and Ireland.

HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schaueberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., 15 Nov. 1863. From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751-1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia; war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein; but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*which see*), 14 Aug. 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug. 1866. The 5th clause, directing North Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed; and was abrogated, Feb. 1879. Expulsion of Danes, see *Prussia*, Oct. 1858.

HOLY ALLIANCE was ratified at Paris, 26 Sept. 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

Population, 1901, 10,072; 1910 (est.), 12,250.

**HOLY MAID OF KENT**. Elizabeth Barton was incited by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII. if he divorced Catherine of Spain and married Anne Boleyn, and direful calamities to the nation. She and her confederates were executed at Tyburn, 5 May, 1534.

**HOLYOKE**, Massachusetts, U.S. A Roman Catholic church here took fire; a panic ensued; and about 80 were burnt or trampled to death, 26, 27 May, 1875.

**HOLY PLACES IN PALESTINE**. These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed under Latin monks, protected by the French government; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatti-scheriff, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks, who had no additional privileges, and cause fresh dissensions. 1802

The Russian and French governments sent envoys (M. Daskoff and M. Marabout) to adjust the dispute, an arrangement prevented by the Greek revolution. 1821

The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly. 1850

A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a few of them, such as Bethlehem, &c., as in former times. 9 March, 1852

The French government dissatisfied with much dissatisfaction, but the Russians still desired the law to be withdrawn from the Latin monks. M. Drouot made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1724, and demanded that the firman of 9 March, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments. March, 1853

Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. (*See Russo-Turkish War*). 28 Feb. "

**HOLY ROMAN EMPIRE**. The German empire received this title under the emperor Otho I, the great, crowned at Rome by pope John XII., 2 Feb. 962. *See* *Rome*, and *Germany*.

**HOLY ROOD OR CROSS**. A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had

been taken away, on the plundering of Jerusalem, about 615. The feast of the invention (or finding) of the Cross is on 3 May; that of the exaltation of the Cross, 14 Sept. At Boxley abbey, in Kent, was a crucifix, called the *Rood of Grace*; at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London, 1536.

**HOLYROOD PALACE** (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, 9 March, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. The palace was burnt in 1650, and rebuilt in 1659. Great improvements were made in 1857. Queen Victoria held a court here, 30 Aug. 1850; King Edward VII., 12 May, 1903.

**HOLY SEPULCHRE**, a Byzantine church in modern Jerusalem. Fergusson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, the "dome of the Rock." The question is still undecided. The order of the Holy Sepulchre was founded by Godfrey of Bouillon, 1099; revived by pope Alexander VI. 1496; re-organised, 1847 and 1868.

premier. New Home Office, Westminster, occupied 6 Aug. 1875.

**"HOME, SWEET HOME."** The words are attributed to John Howard Payne, an American actor, who died in 1852; the music is said to be Sicilian, but it is probably by sir Henry Bishop, who introduced the song into "Clari, or the Maid of Milan, in 1823."

**HOMER'S ILIAD AND ODYSSEY**, the earliest and most perfect epic poems in the world. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Odasses or Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C.

F. A. Wolf, in his *Prolegomena*, in 1795, argued that the Homeric poems were composed of independent epic songs, collected and arranged by Peisistratus about 550 B.C. This theory occasioned much controversy between scholars and poets; Mr. Andrew Lang, in "Homer and the Epic," vigorously defends "the one author theory," March, 1893.

The first English version of the *Iliad*, by Arthur Hall, appeared in 1581. The present text is attributed to the time of Pericles, who died B.C. 429. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1791. The translation of the *Iliad* by the earl of Derby (1864) is much commended.

**HOMICIDE** is said to have been tried at Athens by the Areopagites. Among the Jews, wilful murder was capital; but for chance-medley the offender was to flee to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Num. xxxv.*). 9 Geo. IV. c. 31 (1828) distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness; see *Murder*.

Animals have been tried and punished for killing human beings. A bull was hanged for homicide near the abbey of Beaupres May, 1499

**HOMILDON HILL** (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), 14 Sept. 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

**HOMILIES** in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people. Charlemagne's "Homiliarium" was issued 809. The Book of Homilies drawn up by abp. Cranmer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.

**HOMOEOPATHY**, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr. Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient

to regulate his diet and habits carefully. It has led to a more accurate study of the materia medica. Introduced into England, 1827. The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept. 1850. "The World's Convention of Homoeopathic Physicians" opened at Philadelphia, 26 June, 1876, London School of Homoeopathy, founded 15 Dec. 1876. Under the heading *Optum Medicum*, many controversial letters from allopaths and homoeopaths appeared in the *Times*, Jan. 1888.

**HOMOUSION AND HOMOIOUSION** (Greek, same essence, and similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

**HOPS** are said to have been introduced into England from Flanders in the early part of the 16th century, and to have been much cultivated in Kent by Reginald Scot in the 16th century. In the year ending 5 Jan. 1853, there were 46,157½ acres under hops in England and Wales, chiefly in Herefordshire, Kent, and Worcestershire, which paid 447,144*l.* duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported; average acreage in England, 59,833, 1885-96; 48,667 acres in 1905; produce, 615,943 cwt.; 46,723 acres in 1906; produce, 245,638 cwt.; 38,922 acres in 1908; produce, 470,761 cwt.; 16,254 cwt., value 80,986*l.*, exported in 1905; 11,608 cwt., value 57,053*l.*, exported in 1906; 9,461 cwt., value 35,666*l.*, in 1908. The duty on hops was repealed in 1862, after many applications. An act for preventing fraud in the trade was passed in June, 1866.—The hop and malt exchange, Southwark, was opened in Oct. 1867.

**HORATHI AND CURIATHI**, see *Rome*, 677 B.C.

**HORN BOOKS** used in education in England from early times to the 18th century, were tablets on which were inscribed the alphabet, the nine digits, etc., protected by a thin plate of transparent horn. Great variety of forms, now very rare. Four were exhibited at the Caxton exhibition, 1877, and nine at the loan exhibition of the Horner's company, 1882.

**HORN ; HORNPIPE**. The horn is thought to be, next to the reed, the earliest wind instrument, and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *pib-corn*, that is hornpipe, about 1300. *Spencer*. Many hornpipes were composed in the 18th century. The "College hornpipe" was very popular.

**HORNE TOOKE**, &c. The trial of Messrs Hardy, Tooke, Joyce, Thelwall, and others, on a charge of constructive high treason, caused a great sensation. They were taken into custody on 20 May, 1794. Mr. Hardy was tried 29 Oct., and, after a trial of eight days, was honourably acquitted. John Horne Tooke was tried and acquitted, 20 Nov.; and Mr. Thelwall was acquitted, 5 Dec.; the others were discharged. Acts were passed to prohibit Mr. Thelwall's political lectures in 1795.

**HORSE.** The people of Thessaly were excellent equestrians, and probably first among the Greeks who broke them in for service in war; whence probably arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B.C. 1 *Kings* iv. 26. The Greeks and Romans had some covering to secure their horses' hoofs from injury. "The Horse," by W. Youatt, new edition, 1880. See *Races and Carriages*, 1899.

**British horses.** Their great strength is described by Julius Cæsar about 50 B.C. Henry VIII. established a royal stud, and enacted laws to promote the breed of strong horses in certain shires, hence the term *royal blood*; these afterwards became draught or cart horses.

The horsemaster was imposed in 1764. Its operation was extended, and the amount increased, in 1766; and again in 1780. The existing duty upon "horses for riding" only, in England, amounts to about *eighteen pence* per year.

Annual licence duty on horses and mules, *see vol.* each; horse-dealers' licence, 12*l.* 10*s.* (act passed 1794).

Mr J. S. Ramey, an American, made a great sensation in London by training virginian wild horses, and even a zebra from the Zoological Gardens. His system is founded on a profound study of the disposition of the animal, and on kindness. He initiated many illustrious persons in his method (on 20 March, lord Palmerston and twenty others) binding them to secrecy; from which they were released in June, when his book was reprinted in England without his consent.

He was engaged to instruct cavalry officers and riding masters of the army.

**Horse-flesh.** An establishment for the sale of it as human food was opened at Paris on 9 July, 1866, with success, and its use as food strongly advocated. About 150 persons (including sir Henry Thompson and sir John Lubbock) dined on horse-flesh at the Langham hotel, London.

Subscriptions (of 10*l.* each person for five years) to suppress the breed of horses, proposed by earl Calthorpe, headed by the prince of Wales, many nobles and gentlemen, the London General Omnibus Company, and others.

**Horse-shoeing** is well described. It is represented on a coin of Tarentum, S. Italy, 400 years B.C. Iron and bronze horse shoes have been found in ancient tumuli in France, Germany, Belgium and Britain. The smith of the country was an officer under the early princes of Wales, and the farrier's art was much honoured in mediæval times.—*G. Fleming*.

**HOSPITAL SHOPPING DAY.** A scheme organised, Sept. 1903, by a committee, with lord Dunraven as chairman, to augment King Edward's Hospital fund; the king and the prince of Wales as patron and president signifying their approval. Shopkeepers of all classes, to the number of 33,000, were invited to give a certain percentage, according to individual choice, of their takings on a specified day to the fund, and a special appeal was made to the public to make extra purchases to aid the object in view. A large number of firms in the West-end and in other parts of London responded favourably to the proposal. The first "Hospital Shopping Day" took place, 3 Nov. 1903. Receipts to 17 Nov. 1,027l.; discontinued.

**HOST, ELEVATION OF THE,** introduced into Roman Catholic worship, and prostration, said to have been enjoined about 1201. Pope Gregory IX. was the first pontiff who decreed a bell to be rung as a signal for the people to adore the host, 1228. *Rees.*

**HÔTEL DE VILLE,** Paris, the residence of the chief magistrate, the prefect of the Seine, was begun in 1533, and completed, after his own design, by Dominico da Cortona, 1628. Here La Fayette introduced Louis-Philippe, the citizen-king, to the people, Aug. 1830; and here the republic was proclaimed, 26 Feb. 1848. The communists, who had established themselves here, set fire to the building, 24 May, 1871, after their total defeat. The Hôtel was reopened 13 July, 1882.

**HÔTEL DIEU,** see *Paris*, 656, 1877.

**HOUR.** The early Egyptians divided the day and night each into twelve hours, a custom adopted by Jews or Greeks probably from the Babylonians. The day is said to have been first divided into hours from 293 B.C., when L. Papius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*) 158 B.C., the time was called at Rome by public criers. In England, the measurement of time was, in early days, uncertain; one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours, said to have been invented by Alfred, A.D. 886; see *Day*. For *Hours of Prayer*, *Horæ*, see *Breviary*. The *Hour*, daily conservative newspaper, first appeared, 24 March, 1873; last time, 11 Aug. 1876.

**HOUSE DUTY** was imposed in 1695. Its rate was frequently changed till its repeal. It was re-imposed as a substitute for the window-tax, in 1851. The duty was reduced for houses rented at from 20l. to 40l. to 2d., and for those rented at from 40l. to 60l. to 4d. and 6d., 17 April, 1890. In the year 1872-3 it produced 1,243,818l.; in 1875-6, 1,421,052l.; 1880, 1,623,000l.; 1885, 1,885,000l.; 1891, 1,570,000l.; 1900-1, 1,720,000l.; 1901-2, 1,775,000l.; 1902-3, 1,825,000l.; 1903-4, 1,925,000l.; 1904-5, 2,000,000l.; 1905-6, 1,950,000l.;

**HOUSEHOLD SUFFRAGE**, after one year's residence, was introduced into parliamentary elections for boroughs, by the reform act passed 15 Aug. 1867. Attempts have been frequently made to extend household suffrage to counties, and have failed; Mr. (afterwards sir) G. O. Trevelyan's proposal lost in the commons (287 to 173), 13 May, 1874; (268 to 166), 7 July, 1875; (264 to 165), 30 May, 1876; (276 to 220), 29 June, 1877; (271 to 219), 22-23 Feb. 1878; (291 to 226), 4 March, 1879. The object was effected by the act of 1884-5.

He was slain with his master, Richard III., at Bosworth, 22 Aug. 1485. His son was restored to the earldom of Surrey in 1489; in reward for having gained the victory of Flodden, 9 Sept. 1513, he was created the 8th duke of Norfolk, in 1514. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. Henry Fitzalan Howard, now the 21st duke of Norfolk, and the 15th of the Howard family, premier duke and earl of England and hereditary earl marshal, was born in 1847.

**HUDSON'S BAY**, discovered by Sebastian Cabot, 1512, and re-discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610, had been visited by Frobisher. The "governor and company of adventurers of England trading to Hudson's Bay," obtained a charter from Charles II. in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March, 1869), were transferred to the Dominion of Canada for 300,000*l.*, and a right to claim a certain portion of land within fifty years, and other privileges; the company having consented to this, 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. (afterwards lord) Wolseley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our mission is one of peace." Riel was unsupported and offered no resistance. Extensive explorations by Mr. Tyrell, Dr. Bell, and Mr. Henry O'Sullivan, 1893 *et seq.* See *Manitoba and Western Territories*.

**HUE AND CRY**, the old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710. *Ashie*.

**HUGUENOTS**, a term (derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Genevese Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598 (re-

roked in 1685). The massacre of St. Bartholomew's day, 24 Aug. 1572, occurred during a truce; see *Coleminists, Protestants, Bartholomew, Edict, and Camisard*. S. Smiles's "History of the Huguenots," appeared in 1867. The crypt in Canterbury cathedral, assigned to French protestants in 1550, is still used by them for divine worship.

John Hulse, who died in 1790, bequeathed his estates in Cheshire to the university of Cambridge for the advancement of religious learning:—by the maintenance of two scholars; the payment of a prize of 40*l.* annually for a theological dissertation; the establishment of the office of Christian advocate (made a professorship of divinity, 1 Aug. 1860); and the payment of a lecturer, to be chosen annually. The first Hulsean lectures were given by the rev. Christopher Benson, in 1820.

**HUMAITÁ**, a strong post on the river Paraguay, fortified at a great cost with a battery of 300 cannon, by Lopez, the president of Paraguay, and believed to be impregnable, was passed by the Brazilian ironclads, 17 Feb. 1868. On the 19th, Caxias, the Brazilian general, stormed a work to the north of Humaitá, and captured many stores. Humaitá itself, after a severe siege, was abandoned, 24 July, 1868.

**HUMANE SOCIETY, ROYAL** (London), for the recovery of persons apparently drowned,

was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettson, Hawes, and Cogan, but principally by the last three. The society has above 280 depôts supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde-park. The motto of this society is appropriate—"*Luceat scintilla, forsan*"—"a small spark may perhaps lie hid." Nearly 500 persons were relieved in 1887; 544 in 1890; 711 saved, 873 rewards in 1905; 704 saved, 799 rewards in 1908. See *Drowning*, and *Lisbon*, Dec. 1890.

**HUMANISM**, a name given to the philosophical study of man's personality as distinguished from a class, especially advanced by Petrarch and other energetic advocates of the revival of the study of ancient classic literature, termed the "new learning," and ("*litera humaniores*") the age of the *renaissance*, in the 14th, 15th, and 16th centuries, whereby freedom of thought and language was greatly promoted.

**HUMANITARIAN LEAGUE.**—A society of members and workers, irrespective of class or creed, united for the sole purpose of humanising as far as possible the conditions of modern life. Society formed 1891. Its business is to educate public opinion, and so pave the way for further and more advanced legislation. Among the direct results of the League's efforts are the discontinuance of flogging in the Navy; the increased public interest in the criminal law and prison system, which led to the passing of the Prison Act of 1898, the disuse of the tread-wheel, the abolition of the Royal Buckhounds, and the introduction in Parliament of a Spurious Sports Bill, which has at last brought the reform of "blood-sports" within the range of practical politics. Annual meetings. Monthly organ, "*The Humanitarian*."

**HUMANITY, RELIGION OF.** see *Positive Philosophy*, and *Secularism*.

**HUMILIATI**, a congregation of monks, said to have been formed by some Milanese nobles, who had been imprisoned by Frederick I. 1162. The order had more than ninety monasteries; but was abolished for luxury and cruelty by pope Pius V., and the houses were given to the Dominicans, Cordeliers, and other communities in 1570.

**HUMMING BIRDS.** Mr. Gould's beautiful collection of the skins of these birds exhibited at the Zoological Gardens, London, in 1851, was bought with other birds for the British museum for 3000*l.*, April, 1881. His elaborate work on them in five folio volumes, with richly coloured plates, was completed in 1862.

**HUNDRED**, a Danish institution, was a part of a shire, so called, as is supposed, from its having been composed of a hundred families, at the time the counties were originally divided, about 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor.

**HUNDRED DAYS**: a term given to Napoleon's restoration, dating from his arrival in Paris, 20 March to his departure on 22 June, 1815

**HUNDRED YEARS' WAR**, in French history, commenced with the English invasion in 1337.

**HUNGARY**, part of the ancient Pannonia and Dacia, was subjected to the Romans about 106, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns. See *Huns*, and *Attila*. After Attila's

death, in 453, the Gepidae, and in 500 the Lombards held the country. It was acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 800 the country was settled by a Scythian tribe, named *Vingoures* or *Ungri* (whence the German name *Ungarn*) and the Magyars of Finnish origin. The chief of the latter, *Arpad* (880), was the ancestor of a line of kings (see *below*). The progress of the Magyars westward was checked by their defeat by the emperor *Henry the Fowler*, 934. The market (opened in July, 1833) was removed at the same time.

**HUNS**, a race of warlike Asiatics, said to have conquered China, about 210 B.C., and to have been expelled therefrom about A.D. 90. They invaded Hungary, about 376, and drove out the Goths. Marching westward, under Attila, they were thoroughly beaten at Chalons by the consul Aëtius, 451; see *Attila*.

**HUSSITES**. After the death of Huss,\* many of his followers took up arms, in 1419, and formed a political party under John Ziska, and built the city of Tabor. He defeated the emperor Sigismond, 11 July, 1420, and a short truce followed. Ziska, blinded at the siege of Rabi, beat all the armies sent against him. He died of the plague, 18 Oct.

\* The clergy having instigated the pope to issue a bull against heretics, John Huss (born in Bohemia in 1369), a zealous preacher of the Reformation, was cited to appear before a council of divines at Constance, the emperor Sigismond sending him a safe-conduct. He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, 6 or 7 July, 1415. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, 30 May, 1416, although he also had a safe-conduct.

1424, and is said to have ordered a drum to be made of his skin to terrify his enemies even after death. Two Hussite generals, named Procopius, defeated the imperialists in 1431; and a temporary peace ensued. Divisions took place among the Hussites, and on 30 May, 1434, they were defeated, and Procopius the elder slain at Bönischbrod or Lippau. Toleration was granted by the treaty of Iglau, and Sigismund entered Prague 23 Aug. 1436. The Hussites opposed his successor, Albert of Austria, and called Casimir of Poland to the throne; but were defeated in 1438. A portion of the Hussites existed in the time of Luther, and were called "Bohemian brethren."

**HUSTINGS** (said to be derived from *house court*, an assembly among the Anglo-Saxons), an ancient court of London, being its supreme court of judicature, as the court of common council is of legislation. The court of *hustings* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, 1052. One was held to outlaw defaulters, Guildhall, London, 6 Dec. 1870; others in 1882 and 7 July, 1896. Above 4,000 wills are on the roll of the court, commencing with the 43rd year of king Henry III. Winchester, Lincoln, York, &c., were also granted hustings courts.

**HUTCHINSONIANS** included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire (1674-1737); they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, "*Moses' Principia*," was published in 1724. He derived all things from the air, whence, he said, proceeded fire, light, and spirit, types of the Trinity. In 1712 he invented a time-piece for finding the longitude. He died in 1737.

**HYDRAULIC PRESS**, see under *Hydrostatics*.

**HYDROCHLORIC ACID** or **CHLORHYDRIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy, 1810. It is also called muriatic acid and spirit of salt; see under *Alkalies*.

**HYDROGEN** (from *hydōr*, water). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lavoisier noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state.

In 1877, Cailletet and Wroblewski obtained by rapid expansion of the compressed gas, a condensation or mist, which was supposed to be produced by the liquefaction of hydrogen. Olszewski had seen a few drops of an unknown liquid falling in a glass tube and remaining for a few instants unevaporated, subsequently proved to be due to impurities. Prof. Dewar's paper on "The Density of Hydrogen in Palladium," was published in 1873; "The Absorption of Hydrogen by Palladium at high temperatures, pressures, etc.," was published in 1897. On 10 May, 1898, at the Royal Institution, he produced half a wine-glassful of liquefied hydrogen at 240 deg. centigrade (below zero) in 5 min., and on the 12th he doubled the quantity. On the 12th he reported it to the Royal Society, and on the 16th to the French Academy. By means of this liquid he also, on the 10th, liquefied a mixture of helium and other gas or gases.

Lecture on liquid hydrogen at the Royal Institution, 20 Jan. 1899; further researches; boiling point by exhaustion, 15° of absolute temperature; liquid hydrogen exhibited boiling in a vacuum tube immersed in liquid air, 21° absolute temperature; and experiments with liquid hydrogen and the vitality of seeds; see *Athenæum*, 16 Dec. 1899; hydrogen obtained in the solid state by prof Dewar, 16° absolute scale, reported, Jan. 1900.

**HYDROGENIUM**, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium."

**HYDROGRAPH**, an apparatus invented by capt. Neale, for transmitting sound by water, for the purpose of signalling between ships, lighthouses, &c.; it consists of a transmitter, a receiver, and electric recorder; experiment were made on the Solent under the auspices of the Trinity Board.—*Times*, 19 Oct. 1893.

**HYDROGRAPHY** is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British admiralty, by which a series of charts has

been issued. International Hydrographic and Hydrological congress meets at Stockholm, 15 June, 1891. See *China*, May, 1903.

**HYDROMETER**, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann*. Archimedes was killed in 212 B.C., and Hypatia was torn to pieces at Alexandria, A.D. 415. "Hypatia," by the rev. Charles Kingsley, appeared in 1853. Robert Boyle described a hydrometer in 1675; *Baume's* (1762) and *Sykes'*, about 1818, have been much employed. Modifications of the apparatus have been invented.

**HYDROPATHY**, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C., by the Arabs in the 10th century A.D., and revived by Dr. Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr. Sydenham, before 1689. Priessnitz died 26 Nov. 1851.

A grand hydropathic establishment at Bushey, Herts, opened, 13 Feb. 1883. Many others exist throughout the kingdom.

Peckish hydropathic, erected in 1876 at a cost of 100,000*l.*, destroyed by fire, 7 July, 1905.

**HYDROPHOBIA**, in man, rabies in animals, M. Pasteur announced his discovery of a method of checking this disease, analogous to vaccination, the system afterwards applied to various diseases.

He operates on monkeys and other animals successfully, May, on dogs, Aug. 1884; on 40 persons 24 Dec. 1885. An international hospital, afterwards termed the Pasteur institute, founded (40,000*l.* subscribed) May, 1886; opened by president Carnot, 14 Nov. 1888. Out of 726 cases treated, 4 deaths reported 12 April, 1886; 1673 persons treated, 1 May, 1888, to 1 May, 1889. The principle much opposed 1886-7. A British commission for inquiry (sir James Paget, Dr. Burdon Sanderson, and others) appointed 12 April, 1886; visits Paris, and reports confidence in M. Pasteur's treatment, 27 June, 1887. M. Pasteur proposes and verifies other applications of his principles, 1887-8. The book, "M. Pasteur, Histoire d'un Savant," was published in 1883; and an English translation by lady Claud Hamilton in 1885.

Reported number of patients by M. Pasteur (he died 28 Sept. 1895) since 1885, 6,950, to 28 June, 1889; 1,850 patients, 7 deaths in 1886; 1,522 patients, 5 deaths, in 1887; 1,200 patients, 4 deaths in 1888; 1,521 patients, 6 deaths in 1889; 1,674 patients, 4 deaths in 1890; 1,300 patients, 8 deaths in 1891; 1,100 patients, 2 deaths in 1892.

Joseph is supposed to have been vizier to Apepi, one of the Hyksos, or "Shepherd Kings," as they are also called. They were overthrown by Aahmes I. of the 18th dynasty, cir. 1700 B.C. See *Egypt*. The composition of hymns for the Christian church is very ancient. The hymns of Dr. Watts (died 1748), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. "Hymns, Ancient and Modern," edited by rev. sir Henry Baker, first appeared in 1860; new edition, with revisions, 1904. "A Dictionary of Hymnology," edited by the rev. John Julian, D.D., was published Jan. 1892.

Used successfully in cases of mental hysteria, melancholia, morphia-mania, certain neurotic skin diseases, functional neurosis, &c. The lecture by R. Heidenhain, at Breslau 19 Jan. 1880, on "Hypnotism or Animal Magnetism," was translated by L. C. Wooldridge, and published in 1888. In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham lake and Fresh and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. 408,124 tons, value 247,319/, imported 1894; 362,867 tons, value 203,424/, 1902; 367,010 tons, value 181,030/, 1908.

Mr. William Leftwich chartered the vessel, which was stopped at the Thames by the custom-house officers, who demanded duty on the ice and detained the ship so long before permitting it to unload that the ice was considered to have been worthless. Ice was not mentioned in the list of custom duties, but finally a duty of 20 per cent. *ad valorem* was imposed. 12l. per ton was offered for the cargo, but the owner decided to sell in small lots, which realised much higher prices.

**ICONOCLASTS** (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned much disturbance and loss of life in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuary from the Eastern Empire, 832. The Iconoclasts were finally excommunicated at the 8th general council at Constantinople, 869-870. This controversy led to the separation of the Greek and Latin churches. Many images in churches were destroyed in Scotland and the Netherlands in the 16th century, and in England during the Reformation and the civil war, 1641-8.

Otfrelief, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another child had been substituted in his place: he was supported by Poland; his success led the Russians to invite him to the throne, and deliver into his hands, Feodor, the reigning czar, and all his family: his imposition discovered he was assassinated in his palace, 1666.

**INDEMNITY BILL**, by which the minister of the crown or the government is relieved from the responsibility of measures adopted in extreme and urgent cases, without the previous sanction of parliament. One was passed 19 April, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27), 10 March, 1818. In 1848 and 1857, bills of indemnity were passed for the suspension of the Bank Charter act by the ministry; see *Oblivion*. An *indemnity bill* is passed at the end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1715.

"**INDEPENDENT THEATRE**," a name assumed by a society conducted by Mr. J. T. Grein at the Royalty Theatre, providing entertainments resembling those of the *Théâtre-Libre* of M. Antoine, to include the plays of Ibsen and Tolstoi which could not be licensed in this country. As the theatre is supported by subscription, and no money taken at the doors, it is considered independent of the lord chamberlain's censorship in regard to the plays performed. Ibsen's "Ressmøholm" was performed 23 Feb., and his "Ghosts" 13 March, 1891. Other performances were given at the private theatre in the club-house erected on the site of Evans' hotel, Covent Garden, 22 May, 1891 *et seq.* An English version of Zola's "Thérèse Raquin" given at the Royalty, 9 Oct. 1891. **INDEPENDENTS or CONGREGATIONALISTS**, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached those doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of *Independency*. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the congregational union of England

and Wales formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851 they had 3244 chapels for 1,067,760 persons in England and Wales; in 1909, 51 county and other associations, with 4,652 churches and preaching stations; 3,195 ministers; 1,696,738 sittings. Annual meetings of the union are held; see *Worship*. The first independents in Scotland were the Glasites (*which see*). The first independent church in America was founded by the followers of John Robinson, at Plymouth, New England, in 1620.

## INDEXES OF PROHIBITED BOOKS.

The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595.

The council of Nice (325) forbade magical books.

Pope Paul IV., 1555, began the "Index" published by Pius IV., 1559. The Talmud and heretical books were especially prohibited, causing much dissatisfaction. The Inquisition was engaged in the work, which was organized by the Council of Trent. The Congregation of the Index was instituted and rules laid down.

The Indexes are—1. *Prohibitorius*, of books absolutely forbidden to be read; 2. *Expuratorio*, of books not to be licensed till purged from error.

Many of the works of the great authors of France, Spain, Germany, and England, are thus prohibited. On 25 June, 1864, Hugo's "Les Misérables" and other books were added to the number, and many others since.

**INDEX SOCIETY**, established by the librarians of various London scientific and literary institutions and societies, and literary men, to form a library of indexes, and to make indexes to rare serial works, important books, &c., 17 Dec. 1877.

[The Mogul empire now became merely nominal, independent sovereignties being formed by petty princes. In 1761, Shah Alam II., attacking the English, was defeated at Patna, 15 Jan. In 1764, after the battle of Buxar, he was thrown upon the protection of the English, who established him at Allahabad. After the victory at Delhi in 1803, gen. Lake restored the aged monarch to a nominal sovereignty, which descended at his death to his son, Akbar Shah. Akbar died in 1837, and was succeeded by the last king of Delhi (his son), who received a pension of about 125,000l. per annum. **INDIANS** occupying the south-western parts of the United States, termed *Indian territory*, in direct connection with the government, were numbered at 239,506 in 1861; 261,912 in 1881; 249,253 in 1900; 248,472 in 1907. The larger tribes are the Cherokees (22,000), the Choctaws (18,000), the Creeks (13,550), the Chickasaws (5000); and the Sioux (30,000). A large proportion are in comfortable circumstances, and have schools and churches; other tribes are the Delawares, Sacs, Foxes, Shawnees, and Ioways. During the American civil war in 1861, the Choctaws joined the confederates, who permitted two Choctaw delegates to sit in congress; the first being Sampson Folsom and Eastman Loman; but the principal chief of the Cherokees, on 4 May, 1861, issued a proclamation of neutrality, which was maintained with great difficulty. In a war provoked by outrages general Sheridan defeated the Indians, and they surrendered unconditionally Dec. 1868. Negotiations undertaken by the Quakers had no effect, and the war was renewed June, 1869. As a chastisement for murders and other outrages major Baker killed 173 Indians, including women and children, Jan. 1870. In June following a deputation of eminent chiefs was received by the president at Washington, and promises and presents were made to them. On 1 Oct. 1869 prince Arthur (afterwards duke of Connaught) visited the villages of the Canadian Indians, and was made a chief of the "Six Nations." A deputation of Indian chiefs was well received by the president at Washington, Jan. 1870. A meeting of delegates from various tribes met at Ocmulgee, 5-17

June, 1871, and agreed to a constitution for the common government by means of a senate and parliament representing 17 tribes of 60,000 people; see *Madoc*.

INDICTION, a Roman term originally applied to a tribute of corn, paid every fifteen years, and to the time at which it was paid. The first examples in the Theodosian code are of the reign of Constantius II., who died 361.—In memory of the great victory obtained by Constantine over Maxentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha 1 Jan. 313. It was first used by the Latin church in 342.

INDIGO, the dye obtained from the wood plant, *Isatis tinctoria*, was used by the Egyptians, and other ancient nations; and the processes are described by Pliny. After the passage of the Cape of

Good Hope, in 1497, it was gradually superseded by the eastern indigo, got from the *indigofera*. The mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1850, 70,482 cwt.; in 1861, 83,109 cwt.; in 1871, 106,307 cwt.; in 1881, 81,088 cwt.; in 1890, 81,854 cwt.; 1900, 33,877 cwt.; 1902, 30,471 cwt.; 1904, 20,709 cwt.; 1906, 7,641 cwt.; 1908, 8,644 cwt.

After long-continued experiments, especially by prof. A. Baeyer, the dye has been prepared artificially from its chemical elements in coal tar 1869-80. Professor H. E. Roscoe, at the Royal Institution, proved that the properties of the artificial and natural indigo were identical 27 May, 1881.

**INDIRECT CLAIMS**, see *Alabama, Washington*.

**INDIUM**, a metal discovered in the arsenical pyrites of Freiberg by F. Reich and T. Richter in 1863. Its name is due to its giving an indigo blue ray in its spectrum.

**INDIVIDUALISM**, the principle maintained by Herbert Spencer and others in opposition to too much state control and socialism.

**INDO-CHINA**, a name given to central Asia. The countries under French government or protection are Annam, Cochinchina, Cambodia, and Tonquin. Burmah is subject to Great Britain, and Siam is independent.

**INDORE**, a province of British India; the principal native rulers have been the Mahratta chiefs, named Holkar, rivals of the Scindiahs at Gwalior. Rao Holkar received a grant of territory from the British in 1733. After severe conflicts the Mahratta chiefs were finally quelled in 1818. The town of Indore, founded in 1767, was destroyed by Scindiahs after a battle on 14 Oct. 1801. The maharajah Shivaji Rao Holkar died 17 June, 1886. Succeeded by his son, Tuckaji Rao Holkar, who was present at queen Victoria's jubilee in London in 1887. Indore was visited by the viceroy, the marquis of Lansdowne, 24 Nov. 1891. The maharajah Shivaji Rao Holkar in ill-health, abdicated in favour of his son, Tukoji Rao, aged 12, 31 Jan. 1903. Population, 1901, 850,600.

**INDUCTION** of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850. See under *Electricity*.

**INDUCTIVE PHILOSOPHY**, based on the results of observations and experiments, really *common sense*, is especially expounded by Bacon in the second book of his "*Novum Organum*," published 1620. Wm. Harvey (1578-1657) endeavoured "to search out the secrets of nature by the way of experiment." See *Blood*.

**INDULGENCES** in the early church were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo III. about 800, was granted in the 11th century by Gregory VII., and by Urban II., and by others, in the 12th century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo X. published general indulgences throughout Europe, and the resistance to them led to the Reformation.

**INDUSTRIAL AND PROVIDENT SOCIETIES ACTS**, 1852 and 1862, were amended by acts passed 1867, 1871, and 1876. Acts consolidated in 1893; amended, 1895.

**INDUSTRIAL DWELLINGS**, see *Artisans*.

**INDUSTRIAL EXHIBITIONS** in Great Britain are now frequent. One for South London was opened at Lambeth, 1 March, 1864; for North London, by earl Russell, at the Agricultural hall, Islington, 17 Oct. 1864; for West London, at the Floral hall, Covent-garden, 1 May, 1865; for the city of London, at Guildhall, 6 March, 1866; one was opened at York, 24 July, 1866. The Workmen's International Exhibition, Agricultural hall, London, was opened 16 July; closed, 31 Oct. 1870; one by the Article club at the Crystal palace opened by the duke of Connaught, 30 May, 1899; others since.

**INDUSTRIAL FREEDOM LEAGUE**, founded 1903.

**INDUSTRIAL PROPERTY**; an international conference for its protection was opened at Paris, 6 March, 1883, others since.

**INDUSTRIAL REMUNERATION CONFERENCES**, at Prince's hall, Piccadilly, London, held 28-30 Jan. 1885. Papers read on the relation between capital and labour, &c., by lord Bramwell, sir Thomas Brassey, and others.

**INDUSTRIAL SCHOOLS ACT**, 21 & 22 Vict. c. 48 (1857) was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children. Another act was passed, 1861. These acts were consolidated by an act passed in Aug. 1866; amended 1894. Forty-seven of these schools had been certified under these acts up to 29 Sept. 1864. The act was extended to Ireland, 1868. See also *Reformatory Schools*.

**INDUSTRIAL VILLAGES**; the formation of these by the removal of workmen from towns, was proposed at a meeting of the Society of Arts, 26 June, 1885.

**INDUSTRY**, see *Scientific*. A conference for the christian organisation of industry met in Holborn town hall, 29 Nov. 1893.

**INFALLIBILITY OF THE POPE**, in regard to faith and morals, was decreed by the Vatican Council, and promulgated, 18 July, 1870. The doctrine was much opposed in Germany, and led to the constitution of the church named "Old Catholics," *which see*. Mr. Gladstone's pamphlets, "The Vatican Decrees in their bearing on Civil Allegiance," published Nov. 1874, and "Vaticanism," in Feb. 1875.

**INFANTICIDE**, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it gradually decreased in India. On 12 Nov. 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov. 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out to improper persons. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by

poison and neglect, 23 Sept. 1870. She had adopted about 40 children, receiving a few pounds as premium, in four years many had died. John and Catherine Barnes, of Traunere, near Birkenhead, convicted of manslaughter (see *Trials*), 29 Oct. 1870. The Infant Life Protection act passed 25 July, 1872; amended, 1897. Female infanticide prohibited in China about June, 1873. Amelia E. Dyer, a baby farmer, convicted of the murder of infant children, the bodies having been thrown into the Thames at Reading, 22 May; executed, 10 June, 1896. Two women "baby-farmers" executed at Holloway, 3 Feb. 1903; Daisy Lord, condemned to death in July, 1908, for the murder of her illegitimate child; sentence afterwards commuted to penal servitude for life.

**INFANTRY**, foot soldiers; their organisation much improved during the wars of Charles V. and Francis I., in the 16th century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment termed the 100th. The number 109, beside the rifle brigade until 1881 included the nine regiments formerly in the pay of the East India company, and several colonial corps. In 1871 the principle of localisation, the linking of battalions, and short service, came into operation; in 1881 the existing 109 regiments and the rifle brigade were reorganised, forming 71 territorial regiments of the line, each regiment comprising usually 2 battalions of its own and linked battalions of the militia and volunteers. The army scheme of reorganisation introduced by Mr. Brodric, March 1901, increases the strength of the infantry and raises the number of militia. Marshal Soult (or marshal Bugeaud) said, "The British infantry is the finest in the world: happily there is not much of it." In 1905, 161,035; in 1909, 151,126 (53,940 stationed in India). Mounted infantry were largely and successfully employed in the operations of the war in S. Africa, 1899-1902.

**INFANT SCHOOLS** began in New Lanark, Scotland, in 1815; in London in 1818.

**INFANTS' RELIEF ACT**, passed 7 Aug. 1874, to amend the law relating to contracts made by persons under age.

The powers of wives and widows in respect to the care and training of their children were somewhat enlarged in 1880, more so in 1873, and very much more by a bill brought in by Mr. James Bryce, read a second time 26 March, 1884.

Guardianship of Infants Act passed, 1897.

**INFECTIOUS DISEASES**. By an act passed 30 Aug. 1889, notification of any person suffering from infectious disease is required to be given by the nearest relative or any person in charge, and also by the medical attendant to the medical officer of health of the district; extension of same act passed, 20 June, 1899. An act to prevent the spread of infectious disease was passed 4 Aug. 1890.

**INFIRMARIES**. Ancient Rome had no houses for the cure of the sick; diseased persons were carried to the temple of Æsculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 362; and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II. caused infirmaries

situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann*; see *Hospitals*. Parish workhouse infirmaries established, 1867.

**INFLUENZA**, a name given in Italy about 1741 to an epidemic febrile catarrh with variations, probably known to the ancients.

It prevailed in Europe in 1556, and has since frequently appeared, generally commencing in Russia and thence spreading over the continent. It appeared in Britain in 1762 and frequently since, especially in 1830-1, 1833, 1836-7, and 1847. It appeared at Paris in 1866-7, and at Berlin, 1874-5. In Oct. 1889, it was severe in St. Petersburg, and thence spread over Europe, reaching Great Britain, Canada and the United States, Jan. 1890, causing indirectly the deaths of several eminent persons. In the spring, the disease was severe in India and Australia. In 1892 the disease was severe in the west of the United States and in London and other parts of England, and also on the Continent. The disease reappeared in Jan. 1892, in much the same localities. In London the general mortality was much increased, all classes being attacked. The death of the duke of Clarence and Avondale, 14 Jan. 1892, was attributed to pneumonia following influenza. Reports of the epidemic of 1889-90, by Dr. Parsons, issued by government, 1891-3. Moderate outbreak in London, Feb. 1893, many cases autumn and winter, 1893-94; epidemic in London; prevalent in United Kingdom and on the continent, many deaths, Feb.-April, 1895. Epidemic in St. Petersburg and S. Russia, March, 1895. Epidemic in London and home counties, Jan., Feb. 1898; again rife in London and Paris, spring, 1899; again in London and other parts, Jan. 1900, and since.

**INFORMERS**, upon penal statutes, compounding with defendants without leave of the court, were punishable with fine and pillory, by 18 Eliz. c. 5 (1576). Their share of a penalty was regulated by 2 & 3 Vict. c. 71 (1839).

**INFUSORIA**, see *Animalcules*.

**INGESTRE HALL**, Staffordshire, destroyed by fire 12 Oct. 1882. It was built in 1676. Many valuable portraits, &c., were destroyed.

**INGOUR**, a river rising in the Caucasus and falling into the Black Sea. Omar Pasha, marching to the relief of Kars, crossed this river on 6 Nov. 1855, with 10,000 men, and attacked the Russians, 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

**INK**. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermillion and gum. **INDIAN INK** was brought from China, and must have been in use by the people of the east from the earliest ages. **INVISIBLE**, or **SYMPATHETIC INKS**, were known at early periods. Ovid (A.D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Peter Borel, in 1653, and by Le Mort, in 1669. *Beckmann*.

**INKERMANN** (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000) near the old fort of Inkermann, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded.

The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie, and Torrens, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkermann, and caused great loss of life.

**INNS OF COURT** (London) were established at different periods, in some degree as colleges for teaching the law. Annual revenue in 1872 said to be about 25,000*l.* See *Barristers*.

**INOCULATION**, see *Small Pox*. Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her son inoculated at Adrianople with success. She was allowed to have it first tried in England on seven condemned criminals, 1721; and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale, of London, inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. An inoculation hospital was established in 1746. *Vaccine* inoculation was introduced by Dr. Jenner, 21 Jan. 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. Inoculation was forbidden by law in 1840. Dr. A. E. Wright's typhoid vaccine elaborated in 1896, introduced in the army, reported, June, 1899; satisfactory results obtained at Ladysmith, 1899-1900, reported, 5 Sept. 1902; see also *Times*,

### INQUESTS, see *Coroner*.

**INQUISITION** or **HOLY OFFICE**. Previous to Constantine (306), heresy and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Priscillian was put to death in 384 by the emperor Maximus. Justinian decreed the doctrine of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death; the punishment being termed in Spain *auto-da-fé*, "an act of faith." In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX., in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gonalonier, 6 April, 1252, was canonized.

**INSECTS**. About 200,000 species known, Jan. 1877. An exhibition of these creatures, illustrating their structure, food, and habits, was opened in the gardens of the Tuileries, at Paris, 7 Sept., 1874; at the Westminster Aquarium, 9 March, 1878; and in the Zoological gardens, Regent's park, 1881. About 8,000 new species of insects named annually; total estimated 10,000,000 forms, 1902. See *Entomology*.

**INSOLVENCY.** The first insolvent act was passed in 1699, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years. Since then, the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l.*, might petition the court of bankruptcy, and propose compositions, and have *pro tem.* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bankruptcy act, the business of the insolvent debtors' court was transferred to the court of bankruptcy; and a number of imprisoned debtors were released in Nov. 1861. See *Bankrupts*.

**INSPIRATION.** The term used in theology, derived from the Vulgate translation of 2 Tim. iii. 16, to denote the influence of the Holy Spirit upon the mind of the writers of the Scriptures, "which makes these Scriptures the Word of God." Orthodox theologians all ascribe divine assistance to the writers of the books of the Old and the New Testaments, but differ as to its extent, degree, and mode of interpretation. To these are opposed the theologians of the more modern school, who hold that "the Bible is the book which contains the record of God's dealings with a chosen race, and through them with mankind . . . it is the book which contains the gospel of His Son and the lessons of salvation. It is not all of the same value, it is not all written on the same level . . . much of it is written from the imperfect moral and spiritual standpoint of times of ignorance." Others hold that the spirit, ideas, and doctrines of the Bible only are inspired, not the strict form or letter. Prior to the Reformation no definite Church doctrine existed on the subject of inspiration, nor is it a doctrine of the Roman Church. Calovius (1612-1686) advanced the theory, which became the accepted orthodox Protestant doctrine, "that nothing exists in the Scriptures which is not divinely suggested and inspired." This belief was expanded by the advocates of "plenary" inspiration, who asserted that every word, syllable, and letter of the Bible was inspired by God. See *Higher Criticism*.

**INSURANCE.** The origin of insurance is unknown; it has, on the authority of Suetonius, been ascribed to the emperor Claudius, A.D. 43. Marine insurance was in use in the beginning of the 15th century, and arose from the custom of merchants insuring their vessels and goods against

the perils of the sea. Growing out of this form of protection to property was the insurance of the life of the merchant, who usually accompanied the ship, and of the captain of the vessel, both being liable to capture by Moorish and Turkish pirates. The persons to whom the premium was paid were termed underwriters, who agreed to pay a fixed amount, the sum assured, if the person insured died within a year; the document specifying the contract was called the policy, the name it still bears. The premium charged appears to have been not less than 5 per cent. of the sum assured, irrespective of the age of the insurer. In 1574, Robert Chandler, under a patent granted to him by queen Elizabeth, established a chamber of insurance in London to regulate all contracts of insurance. This chamber was destroyed by the great fire of 1666. The earliest life policy of which particulars have been preserved was issued 15 June, 1583, at the "Office of Insurance, within the Royal Exchange, London." This policy gave rise to the first authenticated disputed claim. It provided that if a certain William Gybbons should die within twelve months the underwriters, thirteen in number, who guaranteed sums from 25*l.* to 50*l.* each, should pay to Richard Martin 383*l.* 6*s.* 8*d.*, the premium for which was 8 per cent. Gybbons died 28 May, 1584, and the underwriters refused to pay on the ground that he had survived twelve months of 28 days each. The commissioners appointed to determine such cases decided that the twelve months mentioned in the policy meant a calendar year, and ordered payment to be made by the underwriters; on appeal to the court of admiralty, the decision of the commissioners was upheld, 1587. Life insurance as a provision for a wife and children is mentioned in 1622. Policies as collateral security for money advanced for the purchase of appointments were much in vogue in the 17th and 18th centuries. The earliest known life insurance office, named the "Society of Assurance for Widows and Orphans," was established in 1699, and was of the nature of an assessment company; up to this date life insurances were underwritten. In principle it was to consist of 2,000 members, who were to contribute 5*s.* each on entry, to pay for the first claim, and the same sum on each subsequent death among the members, 500*l.* being thus provided for the widow and children. The society came to an end in 1712. "The Amicable" was started in 1705, and received its charter from queen Anne, 25 July, 1706; the number of its members was to be 2,000, each paying 10*s.* entrance fee, and an annual subscription of 6*l.* 4*s.* Amongst the representatives of those who died in the first year one-sixth of the contributions were to be divided; one-third the second year, and proportionately until in the fifth and all subsequent years five-sixths of the contributions were to be divided, the remainder, with all profits made by the sale of annuities, being accumulated as a reserve fund. In 1807, the contribution was made to vary with the age of entry. The Amicable existed as an independent institution until 1866, when it was transferred to the Norwich Union Life Insurance Society, its policies being finally merged, 30 June, 1886, with those of the Norwich Union. Numerous life offices of the assessment type came into existence shortly after the foundation of the Amicable, all of which, except the Amicable, collapsed at the bursting of the South Sea Bubble, 1720. The London Assurance Corporation and the Royal Exchange Assurance Corporation, chartered in 1720, received additional powers authorising them to transact life business; these two institutions are now the oldest life offices extant. The Equitable,

founded 1760, was the first life insurance office to transact its business on a scientific basis, by fixing the sum assured and the premium at the time of making the assurance, securing at death the payment of a definite sum, the rate of premium being regulated by the age at entry. Owing to the Northampton tables of mortality, which over-estimated the death-rate percentage, having been used as the basis of calculation, a surplus accumulated. After paying claims and expenses and providing a reserve fund, this sum was distributed among the assured, and is the origin of the system of *bonuses*. The practice of insuring lives as speculation was put down by the Gambling Act of 1774, which made it illegal to effect an insurance on the life of any person, unless the insurer had pecuniary interest in the life insured. In the 19th century the number of companies rapidly increased, reaching a total of 113 in 1870, insuring 329,000,000*l.*, under 638,000 policies, with funds against liabilities amounting to 92,000,000*l.*, with an annual premium income of 9,500,000*l.* The reckless amalgamation of companies prior to 1870 led to disastrous results in the case of the Albert and the European companies, the former of which absorbed 26, the latter 40 other offices; the Albert failing for 8,000,000*l.* The Life Assurance Companies Act, 1870, passed to protect the public against unsound companies, requires each office to publish a statement of its affairs in the form of an annual balance sheet, and a periodical valuation of its liabilities and assets; the sum of 20,000*l.* must also be deposited with the board of trade by every new company as a guarantee to its policy holders. A scheme for effecting life insurances through the medium of the post office was inaugurated in 1864, the amount insured being not less than 5*l.* nor more than 100*l.* for either sex between the ages of 14 and 65, and 5*l.* on children between 8 and 14 years. *Industrial* insurance is carried on to a large extent in life policies of small amount, the premiums varying from 3*d.* to 6*d.* per week; the Prudential, founded 1848, which has a very extensive business of this class, is the largest office of the kind, its funds exceeding 50,000,000*l.* An early attempt to *guarantee fidelity* of employes by insurance was made in 1720. The first fidelity office, The Guarantee Society, was established in 1840, the Provident Clerks Guarantee in 1865, the Law Guarantee and Trust in 1888. Among the developments of modern life assurance are endowment policies; policies at reduced and modified premiums; insurance without medical examination, instituted by the Sun Office in 1900, and since adopted by other companies; annuities; partnership policies; policies as trusts for married women in connection with the Married Women's Property Acts of 1870 and 1882, and the Married Women's Policies Insurance (Scotland) Act of 1880; insurances for special classes, as the Clergy Mutual, founded in 1829; the University, 1825; the Scottish Temperance, 1883; the United Kingdom Temperance, 1840; and the Abstainers and General, 1883, which grants special advantages to vegetarians. Insurance against *accident* has largely increased as a result of the Workmen's Compensation Acts, 1897 and 1900. The *coupon* system entitles persons travelling who possess copies of specified newspapers, diaries, railway guides, &c., containing accident coupons, to the payment of certain sums for injuries specified. *Special risks* are provided against by insurances effected with various offices, such as the National Burglary Insurance Company, 1892, which issues a combined burglary and fire policy, as well as special policies for licensed victuallers, cyclists, and the army; school epidemics can also be insured.

against in certain offices. The first *Mortality Table* was prepared by Halley, astronomer-royal of England, 1693; the first table of premiums used by the Equitable Society was prepared from the mortality of the year 1741 by John Dodson, author of the "Mathematical Repository," who, with Robert Simpson, was the founder of that society, which later adopted the "Northampton" tables, constructed by Dr. Price from statistics of the parish of All Saints, Northampton, from 1735-80. Joshua Milne, actuary to the Sun Office, constructed the "Carlisle" table, based on the population of the parishes of St. Mary and St. Cuthbert, Carlisle, in 1780 and 1787. The Equitable assurance table was compiled by Griffith Davies, F.R.S., 1825. In 1843, a committee of actuaries collected the data of 17 insurance companies, and published the result of their investigations in 1843. The Institute of Actuaries, founded in 1848 (incorporated by royal charter in 1854), published in 1869 a table compiled on the basis of the experience of 21 insurance companies; tables deduced from these results by Dr. Sprague were published in 1882. A vast business in life insurance is transacted in the *United States*, the Mutual Insurance Company of New York being the largest in the world. A feature in American insurance is the tontine system (*which see*), which is in extensive operation. Insurance offices are under state control, and are required to maintain a standard of solvency, the company being compelled to close if its assets are not sufficient to meet its liabilities according to the legal estimate. *Fire Insurance* appears to have had its origin in Anglo-Saxon times in connection with the guilds, the extant rules of some of these specifying that in consideration of certain contributions, the members guaranteed each other against loss by fire, water, robbery, and other contingencies. The oldest fire insurance in existence is the Sun, founded in 1710. See also *Lloyd's* and *Tontine*.

 was discovered by M. De Courtois, a manufacturer  
 of saltpetre at Paris in 1811, and investigated by

 rises in the form of a dense violet-coloured vapour,  
 easily evaporates, and melts at 220 degrees: it  
 changes vegetable blues to yellow, and a seven-  
 thousandth part converts water to a deep yellow  
 colour, and starch into a purple. Very valuable  
 medicinally.

 jected to Persia. It formed part of the dominions  
 of Alexander and his successors; was annexed to  
 the Roman empire, 133, and conquered by the  
 Turks.—Ionia was renowned for poets, historians,

"O'Flaherty, Keating, Toland, Kennedy, and other modern Irish historians, have rendered all uncertain, by deducing their history from the Deluge with as much assurance as they deliver the transactions of Ireland from St. Patrick's time."—Anderson.

About 40,000 persons were decorated in 1870-71.

**IRON CROWN** (of Italy), of gold and precious stones, set in a thin ring of iron, said to have been forged from a nail of Christ's cross, was made by order of Theudelinde for her husband, Agilulf, king of the Longobards, 561. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy; Napoleon I. at Milan, on 26 May, 1805; put it on his head, saying, "*Dieu me l'a donnée; gare à qui y touchera.*" (God has given it to me; woe to him who touches it.) M. de St. Mars himself always placed the dishes on his table, and stood in his presence.

**IRREDENTISTS**, see *Italia Irredenta*.

**IRRIGATION**, practised in the east and in Egypt from the most remote ages. It was strenuously advocated for India by sir A. Cotton and others at the Social Science Congress at Manchester, Oct. 1866. In 1865 acts were passed for utilising London sewage in the irrigation of grass land, and the results are said to be generally favourable. The subject was much discussed, Aug. 1873. A method of producing artificial rain from ponds by means of steam-power, patented by Isaac Brown, of Edinburgh, was tried by Mr. Coleman, at Stoke Park, and reported successful; see *Sewage*, and *Intermittent Filtration, Mairas* (1865), *Egypt. **IRVINGITES**, followers of Edward Irving,†

• The following conjectures have been made as to his identity:—An Antiochian patriarch (he is named from Constantinople) who died ten years before the mask; the duke of Vermandois, son of Louis XIV. reported to have provided in the camp before Denain, the duke of Beaufort, whose head is reported to have been taken off before Culloden; James duke of Montmouth, executed on Tower hill; a son of Arras of Austria, queen of Louis XIII., called by cardinal Mazarin as the duke of Buckingham; the twin brother of Louis XIV. (a conjecture received by Voltaire and others); Fouquet, an eminent statesman in the time of Louis XIV.; and a count Mathias, secretary of state to Charles III., duke of Mantua. M. Delort and the right hon. Agar Ellis (afterwards lord Dover) pronounced in favour of Mathias to have been the person. The mask, it seems, was not made of iron; but of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

† Edward Irving was born 11 Aug. 1792, and was educated as assistant to Dr. Chalmers at Glasgow, in 1810. In 1823 he attracted immense crowds of distinguished persons to his sermons at the Scotch church,

now called the "Holy Catholic Apostolic Church." They use a liturgy (framed in 1842, and enlarged 1853), and have church officers named apostles, angels, prophets, &c. In 1852 lighted candles were placed on the magnificent altar, and burning of incense during prayers was prescribed. The Gothic church in Gordon-square was solemnly opened 1 Jan. 1854. The following terms are often used with reference to certain periods in the history of Italian literature and art.

1. *Trecento* (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento."
  2. *Quattrocento* (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the 15th century. During this period Latin was revived, to the prejudice of Italian.
  3. *Cinquecento* (five hundred), from about 1480 to 1590. A sensuous style of art, founded on the heathen mythology, began to prevail.
  4. *Seicento* (six hundred), from 1590 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. *Seicentisti* is a term of reproach.
- The *Trecento* and *Cinquecento* were the most flourishing periods.

**ITALIAN REPUBLIC** was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte, president, Jan. 1802.

**ITALY**, a name mythically derived either from Italus, an early king, or *italus*, a bull calf. The invading Pelasgians from Greece, and the Aborigines (Umbrians, Oscans, and Etruscans), combined, form the Latin race, still possessing the southern part of Europe. The history of Italy is soon absorbed into that of Rome, founded 753 B.C. In the middle ages it was desolated by intestine wars and the interference of the German emperors; since then, Spain, France, and Germany struggled for the possession of the country, which has been divided among them several times. Spain, which predominated in Italy during the 16th and 17th centuries, yielded to the house of Austria at

the beginning of the 18th. The victories of Bonaparte in 1797 changed the government of Italy; but the Austrian rule was re-established at the peace in 1801. In 1814 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky; see *below*. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April, 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily was re-established, 17 March, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On 29 Oct. 1861, the internal government was re-organized; the 59 provinces were placed under prefects, subject to four directors-general. War with Austria was declared 20 June, 1866; and on 3 Oct., peace was signed at Vienna, and Venetia was ceded to Italy; see *below* for the events. The settlement of the kingdom of Italy was consummated by the occupation of Rome as the capital, 1870. Estimated population of the kingdom, 1862, 25,003,635 (Rome was added in 1870); 1878, 28,209,620; Jan. 1882, 28,452,639; 1902, 32,966,307; 1910 (est.), 34,275,250. ## J.

J was distinguished from I by the Dutch scholars of the 16th century, and introduced into the alphabet by Giles Beys, printer, of Paris, 1550. *Dufresnoy*.

**JACOBINS**, a name given to the Dominicans in France, because their first convent was the hospital of the pilgrims of St. James Jacobus, at Paris, at the request of pope Honorius III. (1216-27). The Jacobin club (first called "club Breton") consisted of about forty gentlemen and men of letters, who met in the hall of the Jacobin friars, at Paris, in Oct. 1789, to discuss political and other questions. Similar societies were instituted in all the principal towns of the kingdom. The club was closed 11 Nov. 1794.

**JACOBITES**, a Christian sect, so called from Jacob Baradaeus, a Syrian, about 541; see *Encyclopaedia*.—The partisans of James II. (Latin, Jacobus II.) were so named after his expulsion from England in 1688-9.

A sentimental revival of Jacobitism appeared in England in 1801, the "White Rose League" having been formed. The marquis de Rivaz and other members of the "Legitimist Jacobite League" were stopped in their attempt to place a large floral wreath on the tomb of Mary, queen of Scots, in Westminster Abbey, 3 Feb. 1802.

**JACOBUS**, a gold coin, so called from king James I. of England, in whose reign it was struck, 1603-25.

**JACQUARD LOOM**, for figured fabrics, invented by Joseph Marie Jacquard, of Lyons, and patented 23 Dec. 1801.

**JACQUERIE**, a term applied to bands of revolted peasants (headed by one Caillot, called Jacques Bonhomme), who ravaged France during the captivity of king John in 1358, and were quelled with much bloodshed. Similar insurrections occurred in Germany. One was termed the *Bundschuh*, from the large shoe especially worn by peasants, in 1502; and another termed the Bund (or league) of the Poor Conrad, 1514 and 1524, which also cost about 100,000 lives, and led to the insurrection of the anabaptists.

**JAFFA**, a seaport of Syria, celebrated in scripture as Joppa, whence Jonah embarked (about 862 B.C.), and where Peter raised Tabitha from the dead (A.D. 38); in mythology the place whence Perseus delivered Andromeda. Jaffa was taken by the caliph Omar, in 636; by the Crusaders, 1099; by Saladin, 1193; by Louis IX., 1252; and by Bonaparte, 7 March, 1799; the French were driven out by the British in June the same year. Here, according to sir Robert Wilson, were massacred 3800 prisoners by Bonaparte; but this is doubted. Jaffa suffered by an earthquake in Jan. 1837, when it is said that 13,000 persons were killed.

**JAGELLONS**, a dynasty which at times reigned over Lithuania, Poland, Hungary, and Bohemia, beginning with Jagellon, duke of Lithuania (husband of Hedwig, daughter of Louis of Hungary, 1384), who became king of Poland as Ladislas III. or V. in 1399, and ending with Sigismund II., who died in 1572.

**JAINS**, see *Jeynes*.

**JAMAICA**, a W. India island, discovered by Columbus, 3 May, 1494, and named St. Jago. Its horizontal name was Xaymaca, or "land of wood and water." It was conquered from the Spaniards by admiral Penn, with land forces commanded by Venables, 3 May, 1655, and settled soon after. Population in 1861, 13,816 whites; 81,074 coloured; 356,374 blacks; in 1881, 585,582; in 1910 (est.), 850,215. The victor (seventeen years of age), on account of his success here and at Moncontour, was chosen king of Poland.

**JASMINE** or **JESSAMINE** (*Jasminum officinale*), native of Persia, &c., was brought hither from Circassia, before 1548. The Catalonian jasmine came from the East Indies, in 1629, and the yellow Indian jasmine in 1656.

**JAVA**, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland by treaty in 1814, and given up in 1816. The English promoted free labour instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labour, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java led to warm discussions in the Dutch chamber in 1869.

Java has a great many volcanoes, and has frequently been devastated by eruptions and earthquakes; those

of 5 Jan. 1699, 31 Oct. 1876, and 10 June, 1877, were very destructive.

Java and neighbouring isles desolated by a series of violent eruptions from about two-thirds of its 46 volcanoes, beginning with Krakatoa, casting up immense quantities of lava, mud, ashes, and fragments of rocks, darkening the air for about 50 square miles. Mountains were split up, some disappeared, and many new craters were formed. Rumbling noises heard 25 Aug., violent eruptions of Krakatoa 26 Aug. There was much submarine disturbance, and an immense "tidal wave" destroyed Anjer and other places, 27 Aug. The lighthouses in the straits of Sunda were swallowed up, and new volcanic peaks appeared, rendering navigation highly dangerous. Loss of life estimated at 35,000, 25-28 Aug. Great atmospheric, oceanic, and electrical disturbances for thousands of square miles. See under *Sun*, 1883.

Serious volcanic outbreaks; great destruction; about 500 persons perish, early May, 1885.

The French were commanded at Jena by Napoleon, and at Auersstadt by Davoust: the Prussians by prince Hohenlohe at the former place, and the king of Prussia at the latter. The Prussians were defeated, losing nearly 20,000 killed and wounded, and nearly as many prisoners, and 200 field pieces; the French lost 14,000 men. Napoleon advanced to Berlin, and issued the Berlin decree (*which see*).

**JENKINS' EAR**. In 1731, an English merchant-vessel was boarded by a Spanish guardship, and the captain, Robert Jenkins, cruelly used, his wounded ear being torn off. He obtained no redress by appeal to his government. He appeared before parliament in 1738, when the convention of the Pardo was severely discussed, and war ensued. Jenkins' story was verified by Admiralty Records in 1889.

**JENNERIAN INSTITUTION**, founded 1803; Jenner society established at Gloucester (*which see*), 1896. Jenner celebration in Russia 6 Dec. 1896, see *Vaccination* and *Preventive Medicine*.

**JERSEY**. The chief island of the Channel archipelago (which includes Guernsey, Sark, Alderney, &c.), formerly held by the Romans in the 3rd and 4th centuries after Christ—Jersey being termed *Cæsarea*. The isles were captured by Rollo, and thus became an appanage of the duchy of Normandy, and were united to the crown of England by his descendant, William the Conqueror. The inhabitants of the Channel Islands preferred to remain subjects of king John, at the period of the conquest of Normandy by Philip Augustus, and while retaining the laws, customs, and (until lately) the language of their continental ancestors, have always remained firm in their allegiance to England. Almost every war with France has been characterised by an attack on Jersey, the most formidable of which, under the baron de Ruillecourt, was defeated by the English garrison and Jersey militia, commanded by major Pierson, 6 Jan. 1781. Jersey became a place of refuge for MM. Rouher, Baroche, Drouin de Lhuys, and other distinguished French imperialists, Sept. 1870. Some of the Trappists and other monks expelled from France, settle in Jersey, 1880-1. **JERVIS'S ACTS**, 11 & 12 Vict., cc. 42, 43 (1848), relate to legal proceedings against criminals.

**JESTER** is described as "a witty and jocose person, kept by princes to inform them of their faults, and of those of others, under the disguise of a waggish story." The office of jester existed in the 8th cent. in the East, and probably earlier in India. The famous caliph, Haroun-al-Raschid, had a jester, Bahallul, some of whose sayings have been preserved. Several of our kings, particularly the Tudors, kept jesters, among these Will Somers, the "fool" of Henry VIII. Rahere, the founder of St. Bartholomew's priory, West Smithfield, London, 1133, is said to have been a court jester and minstrel. There was a jester, Archie Armstrong, at court in the reigns of James I. and Charles I. who was deprived of his office for his jests on abp. Laud, but we hear of no licensed jester afterwards. The last private person to keep a jester is said to be lord Suffolk, whose "fool," Dicky Pierce, was buried at Berkeley, 1728.

**JESUIT PORCELAIN**, a Japanese porcelain of the 16th cent., now rare, which the jesuits in Japan caused to be decorated with Madonnas, images of saints, and various emblems of the Christian faith.

**JESUITS**. The society or company of Jesus was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonised. Having been wounded in both legs at the siege of Pampeluna, in 1521, he devoted himself to theology, and renounced the military for the ecclesiastical profession. He dedicated his life to the Blessed Virgin as her knight; made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris,

15 Aug. 1534. He presented his institutes, in 1539, to pope Paul III., who made many objections; but Ignatius adding to the vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, 27 Sept. 1540. The number of members was not to exceed sixty, but that restriction was taken off by another bull, 14 March, 1543; and popes Julius III., Pius V., and Gregory XIII. granted many privileges. Loyola died 31 July, 1556. Francis Xavier, and other missionaries, the first brethren, carried the order to the extremities of the habitable globe, but it met with great opposition in Europe, particularly in Paris; see *Paraguay* and *Jansenists*. The order still exists in many European states contrary to the laws.

**JESUIT'S BARK**, called by the Spaniards fever-wood, from the cinchona or chinchona tree, discovered, it is said, by a Jesuit, about 1535 (and used by the order). Its virtues were not generally known till 1633, or 1638, when the wife of the viceroy at Peru, the countess of Chincon, was cured of a fever by this drug, hence termed *pulvis comitissa*. She brought it to Europe in 1639. It was sold at one period for its weight in silver, and was introduced into France in 1649; and is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680, and sir Hans Sloane introduced it here about

1700. The cinchona plant thrives in India, Jamaica, New Zealand, and other places. See *Quinine*.

**JESUS CHRIST**, the SAVIOUR OF THE WORLD. 1 Tim. iii. 16. The following dates given in the English bible have been much controverted, and others have been proposed by various chronologers, as Hales and Clinton, and others (see *Nativity* and *Crucifixion*). The birth of Christ is dated, 4 B.C.; his baptism and first ministry, 26 A.D.; his crucifixion, resurrection, and ascension, 29 A.D.

The divinity of Christ, denied by the Arians, was affirmed by the council of Nice . . . 325

**JEU DE PAUME** (the tennis court). The king having closed the hall of the assembly at Versailles, the third estate (*tiers-état*) met here, and swore not to dissolve till a constitution was established, 20 June, 1789. (It is the subject of a painting by David.) Commemorated 20 June, 1883.

**JEUNESSE DOREE**, "gilded youth," a party name applied during the French revolution to certain young Parisians who sought to bring about the reaction or counter-revolution after the fall of Robespierre, 27 July, 1794. Called also *petits-maitres*, "elegants," and *mousselines*, "scented darlings." The term *jeunesse dorée* now designates fashionable young men who dress in elegant style, and spend their lives in luxury and pleasure.

**JEWELLERY** was received by Rebekah as a marriage gift, 1857 B.C. (*Gen.* xxiv. 53). Phlyx the elder says he saw Lollia Paulina (wife of Caius Cæsar, and afterwards Caligula) wearing ornaments valued at a sum equal to 322,916*l.* sterling. Jewels were worn in France by Agnes Sorel in 1434, and encouraged in England about 1685. The standard of gold for jewellery, except wedding rings, was lowered by parliament in 1854. See *Gems*.

**JEWISH ERA AND CALENDAR**. The Jews usually employed the era of the Seleucidae until the 15th century, when a new mode of computing was adopted. They date from the creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years. The Jewish year consists of either twelve or thirteen months, of 29 or 30 days. The civil year commences with the month Tisri, immediately after the new moon following the autumnal equinox; the ecclesiastical year begins with Nisan.

Then West London Synagogue in Bepton street, opened 1 Jan. 1841; removed to Morgan street, Bepton street, 1841; succeeded by a magnificent synagogue in Upper Berkeley street, constructed.

The Reformed Jews recognise the authority of the Old Testament or written law only, and reject the oral law embodied in the Talmud, which is accepted by the Orthodox or Rabbinitical Jews.

**JEW'S HARP** (probably Jews' harp), an ancient instrument. Charles Eulenstein produced remarkable effects with Jews' harps at the Royal Institution, London, 15 Feb. 1828.

**JEYNES or JAINS**, a sect of Buddhists, in India, dating from the 6th century. They do not recognise a creator, but believe matter to be eternal, and refrain from destroying life, considering animals to be sacred.

Their discipline is very strict; trial for defamation of character by a trial, assessing certain members of breaking the laws of caste, lasted 34 days at Murchisland, and most of the cases were reported. The verdict was for the defendants.

March, 1881

**JEYPOOR**, one of the four principal Rajpoot states of India, tributary to the British. The new capital, Jeypoor, termed the Paris of India, was built in the last century. The Maharajah, friendly to the British, by whom he was supported, died in Sept. 1880; he nominated a successor, installed 30 Sept. 1880. Area, about 15,575 sq. miles. Pop. 1901, 2,658,075.

**JEZREELITES**, New and Latter House of Israel, was founded by James Jershom Jezreel (James White), who claimed that he was a messenger sent from God, whose revelations revealed to him are recorded in "The Flying Roll." White died in 1885. The Jezreelites asserted that the Gospel is sufficient for the salvation of the soul, but for the salvation of the body the Law must be added, and that when Christ comes to reign for His millennium, He will be greeted by the 144,000 (Rev. vii., 5-8), who will be endowed with immortal bodies, to which chosen band the Jezreelites claimed to belong. Jezreel's widow, "Queen Esther," died in 1888; since then the sect has become almost extinct. Their headquarters were at Gillingham, near Chatham.

**JIDDAH**. See *Jedda*.

**JIHAD**, or religious warfare against unbelievers, although inculcated in the Mohammedan law, was prohibited by the Sheeahs, and only permitted by the Sunnites in some cases; certainly not with any nation with whom they had made a treaty of peace. The Jihad was preached by fanatics in India in 1871, and prohibited by government.

**JOAN OF ARC**, the maid of Orleans, born at Domremy, imagined that she had a divine commission to expel the English, who under the earl of Salisbury were besieging Orleans. Charles VII. entrusted her with the command of some French troops, and she raised the siege, and entered Orleans with supplies, 29 April, 1429; and the English, who were before the place from 12 Oct. preceding, abandoned the enterprise 8 May following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, 18 June, 1429. She was wounded several times herself, but never shed any blood with her own hand. She was taken at the siege of Compiègne, 25 May, 1430; and, after a trial, burnt for a witch at Rouen, 30 May, 1431. A statue of Joan of Arc, the work of the late princess Marie of France, was inaugurated at Orleans, 13 Sept. 1851, and the 435th anniversary of the deliverance of the city was celebrated there on 14 May, 1865. The anniversary of her death celebrated, 30 May, 1878. See *Patay*. Her statue at Beaurvoir unveiled 9 Aug.; at Domremy 26 Aug. 1891; at Chinon, 14 Aug. 1893; at Rheims, 15 July, 1896; at St. Pierre-le-Moutier, 24 Aug. 1902. **JOCKEY CLUB**. See *Races*.

**JOHANNESBURG**, the chief town and mining centre of the Transvaal. It has its origin as the site selected for a town, 1887, after the proclamation by the Transvaal government opening certain farms on the reef of Witwatersrand as public goldfields, 1886. Since then Johannesburg has rapidly developed, a handsome stock exchange and other public buildings having been erected. In 1895-6 it was the centre of the agitation to obtain political and other rights from the Boers, and here the Jameson raid of Jan. 1896 was organised, leading to the S. African war (*which see*, and *Transvaal*, 1887, *et seq.*) of 1895-92. Part of the town was destroyed by a dynamite explosion in 1896. Population 1910 (est.), 171,800.

Another journal of the same title appeared in June, 1906.

"**JOHN COMPANY**," a name formerly given to the East India company, was sometimes given to the South Africa company, 1891. See *Zambesi*.

**JOHN DOE AND RICHARD ROE**, names well known, as standing pledges for the prosecution of suits. In early times real and substantial persons were required to pledge themselves to answer to the crown for an amercement or fine set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it;

and in 1285, 13 Edw. I., sheriffs and bailiffs were, before they made deliverance of the distress, to receive pledges for pursuing the suit, and for the return of the property, if return were awarded. But this becoming a matter of form, the fictitious names of Doe and Roe were used until the form was declared to be no longer necessary by the Common Law Procedure Act, 1852.

**JOHN O'GROAT'S HOUSE**, an ancient house formerly situated on Duncan's Bay Head, the most northerly point of Great Britain, deriving its name from John of Groat, or Groot, and his brothers, originally from Holland, said to have settled here about 1489.

The house was of an octagon shape, being one room, with eight windows and eight doors, to admit eight members of the family, the heads of different branches of it, to prevent their quarrels for precedence at table. Each came in by this contrivance at his own door, and sat at an octagon table, at which, of course, there was no chief place or head.

*St. John's Night*, or Midsummer eve, 23 June: bonfires are still made in Ireland, and in some parts of England, and thought to be the relic of a pagan custom—resembling the Phœnician worship of Baal.

**THE KNIGHTS OF ST. JOHN** (*Johanniter Ritter*), a Lutheran order of high rank, formed by Frederick William III. of Prussia, 23 May, 1812, and reorganised 15 Oct. 1832. These knights co-operated with the knights of St. John of Malta and various other bodies in rendering energetic assistance to the wounded during the Franco-Prussian war, in 1870-1; the chief office being at the ancient gate of the priory of St. John, Clerkenwell, London, E.C.

The Russian and English orders claim connection with the original institution at Malta as two of its *langues*.

*The St. John Ambulance Association*, founded and established by the Order of St. John of Jerusalem in 1877: its objects are—1. The dissemination of instruction in "first aid," i.e., the preliminary treatment of the sick and injured *pending the doctor's arrival*; 2. lectures to women on home nursing and hygiene; 3. the deposit in appropriate localities of material (such as stretchers, hampers, splints, bandages, &c.) for use in case of accident; 4. the development of ambulance corps for the transport of the sick and injured. Upwards of 250 administrative "centres" and some thousands of "detached classes" have been formed in all parts of the United Kingdom, India, the colonies, and elsewhere abroad, and over 100,000 certificates of proficiency have been awarded. Sir Edmund A. H. Lechmere, bart., M.P., chairman; John Furley, esq., honorary director of stores and manager of transport department; major sir Herbert C. Perrott, bart., chief secretary. **JUGGERNAUT**, correctly *Jugganúth*, or "Lord of the World," one of the incarnations of Krishna, is an idol formed of an irregular pyramidal black stone, with two rich diamonds to represent eyes; the nose and mouth are painted vermilion. The number of pilgrims that visit the god is stated at 1,200,000 annually. Formerly some were crushed by the wheels of the car (so lately as Aug. 1864); a great many never returned, and, to the distance of fifty miles, the way was strewn with human bones. The temple of Juggernaut has existed about 800 years. The state allowance to the temple was suspended by the Indian government in June, 1851. The festival was kept, June, 1872. Twelve persons were said to be killed by accident, Aug. 1873. The festival of 1878 reported a failure.

**JUGURTHINE WAR**. Jugurtha murdered his cousin, Hiempsal, king of Numidia, and usurped his throne, 118 B.C. He gave Adherbal a share in the government, but killed him in 112. He then provoked the Romans to war. Cæcilius Metellus was first sent against him, and defeated him in two battles; and Marius brought him in chains to Rome to adorn his triumph, 106 B.C., where he was put to death in 104. This war has been celebrated by the pen of Sallust.

**JULIAN ERA and YEAR**, see *Calendar*. *Julian period* (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714.

#### JULIAN PERIOD (YEAR OF)

1907 . . . . .	6620	1910 . . . . .	6623
1908 . . . . .	6621	1911 . . . . .	6624
1909 . . . . .	6622		

**JULIERS**, a Prussian province; made a duchy in 1356; became the subject of contention on the extinction of the ruling family in 1609; was allotted to Neuburg in 1659; seized by the French in 1794; and ceded to Prussia in 1815.

**JULY**, the seventh, originally fifth, Roman month, named by Marc Antony from *Julius* Caesar, the dictator of Rome, who was born in it.

The early part of July, 1838, was very cold; many thunderstorms, followed by destructive floods in the latter part. See *Inundations*.  
*July Resolutions*. See *France*, 1870.

**JUNE**, originally the fourth, now the sixth month, owes its name to *Junius*, which some derive from *Juno*, and others from *Juniors*, this being the month for the young, as May was for aged persons. Ovid, in his *Fæsti*, introduces Juno as claiming this month. "Glorious 1st of June;" see *Ushant*.

**JUNG RIVER**, West Africa. Natives chastised for outrage on Mr. Laborde, envoy, and others, by gen. Havelock, governor of Sierra Leone, May, 1882.

**JUNIUS'S LETTERS** began in the *Public Advertiser*, 21 Jan. 1769.

They have been ascribed to Mr. E. Burke, Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), serjeant Adair, the rev. J. Rosenhagen, John Roberts, Charles Lloyd, Samuel Dyer, general Lee, the duke of Portland, Hugh Boyd, lord George Sackville, earl Temple, and sir Philip Francis. The last-named is generally considered to have been the author. Junius said, "I am the depositary of my own secret, and it shall perish with me." The work of Mr. Chabot and hon. E. T. B. Twissleton was considered decisive of sir Philip Francis being Junius, May, 1871. "Junius is as much unknown as ever." — *Athenæum*, 8 Sept. 1888. Sale of manuscript papers of sir Philip Francis, reported to be inconclusive respecting "Junius," June, 1892; the sir Philip Francis correspondence sold for 430*l.* 2*s.* 6*d.* 27 Nov. 1897. Mr. Charles Knight in his description of the letters in his "Popular History of England," 1860, asserts that they abound in gross exaggeration and venomous abuse. Mr. H. R. Francis, in his "Junius Revealed," published March, 1864, maintains that his grandfather (Sir Philip) was Junius. The *Athenæum* (17, 24 March, 1894, and Mr. Fraser Rae, in 6 papers, 19 Feb. 1898) consider the book unsatisfactory.

**JUNKER PARTY** (*Junker*, German for *young noble*), a term applied to the aristocratic party in Prussia, which came into power under Otto von Bismarck-Schönhausen, appointed prime minister, 9 Oct. 1862. Their political organ is the *Kreuz-Zeitung*.

**JUNO**, the planet discovered by M. Harding, of Lillenthal near Bremen, 1 Sept. 1804. Its distance from the sun is 254 millions of miles, and it accomplishes its revolution in four years and 128 days, at the rate of nearly 42,000 miles an hour.

**JUNONIA**, festivals in honour of Juno (the Greek *Hera*, or *Hērē*) at Rome, and instituted 431 B.C.

**JUNTA**. The Spanish provincial juntas or councils declared against the French in 1808, and incited the people to insurrection.

**JUNTO**, a name given to the leaders of the whig party in the reigns of William III. and Anne (1689-1714); the chiefs were admiral Edward Russell, John Summers, Charles Montague, and Thomas Warton.

**JUPITER**, known as a planet to the Chaldeans. The discovery of the satellites, incorrectly attributed to Simon Mayr (Marius) in 1609, was made by Galileo on 8 Jan. 1610; see *Planets*. **JUPITER'S** moons were all invisible on 21 Aug. 1867; a very rare occurrence. A fifth very small satellite was discovered by Mr. Barnard at the Lick observatory, 9 Sept. 1892. Dark spots observed, 1901-2. Sixth satellite discovered at Lick observatory by means of the Crossley reflector, 6 Jan. 1905, another the 7th, at the same observatory by Mr. Perrino, assistant-astronomer, 28 Feb. 1905.—**JUPITER AMMON'S** temple in Libya was visited by Alexander, 332 B.C. Cambyses' army sent against it perished miserably, 525 B.C. The Greek Zeus was the Roman Jupiter, contracted from *Diovis pater*, the father of Heaven.

**JURIDICAL SOCIETY** was established in Feb. 1855, and opened with an address by sir R. Bethell on 12 May following.

**JURIES**. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates real and personal, for false verdicts. *Lambard*. By most authorities their institution is ascribed to Alfred about 886, which is not historical. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat. 28 Edw. III. 1353. By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. A new act respecting juries, regulating their payment, &c., was passed 9 Aug. 1870. The clause respecting their payment was rescinded by act passed 28 Feb. 1871. Laws respecting juries in Ireland amended, 14 Aug. 1871. New Juries bill brought in by the attorney-general, sir John Coleridge, Feb. 1873. Special juries bill passed, May, 1898. Juries are sum-

moned to assist the coroner in investigating the causes of sudden or violent death.—**GRAND JURIES** (of not less than 12 or more than 23 persons) decide whether sufficient evidence is adduced to put the accused on trial.—The constitution of 1791 established the trial by jury in France.—An imperial decree abolished trial by jury throughout the Austrian empire, 15 Jan. 1852.—Trial by jury began in Russia, 8 Aug. 1866; in Spain, 1889.—A true bill for libel granted against alderman sir F. Truscott in his absence, who was honourably acquitted, 18 Sept. 1879.

**COERCION OF JURIES**.—It is said that in early times the suitors used to feed the jury empanelled in their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or fire, candle light excepted, till they are unanimous.—Some jurors have been fined for having fruit in their pockets, when they were withdrawn to consider of their verdict, though they did not eat it. *Leon Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, 9 Oct. 1791. *Phillips*. In Scotland, Guernsey, Jersey, and France, juries decide by a majority; in France, since 1831, a majority of two-thirds is required.

**"JUSTE MILIEU"** (moderation and conciliation to parties), according to Louis-Philippe (in 1830), is the only principle of government which can secure the welfare of France.

**JUSTICE GENERAL, LORD**, Scotland, see *Court of Session*.

**JUSTICES OF THE PEACE** are unpaid local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority. They were first nominated by William I. in 1076. *Stow*. Persons termed conservators of the peace in each county were appointed by 1 Edw. III. c. 2, 1327; and their duties were defined in 1360. The form of a commission of the peace settled by the judges, 23 Eliz. 1580. *Hawkins*; see *Eyre*.

**JUSTICES, LORDS**, were appointed by English sovereigns to govern during their absence; especially by William III., George I. and George II. (1695-1760). George III. never left England. In Sept. 1821, when George IV. went to Hanover, lords justices were appointed, the duke of York being the first. No such appointment was made during the reign of queen Victoria, it having been decided by the law authorities in 1843 to be unnecessary when the queen went to France. Ireland is always ruled by lords justices when the lord-lieutenant is out of the country, or his office is vacant.—Two lords justices of the court of appeal in chancery, having rank next after the chief baron of the exchequer, were appointed from 1 Oct. 1851, salary 6000*l*. For recent changes see *Appeal and King's Bench*.

**JUSTICIARS.** In ancient times the kings of England used to hear and determine causes; but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges. The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy. After the Norman conquest, the person invested with that power had the style of *Capitalis Justicia*, or *Justiciarius Angliæ*. These judges continued until the erection of the courts of king's bench and the common pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067; and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III.). Authorities vary.

**JUSTINIAN CODE** compiled by a commission appointed by the emperor Justinian I. Feb. 528, wherein was written what may be termed the statute law (scattered through 2000 volumes reduced to fifty). It was promulgated, April, 529. To this code Justinian added the Digest or *Pandects*, the *Institutes*, and *Novels*, promulgated 16 Nov. 534. These compilations have since been called, collectively, the body of civil law (*Corpus Juris Civilis*).

In 1853, 275,578 cwt.; in 1861, 904,092 cwt.; in 1871, 3,454,120 cwt.; in 1881, 4,928,805 cwt.; in 1887, 327,221 tons, of undressed jute were imported into the United Kingdom; in 1888, 313,828 tons; 1896, 340,649 tons; 1900, 280,919 tons; 1904, 306,433 tons; 1906, 369,789 tons; 1908, 354,028 tons.

An act for their committal to reformatories was passed in 1854. Another act passed, 1901. Children's Act (1908) establishes separate courts for offenders under 16. See *Children 1908*.

In 1855 it was defended by general Fenwick Williams, with 15,000 men, and with three months' provisions and three days' ammunition, against the Russian general Mouravieff, with an army of 30,000 infantry and 10,000 cavalry. The siege lasted from 18 June to 28 Nov. 1855. The sufferings of the garrison were very great from cholera and want of food. The Russians made a grand assault on 29 Sept. but were repulsed with the loss of above 6000 men, and the garrison were overcome by famine alone. *Sandewith*. Kars was restored to Turkey, Aug. 1856.

On accepting general Williams' proposal for surrendering, general Mouravieff said: "General Williams, you have made yourself a name in history; and posterity will stand amazed at the endurance, the courage, and the discipline which this name has called forth in the defence of an attack. I am offering a capitulation that will satisfy the demands of war, without disgracing humanity." **KEEPER OF THE KING'S CONSCIENCE.** The early chancellors were priests, and out of their supposed moral control of the king's mind grew the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common law courts afford no redress. The keeper of the king's conscience is therefore now the officer who presides in the court of chancery; see *Chancellor* and *Lord Keeper*.

**KEEPER (LORD) OF THE GREAT SEAL OF ENGLAND** differed only from the lord chancellor in that the latter had letters patent, whereas the lord keeper had none. Richard, a chaplain, is said to have been the first keeper under Ranulph, in 1116. Foss says that the distinction between the two offices was made 1232. The two offices were made one by 5 Eliz. 1563. *Cowell*; see *Chancellor*. The office of lord keeper of the great seal of SCOTLAND was established in 1708, after the union.

His entertainment of the queen commenced 19 July, 1575, and cost the earl daily 1000*l*.

After the battle of Evesham and defeat and death of Simon de Montfort, by Prince Edward (afterwards Edward I.) 1265, Montfort's younger son, Simon, shut himself up in Kenilworth castle, which sustained a siege for six months against the royal forces of Henry III., to whom it at length surrendered. **KING-OF-ARMS**: three for England,—Garter, Clarenceux, and Norroy; Lyon king-at-arms for Scotland, and Ulster for Ireland. These offices are very ancient: Clarenceux is so named from Lionel, third son of Edward III., the sovereign who founded the order of the Garter; see *Garter*. Lionel having by his wife the honour of Clare, was made duke of Clarence; which dukedom afterwards escheating to Edward IV., he revived the office of Clarence king-at-arms. The office of Bath king-of-arms, created in 1725, was changed to Gloucester king-of-arms, 14 June, 1726. Ulster was substituted, it is said, in lieu of Ireland king-of-arms, by Edward VI., 1553; but the monarch himself named it as a new institution.

**KING'S ADVOCATE**, a title of the Lord Advocate for Scotland. First appointed by James III. about 1480. King's Advocate was first entitled *Lord Advocate* in 1568. See under *Advocate*.

**KING'S BENCH**, or **QUEEN'S BENCH**, **COURT OF**, obtained its name from the king sometimes sitting here on a high bench, and the judges, to whom the judicature belongs in his absence, on a low bench at his feet. This court in ancient times was called *Curia Domini Regis*. The court of queen's bench sat for the last time, July, 1875, (see *Supreme Court*). Chief justice Cockburn received the freedom of London, 9 March, 1876; said to be the first case of the kind. The Queen's Bench Division of the high court of justice till 1881 consisted of the chief justice of England and four judges. The chief justice of the king's bench division is now chief justice of England; the exchequer and common pleas division were abolished in 1881.

**KING'S BENCH PRISON** (Southwark), near the site of one of the oldest prisons of London, long used for the confinement of debtors. Here, it is said, prince Henry (afterwards Henry V.) was committed by Justice Gascoigne. The prison was burnt down by the London rioters, 7 June, 1780; see *Gordon's No-Popery Riots*. It was rebuilt in 1781, and contained about 230 rooms. Formerly, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included St. George's Fields, &c. A consequence of the Bankruptcy act, 1861, was the release of many insolvent debtors; and an act was passed

in 1862 "for discontinuing the queen's prison and removal of the prisoners to Whitecross-street prison." The buildings, used as a military prison, were pulled down and the site sold, 1879-80.

**KING'S BOOK**, or "*Valor Ecclesiasticus* temp. Henrici VIII." the return of the commissioners appointed in 1534 to value the first fruits and tenths granted to the king.

**KING'S BOUNTY**, an annual grant of 1000*l.* for the Maunday royal alms distributed by the lord high almoner, began early in the reign of George III. and continued till 10 George IV. 1829. See *Maunday*.

**KING'S COLLEGES**, see *Aberdeen* and *Cambridge*. King's College, London, incorporated 14 Aug. 1829, and opened 8 Oct. 1831. It was incorporated with the university of London in 1837. The hospital was founded in 1839. The dining-hall and kitchen fell in, through drainage, 8 a.m., 6 Dec. 1869; no lives were lost. In consequence of the withdrawal of the government grant, on account of denominational tests, the council of the college issues an appeal to the public for additional funds (50,000*l.*), 24 Jan. 1891: new buildings of the school at Wimbledon opened by the duke of Cambridge, 6 July, 1899. The Christian Knowledge Society votes 5,000*l.*, payable in instalments, 4 Dec. 1894. The government annual grant of 1,700*l.* was restored irrespective of tests, 1 April, 1896. New laboratories opened by lord Lister, 30 Oct. 1900. The council passes a resolution (22-2) abolishing religious tests, theology excepted, 13 June, 1902; an appeal for endowment issued at a meeting, 19 Nov. 1902. Rev. A. C. Headlam, principal (April 1903), in succession to Dr. Robertson, consecrated bp. of Exeter. *Department for Women* is conducted in Kensington-square; certificates of proficiency are granted on passing the examinations. These are also in connection with King's College. *Evening Classes* in each faculty; certificates are granted to successful students. The *Civil Service Department* prepares students for the army and navy, civil service and other examinations, and for commercial life.

The removal of King's College hospital from Portugal-street having been decided upon by the council, the hon. W. F. D. Smith, M.P., gives the site for the new building at Denmark-hill. Donations to the removal fund: Annie Zunz fund, 200*l.*, reported . . . . . 22 Dec. 1903.

**KING'S COUNSEL**, the first under the degree of serjeant was sir Francis Bacon, made so, *honoris causa*, without patent or fee, in 1604, by James I. The first modern king's counsel was sir Francis North, afterwards lord keeper, in 1663.

**KING'S COUNTY** (Ireland), formed out of confiscated property, and so named from Philip, king of Spain, the husband of queen Mary of England, in 1556.

**KING'S CROSS MARKET**, N. London, opened 7 Aug. 1868; did not succeed.

**KINGSDOWN'S ACT**, 24 & 25 Vict. c. 114 (1861), relates to wills.

**KING'S EVIL** (scrofula), formerly supposed to be cured by the king's touch; the first being Edward the Confessor, in 1058. In the reign of Charles II. 92,107 persons were touched; and, according to Wiseman, the king's physician, they were nearly all cured! Queen Anne officially an-

nounced in the *London Gazette*, 12 March, 1712, her intention to touch publicly. The custom was dropped by George I., 1714.

**KING'S LYNN**, see *Lynn Regis*.

**KING'S PROCTOR**, the name formerly given to a class of practitioners in the Admiralty and Ecclesiastical courts. The king's proctor is the official, now the solicitor to the treasury, who intervenes to oppose a petition for divorce if collusion or fraud are suspected.

**KING'S REMEMBRANCER**, see *Ecchequer, Court of*.

**KING'S SPEECH**. The first from the throne is said to have been by Henry I., 1107.

**KING'S THEATRE**, see *Opera-house*.

**KINGSTON**, see *Hull*.—**KINGSTON**, Jamaica, was founded in 1693, after the great earthquake in 1692 which destroyed Port Royal; it was constituted a city, 1802. An awful fire here ravaged a vast portion of the town, and consumed 500,000*l.* of property, 8 Feb. 1782; another fire in 1843; another great fire; town nearly destroyed; estimated loss about 3,000,000*l.*, 5 deaths announced, 11 Dec. 1882. See *Mansion House*. The bishopric was established in 1856. The city destroyed by an earthquake, 14 Jan. 1907; see *Jamaica*.

**KINGSTON-ON-THAMES**, Surrey, a municipal borough 12 miles from London. The town is of ancient origin and figures conspicuously in English history. Here was held the great council convened by Egbert, king of Wessex, and his son Ethelbert, 838. The coronation stone still standing near the market place records the crowning of seven of the Anglo-Saxon kings, from Edward the Elder to Ethelred II. King John granted a charter to the town, which he frequently visited, 1204-1215. Kingston castle, now demolished, was taken by Hen. III. in 1264 during the civil war with Simon de Montfort. The town in 1647 was the headquarters of Fairfax in the civil war, 1642-1660. Gay's "Kitty," duchess of Queensberry, resided in the neighbourhood at Ham Common. The parish church contains some fine monuments: William Coxo the historian was once the rector. County council buildings were erected at the cost of 36,000*l.* in 1890. Population 1801, 4,438; 1901, 34,375; 1910 (est.), 37,812.

Canon Hook consecrated the first bishop suffragan of Kingston, 22 Oct. 1825.  
Electric tramways formally opened, 1 March 1906.

**KINGSTON TRIAL**. The duchess of Kingston was arraigned before the lords in Westminster-hall, on a charge of bigamy, having married first, capt. Hervey, earl of Bristol, and next, during his lifetime, Eveylin Pierrepont, duke of Kingston, 15-22 April, 1776. She was found guilty, but, on pleading the privilege of peerage, the punishment of burning in the hand was remitted, and she was discharged on paying the fees.

**KINGSTOWN** (Dublin). The harbour here was commenced in June, 1817. The name was changed from Dunleary in compliment to George IV., who here embarked for England at the close of his visit to Ireland, 3 Sept. 1821. Kingstown railway from Dublin opened 17 Dec. 1834.

**KIOTO**, see *Kyōto*.

**KIRBEKAN**, BATTLE OF, see *Soudan*, 10 Feb. 1885.

**KIRKDALE CAVE**, see *Geology* (Buckland).

**KISHINEFF MASSACRES**, see *Russia* 19, 20 April, 1903.

**KISSING** the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, 1 *Samuel* x. 1, &c. The "kiss of charity," or "holy kiss," commanded in the Scriptures (*Romans* xvi. 16, &c.), was observed by the early Christians, and is still recognised by the Greek church and some others. Kissing the pope's foot (or the cross on his slipper) began with Adrian I. or Leo III. at the close of the 8th century. Kissing the Book in giving evidence on oath superseded by the Oaths Act, 1909.

**KIT-KAT CLUB**, of above thirty noblemen and gentlemen, instituted in 1703, to promote the Protestant succession. The duke of Marlborough, sir R. Walpole, Addison, Steele, and Dr. Garth were members. It took its name from its dining at the house of Christopher Kat, a pastry-cook in King-street, Westminster.

**KITT'S**, see *Christopher's, St.*

**KLADDERADATSCH**, the German "*Punch*," first published in Berlin, by Albert Hoffmann, the proprietor; originally a bookseller's assistant. He amassed a fortune, and died 10 Aug. 1880, aged 62.

**KLONDIKE GOLDFIELDS**, see *Canada*, 1897, *et seq.*

**KNEELING**. The knee was ordered to be bent at the name of Jesus (see *Philippians* ii. 10), about the year 1275, by the order of the pope. The ceremony of a vassal kneeling to his lord is said to have begun in the 8th century.

**KNIGHTS**. The word knight is derived from the Saxon *Cniht*, a servant (i.e., servant to the king, &c.). The institution of the Roman knights (*Equites* or horsemen, from *equus*, a horse), is ascribed to Romulus, about 750 B.C., when the curiæ elected 300. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon heptarchy: The first knight made by the sovereign with the sword of state was Athelstane, by Alfred, A.D. 900. *Spelman*. The custom of ecclesiastics conferring the honour of knighthood was suppressed in a synod held at Westminster in 1100. *Ashmole's Institutes*. *Salmon*. (On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. See *Banneret, Chivalry, Tournaments, Holy Sepulchre, John, and Michael*.

**FEMALE KNIGHTS.** It is said that the first were the women who preserved Tortosa from the Moors in 1149, by their stout resistance. Large immunities were granted to the women and their descendants. Several female orders appear in the preceding list. Ladies have been admitted to several male orders.

**KNIGHTS OF GLYN and KERRY in IRELAND.** The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the 13th century. The 19th knight of Kerry died 6th Aug. 1880.

**KNIGHTS OF THE SHIRE, or OF PARLIAMENT;** summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort, in 1258, and in a more formal manner, 20 Jan. 1265. There are writs extant as far back as 11 Edward I., 1283. The knights are still girded with a sword when elected, as the writ prescribes.

**KNIGHTS OF LABOUR.** A large secret trade union in the United States, said to have been originated by a man named Uriah Stevens in Philadelphia in 1869, for protection of workmen against capitalists. They were energetic in the promotion of railway and other strikes, especially in Missouri in March, 1886. Headquarters at Philadelphia, number about 400,000, May, 1886. The society is condemned by the pope, Decline of the order reported Aug. 1888; active in Aug. 1890. *Knights of Industry* active in regard to strikes, 1893.

**KNIVES.** In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries; Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made fine knives, &c.; and that he obtained a prohibition of foreign ones, 1563. Clasp or spring knives became common about 1650; coming originally from Flanders.—*Knife-cleaning machines* were patented by Mr. George Kent in 1844 and 1852; others have been invented, by Masters, Price, &c.; *see Forks*.

**KNOW-NOTHINGS,** a society which arose in 1853, in the United States of N. America. Their principles were embodied in the following propositions (at New York, 1855).

1. The Americans shall rule America.
2. The Union of these States.
3. No North, no South, no East, no West.
4. The United States of America—as they are—one and inseparable.
5. No sectarian interferences in our legislation or in the administration of American law.
6. Hostility to the assumption of the pope, through the bishops, &c., in a republic sanctified by Protestant blood.
7. Thorough reform in the naturalisation laws.
8. Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as a universal text-book.

A society was formed in 1855 in opposition to the above, called *Know-Somethings*. Both bodies were absorbed into the two parties, Democrats and Republicans, at the presidential election in Nov. 1856.

**KNOX, JOHN,** the great Scottish reformer (1505-1572). Quincentenary of his birth celebrated in Scotland, 1905.

**KOLA**, a West African nut, from which is obtained, by grinding, a stimulating and sustaining drug, much used by the natives in long journeys, enabling them to endure thirst and hunger. Kola nuts are much prized in the Soudan, the presentation of some of these nuts being esteemed a special honour. Known to traders since the 17th century. Dr. Daniell in 1865 discovered that the nuts contained an alkaloid identical with that found in tea, coffee, maté and guarana. Called also *Gurumuts*.

**KOLIN** or **KOLLIN** (Bohemia). Here the Austrian general Daun gained a signal victory over Frederick the Great of Prussia, 18 June, 1757. In commemoration, the military order of Maria Theresa was instituted by the empress-queen.

**KÖLN**, see *Cologne*.

**KOMORN** or **COMORN** (Hungary), an ancient fortress town, often taken and retaken during the wars with Turkey. Near it the Hungarians, under gen. Klapka, defeated the Austrians, 11 July, 1849, but surrendered the town 1 Oct.

**KONIEH** (formerly Iconium). Here the Turkish army was defeated by the pasha of Egypt, after a long sanguinary fight, 21 Dec. 1832.

**KÖNIGGRÄTZ** (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king William I., 3 July, 1866. Prince Frederick Charles halted at Kammenitz on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7.30 a.m. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 o'clock, and a desperate struggle ensued, the result appearing uncertain, till the army of the crown prince of Prussia arrived about 12.30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The Austrians are said to have lost 174 guns, about 40,000 killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venetia to Italy; and led to the legislative independence of Hungary.

**KONIGSBERG**, the capital of east Prussia, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. University founded, 1544. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here king William I. and his queen were crowned, 18 Oct. 1861; his monument unveiled by the emperor, 4 Sept.; the emperor at a banquet censures the nobles for opposing his plans, promises additional grants to the province, and declares that he reigns by Divine right, 6 Sept. 1894. Population, in 1900, 187,807; in 1905, 224,770. *Königsberg Treaty*, see *Germany*, 25 July, 1904.

king of Poland, in 1725. It was made to hold 233,667 gallons of wine; and on the top, which was railed in, was accommodation for twenty persons to regale themselves. The famous tun of St. Bernard's was said to hold 800 tons; see *Heidelberg Tun*.

**KOOKAS**, a warlike reforming sect in N. W. India, founded by Baluk Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahometans, an outbreak of the Kookas took place near Loodiana, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, 17 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872. The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

**KORAN** or **ALCORAN** (**AL KURAN**), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. The leading article of faith preached is compounded of an eternal truth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God. *Gibbon*. The Koran was translated into Latin in 1143; into French, 1647; into English by Sale, 1734; and into other European languages, 1763 *et seq.* It is a rhapsody of 6000 verses, divided into 114 sections; see *Mahometanism*, &c.

**KOSSOVA**, see *Cossova*.

**KOSZTA AFFAIR**. Martin Koszta, a Hungarian refugee, when in the United States in 1850, declared his intention of becoming an American citizen, and went through the preliminary forms. In 1853 he visited Smyrna, and on 21 June was seized by a boat's crew of the Austrian brig *Huzzar*. By direction of the American minister at Constantinople, captain Ingraham, of the American sloop *St. Louis*, demanded his release; but having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Koszta was then given up. On 1 Aug., the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Koszta returned to the United States.

**KOYUNJIK**, the site of the ancient Nineveh (*which see*).

**KRAAL**, a Dutch name for a South African village. See *Zulu* and *land*. Women visitors excluded from the Kafir kraal in the Savage South African exhibition, Earl's Court (opened May, 1890), 28 Aug.; the action upheld by Mr. Justice Cozens-Hardy, 8 Sept. 1890.

**KREMLIN**, a palace at Moscow, built by Demetri, grand-duke of Russia, about 1367. It was burnt down in Sept. 1812, and rebuilt in 1816; partly burnt about 23 July, 1879.

**KRIEGSPIEL**, see *War Game*.

Early in 1868, this society issued lists of proscribed persons, who, if they did not quit the country after warning, became liable to assassination. General Grant endeavoured to suppress this society in April. Its repression by the militia in Arkansas was ordered, Nov. 1868, and it became the subject of legislation at Washington, June, 1871.

**KULDJA**, a revolted province of China, was seized by Russia in 1871, and restored by treaty in 1879.

In Oct. 1880, the Kurds, warlike and agricultural tribes, nominal Mahometans, invaded and ravaged Persia, and were subdued after fierce conflicts with their chief, Obeid-ullah, a Turkish sheikh, Nov.-Dec. 1880. In 1881 he went to Constantinople and was well received, but kept in a kind of honourable restraint, Sept. 1881. In Sept. 1882 he escaped to Kurdistan and incited the Kurds to revolt against Persia; captured by the Turks; rescued by his son, Nov. 1882; said to have died at Mecca in 1883. See *Armenia*, 1892 *et seq.*

Among the persons nominated, 10 April, 1891, were the following: the marquis of Hartington (duke of Devonshire), *ex officio* chairman, the earl of Derby, sir M. Dresden, Valenciennes, Mechlin, and Brussels have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufactured, has been increased to forty pounds, ten times the price of standard gold. A framework knitter of Nottingham, named Hammond, is said to have invented a mode of applying his stocking-frame to the manufacture of lace from studying the lace on his wife's cap, about 1768. *Macculloch*. So many improvements have been made in this manufacture, particularly by Heathcote (1809, 1817, &c.), Morley and Leaver (1811, &c.), that a piece of lace which about 1809 cost 17l. may now be had for 7s. (1853). *Ure*. The process of "gassing" by which cotton lace is said to be made equal to fine linen lace, was invented by Samuel Hall of Basford, near Nottingham. He died in Nov. 1862. **LA CROSSE**. Originally a game played by the Canadian Indians, it was adopted successively by the French and English settlers, and introduced into the United States and Great Britain. The

game is played with an indiarubber ball, 8 or 9 in. in circumference, and a long stick, 5 or 6 ft. in length, curved at the top like a bishop's crook (*crosse*, whence the name), across which strings of deerskin are stretched diagonally forming a net. The object of the game is to drive the ball through goals situated at each end of the field. The players are usually 12 a side. The rules of the game were systematised by Dr. Beers in 1860. In 1867 the La Crosse association of Canada was founded, and an Indian team visited Great Britain. The principal associations in Great Britain are the North of England association, formed 1880; the South of England association, 1882, and the English Union, 1892, which governs all international matters, including the laws of the game.

The natives having stolen some of his goods, he named the islands the *Ladrones*, or Thieves. In the 17th century they obtained the name of Marianna islands from the queen of Spain. See *Spanish-American War*.

**LADY**. The masters and mistresses of manor-houses, in former times, served out bread to the poor weekly; and were therefore called *Lafords* and *Lef-days*—signifying *bread givers* (from *hlaf*, a loaf): hence Lords and Ladies. Wedgewood considers this fanciful, and derives the words from the Anglo-Saxon, *laford*, lord, and *hlafdig*, lady.—**LADY DAY** (March 25), a festival instituted about 350, according to some authorities, and not before the 7th century according to others; see *Annunciation*. The year,

which previously began on this day, was ordered to begin on Jan. 1, in France in 1564; and in Scotland, by proclamation, on 17 Dec. 1564; but not in England till 3 Sept. 1752, when the style was altered.

It came into prominent notice 1899-1900, during the South African war, when Ladysmith was isolated and besieged by the Boers (2 Nov. 1899). Gen. Sir George White and his forces, and the naval brigade under capt. (now rear-adm.) Lambton, whose naval guns rendered great service, were shut up (but making gallant sorties during the interval) until relieved, 28 Feb. 1900, by the Natal Carbineers and Imperial horse, under Lord Dundonald, see *South African War*. **LAGOS,** an island in the Bight of Benin (Africa), was assaulted and taken by the boats of a British squadron, under commodore Bruce, 26, 27 Dec. 1851. This affair arose out of breaches of a treaty for the suppression of the slave-trade. In 1861, the place was ceded to the British government, and created a settlement: Henry Stanhope Freeman, first governor. Lagos was constituted a distinct colony in 1886, comprising several native kingdoms. Area of island 4 square miles, protectorate 26,700 square miles. Population, 1910 (est.), 45,100, island, 41,000; protectorate 1,650,000. See *Gold Coast Colony*.

**LAKE DWELLINGS** contain relics of the stone, iron, and bronze ages. Herodotus (about 450 B.C.) described the Peonians as living on platforms in Lake Prasias. In 1855, Dr. Keller discovered the remains of lake habitations which had been supported on piles in several Swiss lakes ages ago. His book was published in England in 1866. Similar relics discovered in lake Constance, March, 1882; they have also been discovered in Britain and various parts of Europe, Africa, and South America; they are now considered to be evidence of a stage in human progress. The artificial fortified islands termed "Crannoges" discovered in some Irish lakes are attributed to the 9th and 10th centuries. They

have been frequently used as places of refuge. *Artificial lake*, see under *Liverpool*, 1881 et seq.

Mr. Arthur Bulleid, in the spring of 1892, discovered, by excavation, near Glastonbury, in Somersetshire, remains of a pre-historic lake-village, in about 60 low mounds, enclosing wooden structures, many of which had been probably workshops. The many interesting relics of bronze, iron, bone, &c., with fragments of pottery, were deposited in the Glastonbury museum; excavations continued. . . . 1897

**LAMAISM**, the religion of Mongolia and Thibet (dating about 1357), is a corrupt form of Buddhism (*which see*). The present system of the Lama hierarchy is reputed to have been founded by the great Lamaist reformer Tsong Kha pa in the 14th century. There are three priestly orders, the chief being the Lama popes, the *Dalai-lama*, "priest as wide as the ocean," and the *Pan-chen*, next are the *Khutuktus*, and the third degree, the ordinary priesthood, of the *Khubilghans*. See *Thibet*.

**LAMBETH**, parish, N. E. Surrey, became the seat of the abps. of Canterbury, 1197. Lambeth returns four members by act of 1885; municipal borough by London Government act, 1899 (10 aldermen, 60 councillors). Population, 1901, 391,895; 1910 (est.), 332,084.

*Lambeth Palace*. A considerable portion was built in the 13th century, by Hubert Walter, archbishop of Canterbury. The tower of the church was erected about 1375; and other parts of the edifice in the 15th century. Simon of Sudbury, archbishop of Canterbury, was killed here by the followers of Wat Tyler, who attacked the palace, burnt the furniture and books, and destroyed the registers and public papers, 14 June, 1381. The domestic portion of the palace was greatly enlarged for archbishop Howley (who died 1848), by Mr. Blore, at an expense of 52,000*l.* The palace was reopened after restoration, Oct. 1873; see *Canterbury, Articles*. For Lambeth Conferences see *Pan-Anglican Synods*. Lambeth bridge was freed from toll 24 May, 1879.

**LAMMAS-DAY**, the 1st of August, one of our four cross quarter-days of the year. Whitsuntide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Ladyday, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* probably comes from the Saxon *hlammæsse*, loaf mass, because formerly upon that day our ancestors offered bread made of new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

**LAMPETER COLLEGE** (Cardiganshire), was founded by bishop Burgess in 1822, and incorporated 1828.

**LAMPS**. The earthen lamp of Epictetus the philosopher sold after his death for 3000 drachmas. Lamps with horn sides said to be the invention of Alfred. London streets were first lighted with oil-lamps in 1681, and with gas-lamps in 1814. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand in 1784, and was brought into general use in England early in the nineteenth century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825, the moderator lamps of Levavasseur, Hadrot, and Neuburger. See *Safety Lamp*. Paraffin oil and naphtha spirit are now much used in lamps. The Water Safety Lamp invented by Mr. Devoll, was tried and approved 2 June, 1890. The flame is extinguished by the water if the lamp is overturned. The Kitson oil lamp, in which petroleum is burnt as gas, used successfully in Portland-place, May, 1901. See *Petroleum*. Dr. Rostin's invention for the automatic lighting and extinguishing of gas lamps successfully tried end Jan., 1909.

disfranchised for bribery by the Reform act of 1807. The public park, value about 24,000*l.*, was presented by Mr. Jas. Williamson, of Rylands, 21 Nov. 1881. The system led to the formation of the British and Foreign School society, in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

The proprietors of the "*Lancet*" have at various times employed medical men as commissioners of enquiry. The "*Lancet*" commissioners (three physicians) enquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

**LAND** is said to have been let generally in England for 1*s.* per acre, 36 Hen. VIII. 1544. The whole rental of the kingdom was about 6,000,000*l.* in 1600; about 14,000,000*l.* in 1688. In 1798 Mr. Pitt proposed his income tax of 10 per cent. on an estimate of 100 millions, taking the rent of land at 50 millions, that of houses at 10 millions, and the profits of trade at 40 millions; but in his estimate were exempted much land, and the inferior class of houses. The rental of the United Kingdom was estimated at 59,500,000*l.* in 1851. The land tax grew out of a land tax of 1*l.* in the pound (which produced 100,000*l.* in 1800) imposed. 1699  
Ministers were left in a dilemma in the face of complaints on the land tax, in order to bring the first instance of the land tax to a speedy issue since the revolution. Its rate varied in different years from 1*l.* to 4*l.* in the pound.

Mr Pitt made the tax perpetual at 1*l.* in the pound, but introduced his plan for its redemption.

**LANGUAGE** must either have been revealed originally from heaven, or the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldee, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech" (*Genesis* xi. 1). \* George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

The original European languages were thirteen, viz.: Greek, Latin, German, Slavonian, spoken in the east; Welsh; Breayan, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jazygian, remaining yet in Liburnia; the Chaucin, in the north of Hungary; and the Finnic, in east Friesland.

From the Latin sprang the Italian, French, Spanish, and Portuguese.

The Turkish is a mixed dialect of the Tartarian

From the Teutonic sprang the present German, Danish, Swedish, Norwegian, English, Scotch, &c.

There are 3424 known languages, or rather dialects, in the world. Of these, 157 are Asiatic, 587 European; 271 African, and 1924 American languages and dialects.

In the dark ages the country was named Septimania (probably from its containing seven important towns): afterwards Languedoc (from its dialect, see *Troubadours*), about 1270, when annexed to the monarchy. It suffered during the persecutions of the Albigenes and Huguenots.

Laon surrendered to the Germans 9 Sept. 1870. As the last man of the garde mobile left the citadel, a French soldier, in contravention of the capitulation, blew up the powder magazine, causing great destruction to the town and fortress. The grand-duke William of Mecklenburg-Schwerin was bruised, and 95 German riflemen and 300 French garde mobiles were killed or wounded; general Theremin Du Hame, the commander, was wounded. The French attributed the explosion to accident.

**LA PEROUSE'S VOYAGE**. In 1785 La Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command,

and was last heard of from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was obtained until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on the New Hebrides, authenticated by articles which he brought to Calcutta, 9 April, 1828.

By its means the vocal chords of the interior of the larynx, &c., are exhibited, and have been photographed. It was invented by señor Manuel Garcia, and reported to the Royal Society 24 May, 1855. One constructed by Dr. Türk was greatly modified, in 1857, by Dr. Czermak, who exhibited its successful action in London in 1862. A similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846. The British Laryngological and Rhinological Association was founded in 1888.

**LATIN LANGUAGE**, a member of the Aryan family, and one of the original languages of Europe, from which sprang the Italian, French, and Spanish; see *Latium*. A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelmu, brother of Ina, in the 7th century. The use of Latin in law deeds in England gave way to the common tongue about 1000; was revived in the reign of Henry II.; and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveying and in courts of law in 1731 (by 4 Geo. II. c. 25). A corrupt Latin is still spoken in Roumelia. The foreign pronunciation of Latin (*a*, *ah*; *e*, *a*; *i*, *e*, &c.) was adopted in English universities and many schools about 1875-6. For "Latin name," see *Latium*.

At the equator, in 1744, four astronomers made it 68·732; and Lambton, in latitude 12, made it 68·743. Mudge, in England, made it 69·148. Cassini, in France, in 1718 and 1740, made it 69·12; and Biot, 68·769; while a recent measurement in Spain makes it but 68·63—less than at the equator, and contradicts all others, proving the earth to be an oblate spheroid (which was the opinion of Cassini, Bernoulli, Euler, and others), instead of a prolate spheroid; see *Longitude*.

LAW-COURTS.—Commissioners appointed in 1859 reported in favour of the concentration of the law-courts in London, on a site near Carey-street, Chancery-lane, about 7 acres, on which stood about 400 houses. The estimated expense was about 1,500,000*l.*, which it was recommended to take from the accumulated Chancery fund, termed "Suitsors' fund." Acts of parliament to carry out the plan were passed in 1865 and 1866.

Competitive designs were invited, and after much discussion (public and professional), Mr. Street's design was selected, 30 May, 1868; much attacked, but approved by the commission, Aug. 1870; contracts signed 17 Feb. 1874, and the works were begun immediately by Bull and Son, to be finished in 1881.

There were to be 18 courts, varying in size; a central hall, 231 feet long, 48 feet wide, 30 feet high; principal entrance in the Strand.

Offices in Eastern Block occupied 21 April, 1879.

Buildings completed, Oct. 1882.

Opened by queen Victoria, 4 Dec. 1882.

All the buildings constitute by statute the *Palace of Justice*.

**LAW'S BUBBLE.** John Law, of Edinburgh (born 1681), was made comptroller-general of the finances of France, upon the strength of a scheme for establishing a bank, and an East India and a Mississippi company, by the profits of which the national debt of France was to be paid off. See *Mississippi*. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France, and the deluded rich subscribed for shares both in the bank and the companies. In 1718 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729.—The South Sea Bubble in England occurred in 1720; see *South Sea*.

**LAWN TENNIS** is an offspring of tennis (*which see*). Major Wingfield is the reputed originator of the game introduced by him in 1874, under the name of *Sphæristike*, a compromise between tennis and Badminton. Various modifications have taken place since. The national lawn tennis association, founded 1888, controls the laws, etc., relating to the game.

**LAYBACH** (near Trieste, in Illyria). A congress met here in Jan. 1821, and was attended by the sovereigns of Austria, Russia, Prussia, and Naples. It broke up in May, after having issued two circulars, stating it to be their resolution to occupy Naples with Austrian troops, and put down popular insurrections.

The town suffered much by an earthquake, with loss of life, 14, 15 April; relief sent by the emperor 18 April, 1895.

Christopher Layer, a barrister, conspired with other persons to seize George I., the prince of Wales, lord Cadogan, and the principal officers of state, to seize the tower, to plunder the bank, and bring in the Pretender. Layer was hanged, 17 May, 1723. He was hanged for enlisting soldiers for the Pretender. Bishop Atterbury was accused of complicity and attainted, but permitted to quit the country.

**LAYMEN, HOUSE OF**, composed of 102 members elected in the dioceses, as a purely consultative body to assist the Convocation of the clergy, its main object being the promotion of church reform. It first met with Convocation at Westminster, 16 Feb. 1886. Lord Selborne, chairman; Mr. G. A. Spottiswoode, vice-chairman.

**LAZARISTS** (the Priests of the Mission), a congregation devoted to education, founded by St. Vincent de Paul, 1625, were so named from their first establishment in a house which once belonged to the military order of St. Lazarus. They are also called *Vincentines*. See *France*, Oct. 1902.

**LAZZARITES**, see *Italy*, 1878.

**LAZZARONI** (from *lazzaro*, Spanish for a pauper or leper), a term applied by the Spanish viceroys to the degraded beings in Naples, half-clothed and houseless. No man was born a lazzaroni; and he who turned to a trade ceased to be one. The viceroy permitted the lazzaroni to elect a chief with whom he conferred respecting the imposts on the

goods brought to the markets. In 1647, Masaniello held the office, and made an insurrection; see *Naples*. In 1793, Ferdinand IV. enrolled several thousands of lazzaroni as pikemen (spontoneers), who generally favoured the court party; on 15 May, 1848, they were permitted, on the king's behalf, to commit fearful ravages on the ill-fated city.—*Colletta*.

**LEAD** is found in various countries, and is abundant in various parts of Britain, and in some places richly mixed with silver ore. The famous Clydesdale mines were discovered in 1513. Pattinson's valuable method for extracting the silver was made known in 1829. The lead-mines of Cumberland and Derbyshire yield about 15,000 tons per annum. British mines produced 65,529 tons of lead in 1855; 73,420 in 1870; 51,635 in 1879; 40,075 in 1884; 1890, 33,590; 1902, 17,704; 1904, 19,838; 1906, 22,335; 1907, 24,460.

**LEAP-YEAR** or **BISSEXTILE**, originated with the astronomers of Julius Cæsar, 46 B.C. They fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was

played a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bisextile* or *twice sixth*. This added day with us is Feb. 29th; see *Calendar*. This arrangement makes the year nearly three minutes longer than the astronomical year: to obviate this, 1700, 1800, and 1900 were not leap-years, but 2000 will be one; see *Calendar* and *Year*.

**LEARNING AND THE ARTS** flourished among the Greeks, under Pisistratus, 537 B.C., and especially under Pericles, 444 B.C.; and with the Romans at the commencement of the Christian era, under Augustus. The Greek refugees caused their revival in Italy, particularly after the taking of Constantinople by the Turks in 1453, and the invention of printing shortly before,—the period of the *Renaissance*. Leo X. and his family (the *Medici*) greatly promoted learning in Italy, in the 16th century; when literature revived in France, Germany, and England; see *Literature*, and authors under *Greek*, *Latin*, *English*, and other languages.

**LEASE** (from the French *laisser*, to let), a kind of conveyance invented by serjeant Moore, soon after the statute of uses, 27 Henry VIII. 1535. Acts relating to leases were passed in 1856 and 1858. *Forged Leases case*, see *Trials*, Jan. 1878.

**LEATHER** was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, &c., by all ancient nations. The Gordian knot was made of leather thongs, 330 B.C. A leather cannon was proved at Edinburgh, fired three times, and found to answer, 23 Oct. 1778. *Phillips*. The duty on leather imposed 1697, produced annually in England, 450,000*l*. and in Ireland about 50,000*l*. It was abolished, 29 May, 1830. Many bankruptcies were declared in the leather trade, in the autumn of 1860 in England. In the case of Lawrence, Mortimore, and Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, &c., was made known in 1860.—*Leather cloth* (invented by Messrs. J. R. & C. P. Crockett, of Newark, U.S., and patented in 1849) is unbleached cotton coated with a mixture of boiled linseed oil and turpentine, and coloured. The Leather-cloth company, London, successors to Messrs. Crockett, was established, 1859. An exhibition of leather manufactures at Northampton in 1873; at the Agricultural Hall, London, 15-23 Sept. 1880; 26 Sept. 1881; 15 Sept. 1882, and 30 Sept. 1905. Internat. assoc. of leather trade chemists, holds annual conferences.

International show and leather fair opened at the Agricultural Hall, London. 5 Nov. 1900

**LEBANON** (*white mountain*), the mountain range between Syria and North Palestine, assigned to Israel, but never conquered, and long attached to Syria. Special ordinance for preservation of the ancient cedar forest, Sept. 1881. The governor-general since 1861 has been appointed by Turkey, subject to the assent of the great powers. See *Assassins*, *Druses*, *Marginites*, and *Syria*.

**LECH**, a river, S. Germany, near which at a village named Rain the cruel imperialist general Tilly was defeated by the Swedes, under Gustavus Adolphus, 5 April, 1632, and died of his wounds.

**LECTIONARY**, the name given to the Anglican table of scripture lessons; changes in calendar of lessons, made 1871, by sanction of parliament; see *Common Prayer*.

**LECTURES**. Those on Physic were instituted by Dr. Thomas Linacre, of the College of Physicians (founded by Henry VIII.) about 1502. *Clinical* lectures, at the bed-side of the patients in hospitals are said to have been given (by Dr. John Rutherford) in Edinburgh, about 1748; in Dublin, about 1785; in London, by sir B. C. Brodie (1813-17). Mr. G. Macilwain, about 1824, gave surgical clinical lectures in connection with a dispensary. The political lectures of Thelwall, commenced in Jan. 1795, were interdicted by an act of parliament. In the autumn of 1857 and since, many distinguished noblemen and gentlemen lectured at mechanics' institutes. An act passed in 1835 prohibited the publication of lectures without the consent of the lecturers. See *Gresham College*, *Boyle's Lectures*, *Royal and London Institutions*, *Trials*, 1887, &c.

The palace and offices were burnt by the communalists, 23 May, 1871. The Legion comprised upwards of 54,000 members in 1887. Here took place, on 16-18 Oct. 1813, "the battle of the nations," between the French army and its allies, commanded by Napoleon (160,000), and the Austrian, Russian, and Prussian armies (240,000 strong). The French were beaten chiefly owing to 17 Saxon battalions, their allies, turning upon them in the heat of the engagement. 80,000 men perished on the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery, and many standards. The victory was followed by the capture of Leipsic, of the rear guard of the French army, and of the king of Saxony and his family. The 50th anniversary was celebrated 18 Oct. 1863. It chiefly affected the lower classes, yet occasionally proved fatal to the very highest personages. Robert Bruce of Scotland died of leprosy in 1329. A hospital for lepers was founded at Granada, by queen Isabella of Castile, about 1504, and a large number of leper houses were founded in Britain. Dr. Edmondson met with a case in Edinburgh in 1809.

The great increase of leprosy in the Sandwich Islands compelled the government to isolate the lepers, and large numbers were transported to Molokai, where they endured much suffering. Since 1873 Father Joseph Damien (de Venster), R. C. Belgian missionary, devoted his whole life most successfully to their general relief, and finally died of their disease, aged 42, 10 April, 1889 (succeeded by Father Wendelin). princes of Germany and the magistrates of cities to resign their authority; and on his march his followers ravaged the country. The landgrave of Hesse at length defeated him at Frankenhansen, 15 May, 1525: 7000 of the enthusiasts fell in the battle, and the rest fled; their leader was taken and beheaded at Muhlhausen. The English "Levellers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn was tried and acquitted. At the period of the French revolution some Levellers appeared in England. A "Loyal Association" was formed against them by John Reeves, Nov. 1792.

**LEVELS.** The great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflowed by the sea during an earthquake, 308. It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained—by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A general drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners; but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652. He also reclaimed much valuable land at Arbolme, in Lincolnshire, 1626-30, and many Dutch and French protestants settled here about 1634; and a few of their descendants still remain.—There are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807), and of Telford (1809), and of other eminent engineers. The Middle Level commission cut through certain barrier banks, and replaced them by other works. These were reported unsound in March, and the outfall sluice at St. Germain's, near King's Lynn, gave way. 4 May, 1862  
High tides opening about 60,000 acres of fertile land were inundated, causing a loss of about 25,000. After unsuccessful land, for a while, unsuccessful efforts, a new outfall drain was constructed under the superintendence of Mr. Hawkeshaw, which was reported sound. 1 July, "  
Another inundation, begun through the bursting of a marshland sluice, near Lynn, was checked. 4 Oct. "  
New outfall sluice opened. 26 Nov. 1877

In commemoration the university was founded, 1575. In 1699 two-thirds of the population perished by a fever, which, it was said, was aggravated by its improper treatment by professor De la Boe. The university was almost destroyed by a vessel laden with 10,000 lbs. weight of gunpowder blowing up and demolishing a large part of the town, and killing numbers of people, 12 Jan. 1807. **LIBEL.** By the Roman laws of the Twelve Tables, libels which affected the reputation of another were made capital offences. An action for libel was brought in the court of King's Bench by a bookseller named Stockdale, against Messrs. Hansard, the printers to the house of commons; this action related to an opinion

expressed in a parliamentary report of a book published by Stockdale, 7 Nov. 1836. Lord Deunau, in giving judgment, said he was not aware that the authority of the house of commons could justify the publication of a libel—an opinion which led to some proceedings on the part of the house, and to other actions by Stockdale 1837-39

Verdicts were given in his favour, and in Nov. 1839, the sheriffs took possession of Hansard's premises. This caused much excitement in parliament, and they were ordered to appear at the bar of the house of commons, and were formally committed to the custody of the serjeant-at-arms, 21 Jan., but immediately discharged: the conflict was maintained by the law officers and the commons till May, 1840

By an order in council, Jan. 1837, the archdeaconry of Coventry was added to the see of Worcester, and Dr. Samuel Butler became bishop of Lichfield. This see has given three saints to the Romish church; and to the British nation one lord chancellor and three lord treasurers. It is valued in the king's books at 559*l.* 18*s.* 2*d.* Present income, 4,200*l.* Population, 1881, 8,349; 1910 (est.), 8,000.

Lichfield cathedral was first built about 656; the present structure was founded by Roger de Clinton, the 27th bishop, in 1142. Walter de Langton (bishop in 1206), built the chapel of St. Mary, now taken into the choir, and under bishop Heyworth (1420) the cathedral was perfected. The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows, were demolished). It was repaired at the restoration, 1660; in 1788; and by Gilbert G. Scott, 1860-63 and 1884.

In Lichfield castle, King Richard II. kept his Christmas festival, 1277, when 200 tons of wine and 2000 oxen were consumed. A charter was granted to Lichfield, constituting it a city, by Edward VI., 1549. It was absorbed into the county in 1835.

**LICINIAN LAWS**. In 375 B.C., C. Licinius Stolo and L. Sextius, tribunes of the people, promulgated various rogations or laws to weaken the power of the patricians and benefit the plebeians: one was to relieve the plebeians from their debts; another enacted that no person should possess more than 500 jugera of the public land, or more than 100 head of large cattle, or 500 of small, in the Roman states; and the third, that one of the consuls should be a plebeian. After much opposition these were carried, and L. Sextius became the first

plebeian consul, 366. Another law, 56 B.C., of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes; and another, about 103 B.C. (brought forward by P. Licinius Crassus), limited the expenses of the table.

**LIÈGE** (Belgium), a bishopric, under the German empire, from the 8th century till 1795. Liège frequently revolted against its prince-bishops. After a severe contest, the citizens were beaten at Brusthem, 28 Oct. 1467, and Liège taken by Charles the Bold, duke of Burgundy, who treated them with great severity. In 1482 Liège fell into the power of De la Marek, the Boar of Ardenne, who killed the bishop, Louis of Bourbon, and was himself defeated and killed. Liège was taken by the duke of Marlborough, 23 Oct. 1702; and by the French and others, at various times, up to 1796, when it was annexed to France. It was incorporated with the Netherlands in 1814, and with Belgium in 1830. Iron-works were established at Liège in the 16th century, and have been greatly enlarged by the Cockerills in the 19th, see *Seraing*. An international volunteer shooting contest held here, Sept. 1869. Dynamite explosions; the church of St. Martin much injured, 1, 2 May; nine anarchists convicted; sentences, penal servitude, one, 25 years; two, 20 years; four, 15 years; one, 10 years; one, 3 years; trial, 18-26 July, 1892. **LIFE-PRESERVER**, the apparatus of capt. Manby (brought into use in Feb. 1868), effects a communication with the distressed vessel by a rope, thrown by a shot from a mortar, with a line attached to it. For the night, a night-ball is provided with a hollow case of thick pasteboard, and a fuse and quick match, and charged with fifty balls, and a sufficiency of powder to inflame them. The fuse is so graduated that the shell shall explode at the height of 300 yards. The balls spread a brilliant light for nearly a minute, and give a clear view of every surrounding object. In 20 years, 58 vessels and 410 of their crews and passengers had been saved. Capt. Manby died 18 Nov. 1854, aged 89. See *Rockets*.

The **BOAT-LOWERING APPARATUS**, in consequence of many being lost when boats were lowered from the *Amazon* in 1852, invented by Mr. Charles Clifford, of London, in 1856, and has been generally adopted in the royal navy.

**LIFE-SHIPS.** To promote the construction and use of these the Hans Bussk Life-Ship Institute was founded, Oct. 1869.

**LIGHT.** The law of refraction discovered by Snellius, about 1624. The motion and velocity of

light discovered by Reaumur, and after him by Cassini, and calculated by K  rner (1676) and Bradley (1720). Its velocity ascertained to be about 190,000,000 of miles in sixteen minutes, or nearly 200,000 miles in a second, which is a million of times swifter than the velocity of a cannon ball, about 1667. The light of the sun takes eight minutes and eight seconds for its transmission through space to the earth. See *Emission Theory*, *Optics*, *Photography*, *Calorescence*, *Fluorescence*, *R  ntgen Rays*, *Radium*, *Finsen*.

Mr. (aft. sir) Wm. Crookes, F.R.S., considered that he had demonstrated the mechanical action of light by experiments with delicate balances in the highest procurable vacuum, and calculated the force of the sun's rays upon the earth to be 2.3 tons to the square mile, 1873-6. His apparatus was termed *Radiometer* (*which see*). After much investigation, Mr. Crookes admitted that the action was not due to radiation, but to difference of heat-absorption and the reaction of residual air.

## LIGHT BRIGADE. See *Balaklava*.

**LIGHTHOUSE**, called *Pharos* (now *phare*, French; *faro*, Italian), from one erected at *Pharos*, (*which see*) near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 283 B.C. There was one at Messina, at Rhodes, &c. The light was obtained by fires. A coal-fire light was exhibited at Tynemouth castle, Northumberland, about 1638. The first true lighthouse erected in England was the Eddystone lighthouse (*which see*) in 1758-60. Lights were exhibited in various places by the corporation of the Trinity-house early in the 16th century.

### BRITISH LIGHTHOUSES.

The lighthouse 40 years old, height 80 feet, weight 300 tons) on the pier at Sunderland, Durham, was moved forward 500 feet without stopping the illumination, under the superintendence of Mr. John Murray, Oct. 1844.

Glass reflectors were used in 1780, and copper ones in 1807. A common coal-fire light was discontinued at St. Bees in 1810. Fresnel's Dioptric system, which was devised about 1819, was adopted for the first time in England by Messrs. Williams, at the direction of the corporation of the Trinity-house, 1 July, 1836.

The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by professor Holmes—was first employed at the South Foreland lighthouse, near Dover, on 1 Dec. 1860; and at Dungeness in 1861. Mr. Holmes' arrangement, and a similar one constructed by M. Serrin, were shown at the International exhibition, London, in 1862.

Report of the royal commission appointed in 1906 to inquire into Lighthouse administration in the United Kingdom, issued as a parliamentary paper, 11 Feb. 1908.

New lighthouses:—Beachy Head (1902) on foreshore, in lieu of one on the cliff; Penlee Pt. Fog Signal Stn., near Plymouth (1903); Dungeness (1904), to replace old lighthouse; Portland Bill (1906) in lieu of two lighthouses on Portland; Berry Head, near Torquay (1906); Strumble Head (1908); Bideford Bar (1908); and Bambergh, Northumberland (1910).

The new lighthouses at north and south ends of Lundy were established in 1897 in lieu of old lighthouse in the centre of the island.

**LIGHTING UP** (Towns, &c.), see *London*, 1884, 1094; *Gas and Electric Light*.

**LIGHTNING-CONDUCTORS** were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. Richmann, of St. Petersburg, was killed while repeating these experiments, Aug. 1752. The first conductor in England was set up at Payne's Hill, by Dr. Watson. In 1766 one was placed on the tower of St. Mark, at Venice, which has since escaped injury, although frequently injured by lightning previously. A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782; and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished. In 1762, Dr. Watson recommended conductors to be used in the navy; and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr. (afterwards sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work, in 1843, detailing his experiments.

In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted him 5000*l*. A lightning research committee formed, Jan. 1901, with a view to the better protection of buildings, 200 observers in the United Kingdom, and others abroad.

**LIGHT SHIPS**, floating beacons guarding dangerous sandbanks and shoals. Those round the English coast are under the control of Trinity-house. The first English light vessel was placed off the Nore in 1825, and there were 51 in position off the coast of England in June, 1910.

*Cable Ships* are stationed at Haibro', Shipwash, Kentish Knock and North Goodwin.

*Wireless Ships* at Cross Sand, Sunk, Tongue, East Goodwin, Gull and South Goodwin.

*Submarine bells* are established at the following light vessels:—Spurn, Outer Dowsing, Cross Sand, Sunk, Outer Gabbard, Tongue, East Goodwin, Royal Sovereign, Owers, Nab, Shambles, Breaksea, St. Goven, and Morecambe Bay, also one on sea bottom, 1,500 yards from North Stack, Holyhead.

**LIGNY** (near Fleurus, Belgium), where Napoleon defeated the Prussian army under Blücher, 16 June, 1815; see *Waterloo*.

**LIGURIANS**, or **REDEMPTORISTS**, a Roman catholic order, established in 1732 by Alfonso de Liguori, approved by pope Benedict XIV., 1749.

**LIGURIANS**, a Celtic tribe, N. Italy, invade the Roman territory, and were defeated 238 B.C. They were not subjugated till 172 B.C.—The **LIGURIAN REPUBLIC**, founded in May, 1797, on the ruin of Genoa, was incorporated with France in 1805, and then merged into the kingdom of Italy.

**LILAC TREE**, *Syringa*. The Persian lilac from Persia was cultivated in England about 1638; the common lilac by Mr. John Gerard about 1597.

**LILLE** (formerly Lisle), N. France, has a strong citadel by Vauban. It was besieged by the duke of Marlborough and the allies; and, though deemed impregnable, was taken after a three months' siege in 1708. It was restored by the treaty of Utrecht, in 1713, in consideration of the demolition of the fortifications of Dunkirk. Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, 7 Oct. 1792. Population, 1886, 188,272; 1901, 215,431; 1906, 205,602.

**LILLI-BURLERO**, part of the refrain of a popular song ridiculing the Irish papists, 1688. The words are attributed to lord Wharton, the music to Henry Purcell.

**LILY**, a native of Persia, Syria, and Italy, was brought to England before 1460; the martagon from Germany, 1596.

**LILYBÆUM**, a strong maritime fortress of Sicily, besieged by Pyrrhus, king of Epirus, 276 B.C., and relieved by the Carthaginians 275 B.C. It was taken by the Romans, 241 B.C., after a siege of nine years, which led to the end of the second Punic war.

**LIMA** (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of *Ciudad de los Reyes*, or city of the kings, 1535. Here he was assassinated, 26 June, 1541. Awful earthquakes occurred here, 1586, 1630, 1687, and 28 Oct. 1746. In 1854-5, thousands perished by yellow fever. Mr. Sullivan, the British

**LIME** or **LINDEN TREE**, probably introduced in the 16th century. The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "*Famifugium*" (1661). A lime-tree planted in Switzerland in 1410, existed in 1720, the trunk being thirty-six feet in circumference.

**LIME-LIGHT**, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called *Drummond Light*, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the ordnance survey. It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland lighthouse in 1861. Lieut. Drummond was born, 1797; died 15 April, 1840. To him is attributed the maxim that "property has its duties as well as its rights."

**LIMERICK**, anciently *Lumneach* (S. W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. It was taken by Ireton after six months' siege in 1651. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honourable terms, 3 Oct. 1691.\* An awful explosion of 218 barrels of gunpowder greatly shattered the town, killing 100 persons, 1 Feb. 1694. **LIMITED LIABILITY.** An act for limiting the liability of joint stock companies, 18 & 19 Vict. c. 133 (passed 1855), was several times amended 1856-7-8. On 31 May, 1864, "3830 joint stock companies had been formed and registered on the limited liability principle, and 938 had ceased to exist." Much calamity in 1866 was occasioned by the abuse of the system. The Companies act of 1862 was amended in 1867. 1241 registered in 1874; 1,791 registered in 1886; total 1862-86, 25,042. Without Newport-gate upon Lincoln plain was fought the battle between the partisans of the empress Maud, commanded by the earl of Gloucester, and the army of Stephen, in which the king was defeated and taken prisoner, 2 Feb. 1141. Louis, dauphin of France, invited over by the discontented barons in the last year of king John's reign, was acknowledged by them as king of England here; but the nobility, summoned by the earl of Pembroke to Gloucester to crown Henry III., marched against Louis and the barons, and defeated them in a most sanguinary fight (called the Fair of Lincoln), 20 May, 1217; and Louis withdrew. **LINCOLN, BISHOPRIC OF.** Sidnacester or Lindisse and Dorchester, two distinct sees in Mercia, were united about 1078, and the see was removed to Lincoln by bishop Remigius de Feuchamp, who built a cathedral (1086), afterwards destroyed by fire, but rebuilt by bishop Alexander (1127) and bishop Hugh of Burgundy. The diocese is very large, although the dioceses of Ely (1109), Oxford, and Peterborough (1541) were formed from it, and

were further enlarged in 1837. The see was valued at the dissolution of monasteries at 2065*l.* per annum; and after many of its manors had been seized upon, it was rated in the king's books at 894*l.* 10*s.* 1*d.* Present income, 4500*l.* It has given three saints to the church of Rome, and to the civil state of England six lord chancellors. **LINCOLN'S-INN** (London), derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I., which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn-fields were laid out by Inigo Jones, about 1620, and erroneously said to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn square being 821 feet by 625 feet 6 inches. William lord Russell was beheaded in Lincoln's-inn-fields, 21 July, 1683. The square (formed in 1618) was enclosed with iron railings about 1737. The new hall and other buildings were opened, 30 Oct. 1845, and the square planted. The theatre in Lincoln's-inn-fields was built in 1695; rebuilt in 1714; made a barrack in 1756, and pulled down in 1848. Johnson and sir Joshua Reynolds, in 1764. Hawkins, Topham Beauclerk, Goldsmith, Burke, and Bennet Langton, were among the first members. The opinion formed of a new work by the club was speedily known all over London, and had great influence. Many eminent men have been members of the Club, including Hallam, Macaulay, the marquis of Lansdowne, and bishop Blomfield; Dr. Milman, dean of St. Paul's, was in the chair at the centenary dinner, on 7 June, 1864.

**LITHOFRACTEUR**, or "STONE-BREAKER," an explosive material, a modification of dynamite (composed of gun-cotton, nitro-glycerine, and the constituents of gunpowder, and other substances), invented by professor Engels of Cologne, and made by Krebs, in 1869. It was occasionally used by the Germans in the war 1870-1, and was tried and well reported of for power and safety at Nant Mawny quarries, near Shrewsbury, 9. 10 May, 1871, and again on 20 Feb. 1872, before the government explosive committee, with similar results.

**LITHOGRAPHY** (drawing on stone). The invention is ascribed to Alois Senefelder. About 1796; and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801 *et seq.*, but its general introduction is referred to Mr Ackermann, of London, about 1817. Senefelder died in 1841. Improvements have been made by

\* Plover Sydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, was arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1750, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since well supported. Williams was in early life a dissenting minister, and wrote on education. He was consulted by the early revolutionary party in France as to the form of a constitution for that country; he, Dr. Priestley, sir James Mackintosh, and other distinguished Englishmen, having been previously declared French citizens. He died 29 June, 1816.

**LITHOSCOPE.** An instrument for distinguishing precious stones, invented by sir David Brewster; described by him Jan. 1864.

**LITHOTOMY.** The surgical operation of cutting for the stone, it is said, was performed by Ammonius, about 240 B.C. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The "high apparatus" was practised (on a criminal at Paris) by Colot, 1475; by Franco, on a child, about 1566; and in England, by Dr. Douglass, about 1519. The "great apparatus" was invented by John de Romanis, and described by his pupil Marianus Sanctus, 1524. The "lateral operation," invented by Franco, much performed in Paris by Frère Jacques, in 1697, has been greatly improved.

**LITHOTRITY** (or bruising the stone). The apparatus produced by M. Leroy d'Etiolles in 1822 has since been improved.

**LITHUANIA**, formerly a grand-duchy, N. E. of Prussia. The natives (belonging to the Slavonic race) long maintained their independence against the Russians and Poles. In 1386, their grand-duke Jagellon became king of Poland and was baptized: Lithuania was not incorporated with Poland till 1501, when another duke Casimir became king of that country. The countries were formally united in 1569. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

**LITTLE ENGLANDISM**, a term defined by sir Edward Grey as an *aimless antipathy to the British Empire*, 18 July, 1901.

**LITURGIES** (from the Greek *leitros*, public, and *ergon*, work). The Greek and Roman liturgies are very ancient, having been committed to writing about the 4th and 5th centuries. The Romish church recognises four: the Roman or Gregorian, the Ambrosian, the Gallican, and the Spanish or Mosarabic. The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius, 250, to St. Ambrose (died 397), and to St. Jerome (died 420).

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them, and published 1549 and 1552.

At the solicitation of Calvin and others, the liturgy was reviewed and altered.

It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn.

The liturgy was revised by Whitehead, formerly chaplain to Anne Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith.

John Knox is said to have used a liturgy for several years. The rev. Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1850: he soon after resumed it, and the discussion on the subject ceased only at his death, 14 March, 1868.

**LIVERIES OF THE CITY OF LONDON.** The term is derived from the custom of the retainers of the lord mayor and sheriffs wearing

clothes of the form and colour displayed by those functionaries. Liveries were regulated by statute in 1392, and frequently since. The nobility gave liveries to their retainers. See *Companies*.

It afterwards was held by the earls of Chester and dukes of Lancaster. Liverpool is the second city of the Empire. **LLOYD'S** (London), at the Royal Exchange about 1602. A coffee-house, kept by Edwd. Lloyd, Abchurch-lane, became a place of meeting of merchants. After several removals it was established finally at the Royal Exchange in 1774, and remained there till the fire in 1838, when it was removed till the present building was completed in

1844. Here resort eminent merchants and ship-owners, and here are effected insurances on ships and merchandise. A Register of ships began about 1704: and the terms A1, &c. were used about 1775. "The best security against the recurrence of such evils will be found, not so much in legislative enactments as in the enlightenment of the public as to their real nature and origin, thus rendering it more difficult for unscrupulous persons to carry out schemes . . . which have ended in so much discredit and disaster," July, 1875.

**LOCHLEVEN CASTLE** (Kinross), built on an isle in Loch Leven, it is said by the Picts, was the royal residence of Alexander III. and his queen when taken from it to Stirling. It was besieged by the English in 1301, and in 1334. Patrick Graham, first archbishop of St. Andrews, imprisoned for attempting to reform the church, died here about 1478. The earl of Northumberland was confined in it, 1569. It was the place of queen Mary's imprisonment in 1567, and of her escape on Sunday, 2 May, 1568.

**LOCK HOSPITAL**, established 1747; the asylum, 1787.

**LOCKS**, early used by the Egyptians, Greeks, Romans, and the Chinese. Denon has engraved an Egyptian lock of wood. Du Cange mentions locks and padlocks as early as 1381.

Barron's locks (on the many-tumbler principle) were patented in 1778; Bramah's, in 1788; and Chubb's "detector" locks in 1818.

Mr. E. Beckett Denison (aft. lord Grimthorpe, died 1905) invented a lock asserted to be secure against picking in 1832.

New locks have been produced by Messrs. Day and Newell, Yale, Andrews, and others, especially in America.

Mr. Hobbs, an American, exhibited his own locks in the Crystal Palace, in 1851, and showed great skill in picking others.

A "Key Bureau" to aid in the recovery of lost keys (charge 1s. per annum) established in London in 1885. Chubb's "panic door lock" for easy opening of doors in theatres announced Oct. 1887.

Mr. F. J. Biggs's tubular lock, manufactured by a syndicate in London, May, 1890.

**LOCOMOTIVES**, see *Railways*. The use of locomotives and mechanically-propelled vehicles on ordinary roads in Great Britain is regulated by acts passed in 1861, 1865, 1878, 1898 and 1903 (Motor Car Act). See *Carriages*, 1896.

**LOCRIANS**, an ancient people of Northern Greece. They resisted Philip of Macedon, were aided by the Athenians and Thebans, and defeated by him at Chaeronea, 6 or 7 Aug. 338 B.C.

**LOCUSTS**, one of the plagues of Egypt, 1491 B.C. (*Exod. x.*) The ravages of locusts in Cyprus greatly checked by the skill and energy of Mr. Richard Mattei and Mr. Samuel Brown, 1881 *et seq.* A swarm of locusts settled upon the ground about London, and consumed the vegetables; great numbers fell in the streets; they resembled grasshoppers, but were three times the size, and their colours more variegated, 4 Aug. 1748. They infested Germany in 1749, Poland in 1750, S. Africa 1797, 1877, and Warsaw in June, 1816. They are said to have been seen in London in 1857. Russia was infested by them in July, 1860; Algeria, severely, in 1866, 1874, 1880, and 1891-2; Sardinia in 1868; and Minnesota, U.S., 1873-74; S. Russia, June, 1884; Cyprus, 1884 *et seq.*; N. India, June, July, 1891; Morocco, Dec. 1891, June, 1892; Gibraltar, Algeria and Morocco, 26 April, 1893; Tokar, Soudan, Nov. 1896; Orange River colony, Dec. 1902. Poisoning with arsenic said to be successful in Natal, announced Sept. 1897.

**LODGERS** paying 10l. a year for a whole year for apartments without furniture, acquired the suffrage, by Reform act passed 15 Aug. 1867. Act to protect their goods from distraint, passed 16 Aug. 1871. The lodger franchise much increased by the Parliamentary and Municipal Registration act of 1878; and by the new Reform Bill, 6 Dec. 1884.

The assembled judges decide that with a non-resident landlord the lodger is a householder; with a resident landlord he must qualify as a compound householder.

**LODGING-HOUSES.** An act placing common lodging-houses under the watch of the police was passed in 1851. In that year a model lodging-house erected by prince Albert appeared at the Great Exhibition. Since then, blocks of lodging-houses for the poor have been erected by Baroness Burdett-

Coutts and others. Mr. Peabody's donation of 12 March, 1862, has been appropriated for a similar purpose; see *Peabody and Rye House*. On 19 Nov. 1863, the city of London voted 20,000*l.* and a piece of land in Victoria-street (now Farringdon-road) for the purpose. See *London*, 1845.

**LODI** (N. Italy). Napoleon Bonaparte, commanding the French army, totally defeated the Austrians, under Beaulieu, after a bloody engagement, at the bridge of Lodi, 10 May, 1796. The republican flag floated in Milan a few days after. Monument to Victor Emmanuel inaugurated, 10 Sept. 1883.

**LOGARITHMS**, the indexes of the ratio of numbers one to another, were invented by John Napier, baron of Merchiston, who published his canon, or table, in 1614. The invention was completed by Mr. Henry Briggs, at Oxford, who published tables, 1616-18. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's bones*.

**"LOGIA"** (sayings or oracles) of our Lord, deciphered from a leaf of papyrus found at Oxyrynchus (Behnesa) by Messrs. Grenfell and Hunt, winter of 1896-97; fresh discoveries 1902-3.

**LOGIC**, "the science of reasoning." Eminent works on it are by Aristotle; Bacon, *Novum Organon*; Locke on the Understanding; and the modern treatises on Logic, by archbishop Whately, sir William Hamilton, and Mr. John Stuart Mill.

**LOGIERIAN SYSTEM** of musical education, commenced by J. B. Logier, in Jan. 1815, and introduced into the chief towns of the United Kingdom, Prussia, &c. He died in 1846.

**LOG-LINE**, used in navigation, about 1570; first mentioned by Bourne in 1577. It is divided into spaces of 50 feet, and the way which the ship makes is measured by a half-minute sand-glass, which bears nearly the same proportion to an hour that 50 feet bear to a mile.

**LOGOGRAPH**, apparatus invented by Mr. W. H. Barlow, about 1874, to give graphic representation of the vibratory motions of the air-waves of speech, somewhat resembling a telegraphic message.

**LOGOGRAPHIC PRINTING**, in which the commoner words were cast in one mass, was patented by Henry Johnson and Mr. John Walter of the *Times* in 1783.

**LOGRONO**, see *Najara*.

**LOI DES SUSPECTS**, enacted by the French convention, 17 Sept. 1793, during the reign of terror, filled the prisons of Paris. The Public Safety bill, of a similar character, was passed, 18 Feb. 1858, shortly after Orsini's attempt on the life of the emperor, Napoleon III.

**LOLLARDS** (by some derived from the German *lollen*, to sing in a low tone, by others derived from the English verb to loll or lounge), the name given to the first reformers of the Roman catholic religion in England, the followers of Wykliffe. The sect is also said to have been founded in 1315 by Walter

Lollard, who was burnt for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy. The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive. Sir John Cobham, lord Oldecastle, a follower of Wykliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec. 1418. Lollards' tower, part of the bishop's prison, was near St. Paul's. *Dr. Mustland*.

**LOMBARDISTS**, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

**LOMBARD MERCHANTS**, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. *Anderson*. Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1229. They had offices in the street named after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

**LOMBARDY** (N. Italy) derived its name from the Longobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was dethroned by Charlemagne. (For a list of the Lombard kings, see *Italy*.) About the end of the 9th century the chief towns of Lombardy fortified themselves, and became republics. The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another league was formed against Frederick II., which was also successful. After this, petty tyrants rose in most of the cities, and foreign influence quickly followed. The Guelph and Ghibelline factions greatly distracted Lombardy; and from the 15th century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of Italy. On the breaking up of the French empire in 1815, the *LOMBARDO-VENEZIAN KINGDOM* was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848; but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, 20 May; Palestro, 30, 31 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest

part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867. Population, 1901, 4,278,188; 1910 (est.), 4,600,350.

**LOMBOK**, an island in the Indian Archipelago, subject to the Dutch since 1863. See *Holland*, 1894 *et seq.*

**LONATO** (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

**LONDON**, the capital of the British empire. The earliest history is traditional. The Celtic name is said to have been *Lyn-din*, lake-fort; Tacitus, in the first century, calls it *Londinium*, and describes it as a flourishing trading city; it was afterwards called *Augusta*, an appellation frequently given to great cities; several other forms of the name appear in documents; such as *Lundenbyrig*, *Lundonia*, and *Londoa-wic*. In 1860, London and the suburbs were estimated to cover 121 square miles (11 miles each way, being three times as large as in 1800); in 1880, 122 square miles; in 1909, about 700 square miles. London was constituted an "administrative" county by the local government act, 1888, including as rateable value seven-eighths of Middlesex, about two-thirds of Surrey, and nearly one-third of Kent. The population of the "city" in 1801, 156,859; 1841, 125,008; 1881, 50,652; 1891, 37,702; 1901, 26,923; 1909 (est.), 27,000. For London and suburbs, 1801 *et seq.* see table in article *Population*. Census of 29 boroughs in the county of London, 4,536,541 (total, with *Outer Ring*, 6,578,784), 31 March, 1901. Estimated population to the middle of 1909, 4,833,938 (total, with *Outer Ring*, 7,429,750). Revenue of corporation, 1875, 655,391*l.*; expenditure, 592,244*l.*; in 1897, revenue, 1,010,835*l.*; expenditure, 1,004,048*l.*; in 1905, revenue, 1,213,260*l.*; expenditure, 1,187,231*l.*; 1908, revenue, 514,565*l.*; expenditure, 509,229*l.* Annual rateable value (metropolitan district), April, 1881, 27,495,488*l.*; the "city," 3,537,561*l.*; gross value, 43,961,653*l.*; rateable value of the county of London 1909, 44,603,935*l.*; of the "city," 5,451,836*l.*; total net debt of London (secured on the rates) on March 31, 1908, was 109,931,239*l.* Revenue (estimated) London county council, 1910, 11,482,607*l.*; expenditure (estimated), 10,829,984*l.* Gross debt, 82,165,000*l.* The metropolitan police district extends over a radius of 15 miles from Charing Cross, exclusive of the city of London, embracing an area of 699 square miles. The "port" of London extends from London Bridge to the North Foreland. Tonnage entering and leaving the port, 1871, 7,600,000; 1885, 12,000,000; registered tonnage of vessels entering and leaving the port for 1908, 19,681,914 tons, as against 25,689,400 in 1904. The "city" returns 2 instead of 4 members to parliament by act of 1885. "*London Statistics*," published by London county council, 1893-1908. See *Docks*, *Mayors*, *Metropolitan Board of Works*, *London County Council*, *Treaties*, and *City's Cost*.

The town appears to have prospered under British, Roman, and Saxon rules, and to have been much indebted to Alfred and his successors, but suffered greatly by the Danes; it was not attacked by William I., by whom the citizens were conciliated, and its corporate government was recognized by his son Henry I. The city received many favours from the

Plantagenet kings, but frequently resisted their exactions. London is governed by the lord mayor, the court of aldermen, the common council, and other offices. London was not included in the Municipal Corporations act, 1835. The London county council was constituted by the Local Government act passed in 1888.

\* It is still preserved in the city archives. This charter is written in beautiful Saxon characters, on a slip of parchment six inches long, and one broad, and is in English as follows:—"William the king greeteth William the bishop, and Gosfrith the portreeve, and all the burgesses within London, French and English, friendly. And I acquaint you, that I will that ye be all there law-worthy as ye were in king Edward's days. And I will that every child be his father's heir, after his father's days. And I will not suffer that any man do you any wrong. God preserve you."

† This terrible pestilence broke out in India, and spreading itself westward through every country on the globe, reached England. Its ravages in London were so great that the common cemeteries were not sufficient for the interment of the dead, and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter-house, where upwards of 50,000 bodies were then deposited. This disorder did not subside till 1357. *Leigh*.

\* This proclamation or decree was dated from Nonesuch, 7 July, 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis was deemed calculated to encourage the increase of the plague; create a trouble in governing such multitudes; a dearth of victuals; multiplying of beggars, and inability to relieve them; an increase of artisans more than could live together; impoverishing other cities for lack of inhabitants. The decree stated that lack of air, lack of room to walk and shoot, &c., arose out of town rendered a city. A proclamation to the same effect was also issued by James I.

Another bridge, erected by command of William II., was burnt in 1136. The late old bridge was commenced about 1176, by Peter of Colechurch, and completed in 1209, with houses on each side, connected together by large arches of timber which crossed the street.

A fire at the Southwark end brought crowds on the bridge; the houses at the north end caught fire likewise, and prevented their escape: and upwards of 3000 persons lost their lives, being either killed, burned, or drowned, 7 July, 1212

The bridge restored in 1300, again destroyed by fire in 1471, 13 Feb. 1525, and 1725
